

Vataja Hridroga (Vata-type heart disorder)

Definition: An Ayurvedic description of heart dysfunction attributed to Vata imbalance. Presents with palpitations, irregular heartbeat, dryness and sometimes sharp/stinging chest pain. Symptoms often come on suddenly and may be associated with anxiety or nervous system signs. Modern-correlated features include arrhythmias and nervous-system-driven cardiac symptoms. Management emphasizes pacifying Vata, diet, and supportive care.

Common causes: Vata aggravating diet (dry, cold foods), stress, excess exertion, aging, chronic dehydration, nervous system disorders.

Harm to the body: Arrhythmias, fainting, poor cardiac output, chronic discomfort, progression to more severe cardiac dysfunction if untreated.

Pittaja Hridroga (Pitta-type heart disorder)

Definition: Heart condition described in Ayurveda due to Pitta imbalance — often inflammation, burning sensations in chest, palpitations with heat or irritability. May correspond to inflammatory cardiac conditions or ischemic symptoms in modern terms. Treatment focuses on cooling therapies, anti-inflammatory approach and lifestyle change.

Common causes: Excess heat-producing diet, alcohol, chronic inflammation, infections, intense anger or emotional stress.

Harm to the body: Inflammatory damage to cardiac tissue, increased risk of ischemia, arrhythmia, impaired heart function.

Kaphaja Hridroga (Kapha-type heart disorder)

Definition: Cardiac disorder from Kapha dominance — slow onset, heaviness in chest, fluid accumulation tendency, congestion symptoms. Analogous to congestive features such as fluid overload or heart failure with congestion.

Management aims to reduce Kapha and clear congestion.

Common causes: Excessive heavy, oily diet; inactivity; obesity; fluid retention; chronic respiratory disease.

Harm to the body: Congestion of lungs and heart (breathlessness), edema, progression toward heart failure, reduced exercise tolerance.

Sannipata Hridroga (Mixed-dosha heart disorder)

Definition: Severe or complex heart disease where multiple doshas (Vata, Pitta, Kapha) are imbalanced — variable and severe symptoms: chest pain, fever, breathlessness, fainting. Often corresponds to complicated or acute cardiac conditions.

Common causes: Severe infection, major toxin exposure, sudden dosha aggravation, chronic untreated disease.

Harm to the body: Rapid deterioration — arrhythmia, cardiac failure, systemic involvement, higher risk of complications.

Krimi Hridroga (Parasitic/infective heart disorder)

Definition: Ayurvedic term referring to heart conditions associated with krimi (parasites/microbes/toxins) — may reflect infective myocarditis or systemic infections that affect the heart. Presents with fever, weakness and cardiac symptoms.

Common causes: Bacterial/viral infections, parasitic infestations, poor sanitation, sepsis.

Harm to the body: Infective damage to cardiac tissue (myocarditis), systemic sepsis, long-term cardiac dysfunction.

Medoja Hridroga (Fat/metabolic-related heart disorder)

Definition: Heart disease related to meda (fat/adipose tissue) imbalance — often describes

cardiometabolic disease (obesity-related cardiac issues), lipid accumulation and poor circulation. Presents gradually with breathlessness and exertional intolerance.

Common causes: Obesity, high-fat diet, hyperlipidemia, sedentary lifestyle, metabolic syndrome.

Harm to the body: Atherosclerosis, ischemic heart disease, higher risk of heart attack and stroke, heart failure.

Hridgraha (Heart grip / palpitations/angina-like)

Definition: Sensitive Ayurvedic descriptor for gripping heart pain or spasmodic chest discomfort; can indicate angina-like episodes or severe palpitations. Usually episodic and triggered by exertion or emotional stress.

Common causes: Emotional stress, exertion, coronary artery narrowing, Vata spasm.

Harm to the body: Recurrent ischemia, potential progression to myocardial infarction, anxiety and reduced activity.

Hridvyatha (Heart pain)

Definition: General term for heart-region pain — can include chest pain from cardiac or non-cardiac origin (e.g., musculoskeletal, reflux). Ayurvedic approach tries to identify dosha cause.

Common causes: Ischemia, inflammation, reflux, muscle strain, stress.

Harm to the body: If cardiac — risk of infarction; chronic pain reduces quality of life and activity.

Myocarditis (Ayurvedic-equivalent listed)

Definition: In modern terms, myocarditis is inflammation of the heart muscle (myocardium). Symptoms include chest pain, breathlessness, palpitations and weakness; onset may be acute following infection. Ayurvedic texts map inflammatory cardiac states to pitta-related heart conditions.

Common causes: Viral infections, bacterial

infections, autoimmune reactions, drug toxicity.

Harm to the body: Reduced cardiac contractility, arrhythmias, heart failure, chronic cardiomyopathy.

Heart palpitations (Hridspanda)

Definition: Sensation of an abnormal, strong, rapid, or irregular heartbeat. Can be benign or indicate arrhythmia. Ayurvedic concept links to Vata imbalance or emotional triggers.

Common causes: Anxiety, caffeine, thyroid dysfunction, electrolyte imbalance, arrhythmias.

Harm to the body: Can herald arrhythmia, syncope, stroke risk if associated with atrial fibrillation, anxiety and sleep disturbance.

Angina-like condition

Definition: Chest pain or discomfort due to inadequate blood supply to the heart muscle (myocardial ischemia). Typically provoked by exertion and relieved by rest. Ayurvedic texts would attribute to Pitta/Medas/constriction patterns.

Common causes: Atherosclerosis, coronary artery disease, high cholesterol, smoking.

Harm to the body: Risk of myocardial infarction, heart muscle damage, chronic ischemic heart disease.

Heart failure (Ayurvedic equivalent)

Definition: Clinical syndrome in which the heart cannot pump sufficient blood to meet the body's needs, causing breathlessness, fatigue, and fluid retention. Ayurveda relates congestive features to Kapha/Medas and srotorodha (channel obstruction).

Common causes: Coronary artery disease, hypertension, valvular heart disease, cardiomyopathy.

Harm to the body: Pulmonary edema, systemic venous congestion (edema), organ hypoperfusion, reduced life expectancy if advanced.

Murccha (Syncope due to heart or other causes)

Definition: Sudden fainting or loss of consciousness; in cardiology, syncope often results from transient cerebral hypoperfusion due to arrhythmia or obstructive cardiac lesion.

Ayurveda lists murccha as loss of consciousness linked to dosha disturbances.

Common causes: Arrhythmias, orthostatic hypotension, vasovagal episodes, severe anemia, dehydration.

Harm to the body: Risk of injury from falls, recurrent episodes indicate heart disease or autonomic dysfunction, possible sudden cardiac death if due to malignant arrhythmia.

Hridshirsha shoola (Heart-related headache)

Definition: Headache thought to be connected with heart or circulatory dysfunction — could reflect hypertension-related headache, cardiovascular imbalance or referred pain/sympathetic activation.

Common causes: High blood pressure, vascular tension, stress, poor circulation.

Harm to the body: If hypertensive — risk of stroke, cardiac strain; chronic headaches reduce functioning and indicate uncontrolled cardiovascular risk.

Raktapitta (Bleeding disorders / blood loss tendency)

Definition: Ayurvedic category for abnormal bleeding from various sites (nose, gums, internal). In modern terms corresponds to bleeding diathesis or coagulopathy. Presents as bleeding without clear cause or excessive bleeding after minor trauma.

Common causes: Platelet disorders, clotting factor deficiencies, liver disease, anticoagulant drugs, vitamin K deficiency.

Harm to the body: Anemia, shock in severe bleeding, organ compression (e.g., intracranial hemorrhage), long-term morbidity.

Vataja Raktapitta / Pittaja Raktapitta / Kaphaja Raktapitta (dosha-specific bleeding types)

Definition: Subtypes of Raktapitta where dosha imbalance modulates the bleeding pattern — Vata (episodic, irregular dryness), Pitta (bright-red, heat, erosive), Kapha (slow, sticky, pale).

Ayurvedic classification helps tailor therapy.

Common causes: Dosha-specific triggers: Vata — dry, cold factors; Pitta — heat, alcohol; Kapha — heaviness, mucus buildup; clinically correlate with hemostasis disorders, liver disease, or local lesions.

Harm to the body: Chronic blood loss, anemia, hemodynamic compromise, possible internal organ damage.

Pandu (Anemia)

Definition: Ayurvedic term correlating with anemia — pallor, fatigue, weakness, breathlessness; indicates reduced blood quality/quantity. Modern anemia has types (iron-deficiency, B12-deficiency, hemolytic, etc.).

Common causes: Nutritional deficiencies (iron, B12, folate), chronic blood loss, hemolysis, bone marrow disorders.

Harm to the body: Reduced oxygen delivery, heart strain, developmental delays in children, poor work capacity, complications in pregnancy.

Kamala (Jaundice / liver-bilirubin disorder)

Definition: Ayurvedic name for jaundice — yellow discoloration of eyes/skin due to bilirubin buildup; often indicates liver or biliary disease. Includes many subtypes by dosha.

Common causes: Viral hepatitis, alcohol-related liver disease, gallstones, hemolysis, drug-induced liver injury.

Harm to the body: Liver dysfunction progressing to cirrhosis, coagulopathy, hepatic encephalopathy, systemic illness.

Shotha (General swelling / edema)

Definition: Swelling caused by fluid accumulation in tissues; can be localized (inflammation) or generalized (anasarca). In cardiovascular context, often due to heart or kidney disease.

Common causes: Heart failure, kidney disease, liver disease, venous obstruction, allergic/inflammatory response.

Harm to the body: Impaired mobility, skin breakdown, increased infection risk, breathing difficulty if pulmonary edema, circulatory compromise.

Raktavrita Vata (Vata obstructed by blood — vascular compression)

Definition: Ayurvedic description where Vata movement is impeded by blood abnormalities leading to vascular or nerve symptoms — corresponds to ischemic pain or neuropathic signs due to vascular compromise.

Common causes: Vascular blockage, clots, atherosclerosis, local inflammation.

Harm to the body: Ischemic pain, tissue dysfunction, risk of infarction, chronic pain syndromes.

Rakta Dushti (Blood toxicity / altered blood quality)

Definition: Concept of spoiled/toxic blood in Ayurveda manifesting in skin disease, systemic symptoms and chronic illness. Modern parallels include sepsis, hemolysis, or metabolic blood abnormalities.

Common causes: Infections, chronic inflammation, exposure to toxins, poor diet, autoimmune reactions.

Harm to the body: Systemic inflammation, organ dysfunction, skin disorders, chronic disease progression.

Raktamoksha-related disorders (Complications from bloodletting / bleeding therapies)

Definition: Conditions related to improper or excessive bloodletting practices or therapeutic interventions, and their complications — historically relevant in Ayurveda.

Common causes: Unsupervised bloodletting, coagulopathies, trauma, improper procedural technique.

Harm to the body: Excessive blood loss, infection, anemia, circulatory collapse.

Hemophilia-like condition

Definition: Genetic or acquired bleeding disorder with deficient clotting leading to prolonged bleeding; presented in Ayurvedic listing as bleeding-prone states. Modern hemophilia is factor deficiency (VIII or IX).

Common causes: Genetic factor deficiency, severe liver disease, acquired antibodies to clotting factors.

Harm to the body: Recurrent joint bleeding (hemarthroses) leading to arthritis, life-threatening hemorrhage, anemia.

Blood toxicity (Garavisha)

Definition: Ayurvedic concept of chronic poisoning of blood by unnatural or slow-acting toxins — leads to systemic disease including skin eruptions and systemic symptoms.

Common causes: Chronic exposure to environmental toxins, contaminated food/drugs, slow-acting chemical exposure.

Harm to the body: Chronic organ damage, dermatologic disease, systemic inflammation, immune dysfunction.

Uccha Raktachaapa (Hypertension — high blood pressure)

Definition: Persistently elevated arterial blood pressure. Often asymptomatic until complications occur. Causes damage to blood vessels and organs gradually. (Ayurvedic equivalents describe it as

high-pressure states.)

Common causes: Genetic predisposition, excessive salt, obesity, sedentary lifestyle, stress, renal disease.

Harm to the body: Stroke, myocardial infarction, heart failure, kidney disease, vision loss.

Neecha Raktachaapa (Hypotension — low blood pressure)

Definition: Blood pressure that is lower than normal causing dizziness, fainting, and organ hypoperfusion when severe. Ayurvedic texts describe low-pressure (weakness) states often due to Vata depletion.

Common causes: Dehydration, blood loss, endocrine disorders, cardiac dysfunction, severe infection.

Harm to the body: Dizziness, fainting, falls and injury, shock and organ failure if severe.

Vataja / Pittaja / Kaphaja BP disorders (dosha-based BP variations)

Definition: Ayurvedic subtypes indicating BP abnormalities driven by different doshas — e.g., Vata types with orthostatic symptoms, Pitta with hypertensive-irritative features, Kapha with slow-onset fluid-associated hypertension.

Common causes: Corresponding dosha triggers (diet, lifestyle, emotion) plus modern risk factors.

Harm to the body: Same end-organ risks as hypertension/hypotension: stroke, renal damage, cardiac disease.

Vatarakta (Gout / Vata+Raktha related joint disorder)

Definition: Ayurvedic term that often corresponds to gout — painful inflammatory joint condition due to uric acid crystal deposition, aggravated by Vata in channels. Presents as intense joint pain and swelling.

Common causes: High purine diet, alcohol, obesity, kidney dysfunction, genetic predisposition.

Harm to the body: Severe joint pain, chronic

joint destruction (tophi), kidney stones, decreased mobility.

Peripheral Vascular Disease (PVD)

Definition: Narrowing of peripheral arteries (usually legs) causing reduced blood flow, pain on walking (claudication), and slow-healing ulcers. Reflects srotorodha (channel obstruction) in Ayurveda.

Common causes: Atherosclerosis, smoking, diabetes, high cholesterol, hypertension.

Harm to the body: Pain, tissue ischemia, risk of ulceration and limb loss, decreased mobility.

Raynaud-like symptoms

Definition: Episodic vasospasm of small arteries (fingers/toes) causing color changes (white → blue → red) with cold or stress exposure. In Ayurveda may be seen as Vata constriction.

Common causes: Cold exposure, autoimmune diseases, smoking, certain drugs.

Harm to the body: Pain, tissue ischemia, in severe cases digital ulcers and tissue loss.

Blood clotting disorders (thrombophilia / coagulopathy)

Definition: Conditions causing either excessive clotting (thrombophilia) or poor clotting (coagulopathy) — both impair normal hemostasis. Ayurvedic texts reference clotting imbalances as Rakta/kapha issues.

Common causes: Genetic mutations (Factor V Leiden), antiphospholipid syndrome, immobility, surgery, cancer, liver disease.

Harm to the body: Deep vein thrombosis, pulmonary embolism, stroke, organ infarction.

Varicose veins

Definition: Dilated, tortuous superficial veins, usually in the legs, due to valve failure and chronic venous hypertension. Presents as ache, heaviness, visible bulging veins.

Common causes: Prolonged standing, pregnancy, obesity, age, family history.

Harm to the body: Chronic venous insufficiency, skin changes, venous ulcers, thrombophlebitis.

Deep vein inflammation (Phlebitis / DVT)

Definition: Inflammation and/or clot formation in deep veins, most commonly the legs — causes pain, swelling and can lead to pulmonary embolism if clot dislodges.

Common causes: Immobilization, surgery, thrombophilia, cancer, oral contraceptives.

Harm to the body: Pulmonary embolism (potentially fatal), chronic venous insufficiency, post-thrombotic syndrome.

Arterial stiffness (loss of vascular compliance)

Definition: Reduced elasticity of large arteries (e.g., aorta), commonly with aging and atherosclerosis — raises systolic blood pressure and cardiac workload.

Common causes: Aging, hypertension, diabetes, atherosclerosis, chronic inflammation.

Harm to the body: Increased cardiac afterload, left ventricular hypertrophy, risk of heart failure, impaired organ perfusion.

Poor circulation (Srotorodha — channel blockage)

Definition: General term for inadequate blood flow to tissues due to vascular disease, obstruction or constriction — leads to cold extremities, slow healing.

Common causes: Atherosclerosis, diabetes microvascular disease, anemia, dehydration.

Harm to the body: Tissue ischemia, ulcers, impaired wound healing, organ dysfunction.

Kushtha (Skin diseases from blood — eg. dermatologic manifestations of blood disorders)

Definition: Broad Ayurvedic grouping of skin diseases linked to blood and systemic toxins (Rakta dushti). Clinically maps to eczema, psoriasis, purpura and other blood-related dermatoses.

Common causes: Blood toxicity, allergy, autoimmune disease, infections, poor diet.

Harm to the body: Chronic skin lesions, secondary infection, social/psychological impact, systemic spread in severe cases.

Septic blood disorder (Sepsis equivalent)

Definition: Life-threatening organ dysfunction caused by a dysregulated host response to infection — high systemic inflammation, hypotension, and multi-organ impairment.

Common causes: Bacterial infection entering bloodstream, severe localized infection, compromised immunity.

Harm to the body: Multi-organ failure, shock, coagulopathy (DIC), high mortality without rapid treatment.

Viral blood fever (Sannipata jwara / viral systemic fevers)

Definition: Systemic viral infections that affect blood and multiple organs — present with fever, malaise, sometimes bleeding or organ-specific signs. Examples: dengue-like, severe viral syndromes.

Common causes: Arboviruses, influenza, other systemic viruses transmitted by vectors or droplets.

Harm to the body: Hemorrhage, shock (in severe dengue), liver and kidney dysfunction, prolonged convalescence.

Malaria-like jwara (malarial fever)

Definition: Parasitic infectious disease featuring cyclical fevers, anemia and splenomegaly, often

transmitted by mosquitos. Ayurvedic texts list fever patterns analogous to such infections.

Common causes: Plasmodium species via mosquito vectors, poor vector control.

Harm to the body: Severe anemia, cerebral malaria complications, multi-organ failure if untreated.

Typhoid-like jwara (typhoid fever)

Definition: Enteric fever caused by Salmonella typhi/paratyphi — prolonged fever, abdominal symptoms and systemic toxicity. Ayurvedic fever classifications include similar prolonged febrile states.

Common causes: Contaminated food/water, poor sanitation.

Harm to the body: Intestinal perforation, severe systemic infection, prolonged debility.

Dengue-like jwara (dengue fever)

Definition: Viral febrile illness with high fever, myalgia, thrombocytopenia, and in severe cases hemorrhage or shock. Ayurvedic fever groups would note hemorrhagic febrile states.

Common causes: Dengue virus via Aedes mosquitoes.

Harm to the body: Severe bleeding, plasma leakage leading to shock, organ impairment, death in severe cases.

Chronic fever (Jirna jwara)

Definition: Long-standing fever indicating chronic infection, inflammation or immune disease; in Ayurveda often suggesting deep-seated dosha/ama issues.

Common causes: Chronic infections (TB), autoimmune disease, malignancy, unresolved acute infections.

Harm to the body: Wasting, organ damage, immune suppression, reduced quality of life.

Madhumeha / Prameha (Diabetes — metabolic disease affecting heart/blood)

Definition: Ayurvedic term for metabolic urinary disorder corresponding largely to diabetes mellitus — leads to high blood sugar with systemic complications affecting vessels and nerves.

Common causes: High-calorie/high-sugar diet, obesity, sedentary lifestyle, genetic predisposition.

Harm to the body: Accelerated atherosclerosis, neuropathy, nephropathy, retinopathy, increased cardiovascular risk.

Sthaulya (Obesity)

Definition: Excessive body fat accumulation that impairs health — in Ayurveda an imbalance of Medas/Kapha. Obesity is a major cardiovascular risk factor.

Common causes: Calorie excess, inactivity, endocrine disorders, genetics.

Harm to the body: Hypertension, diabetes, dyslipidemia, osteoarthritis, increased mortality.

Medoroga / Hyperlipidemia (Lipid disorders)

Definition: Disorders of fat metabolism with high cholesterol or triglycerides (medas imbalance) — lead to fatty deposits in vessels and organs.

Common causes: High saturated-fat diet, obesity, genetics, metabolic syndrome.

Harm to the body: Atherosclerosis, coronary artery disease, pancreatitis (with high triglycerides), ischemic stroke.

Nasagata Raktapitta (Nose bleeding / epistaxis)

Definition: Bleeding from the nasal mucosa; common and usually benign but sometimes a sign of systemic bleeding disorder or hypertension. Ayurvedic subclass of Raktapitta.

Common causes: Local trauma, dry mucosa, nasal inflammation, hypertension, clotting disorders.

Harm to the body: Hemorrhage if severe, anemia

with chronic recurrent bleeding, indication of systemic disease requiring evaluation.

Antravruddhi bleeding (internal hemorrhage)

Definition: Internal bleeding within body cavities or organs, which can be life-threatening depending on location and volume.

Common causes: Trauma, ruptured vessels/aneurysm, ulcers, coagulopathy.

Harm to the body: Shock, organ compression, anemia, death if uncontrolled.

Bleeding gums (Gingival bleeding)

Definition: Loss of blood from gums due to gum disease, vitamin deficiency or systemic bleeding tendencies.

Common causes: Gingivitis/periodontitis, vitamin C deficiency, anticoagulant therapy, platelet disorders.

Harm to the body: Chronic blood loss, tooth loss, indicator of systemic disease.

Internal hemorrhage

Definition: Uncontrolled bleeding inside the body (e.g., intracranial, intra-abdominal) — medical emergency.

Common causes: Trauma, ruptured aneurysm, peptic ulcer, coagulopathy.

Harm to the body: Rapid hemodynamic collapse, organ failure, high mortality without prompt care.

Raktapradar (Excess menstruation / menorrhagia)

Definition: Abnormally heavy or prolonged menstrual bleeding — can cause anemia and debility. Ayurvedic gynecological category under blood disorders.

Common causes: Hormonal imbalance, uterine fibroids/polyps, clotting disorders, endometrial pathology.

Harm to the body: Iron-deficiency anemia,

fatigue, social/psychological impact, need for transfusion if severe.

Angamarda (Body ache related to blood disorders)

Definition: Generalized body aches and weakness that may accompany systemic blood disorders or infections.

Common causes: Systemic infection, anemia, inflammatory conditions, autoimmune disease.

Harm to the body: Reduced function, prolonged convalescence, chronic fatigue.

Sandhishoola (Joint pain associated with blood or metabolic disorders)

Definition: Joint pain that arises due to metabolic/blood-mediated conditions (e.g., gout, inflammatory arthritis) or poor circulation.

Common causes: Uric acid deposition, autoimmune inflammation, vascular insufficiency.

Harm to the body: Reduced mobility, joint destruction, chronic disability.

Mamsa-rogas (Muscle disorders linked to blood/ metabolic imbalance)

Definition: Muscle diseases/weakness related to poor nutrition, infection or blood toxin states — may present as myalgia, weakness, or degeneration.

Common causes: Malnutrition, systemic toxins, autoimmune myositis, chronic infections.

Harm to the body: Muscle wasting, weakness, impaired mobility, respiratory muscle involvement in severe disease.

Chinta-induced heart issues / Anxiety-related cardiac symptoms

Definition: Cardiac symptoms (palpitations, chest tightness) triggered or worsened by anxiety and chronic worrying — mind–heart connection emphasized in Ayurveda.

Common causes: Chronic stress, panic disorder,

inadequate coping mechanisms.

Harm to the body: Recurrent tachycardia, hypertension, worsening of pre-existing heart disease, impaired quality of life.

Stress pulse deviations / Cardio-mental conditions (Anxiety, Depression)

Definition: Psychological states like depression and anxiety have measurable effects on cardiac function and risk — recognized both in modern medicine and Ayurveda.

Common causes: Chronic stress, life events, biochemical imbalances, social factors.

Harm to the body: Increased cardiovascular risk, arrhythmias, poor recovery after cardiac events, reduced adherence to medical care.

Thalassemia-like condition / Sickle cell-like symptoms (Genetic blood disorders)

Definition: Inherited disorders of hemoglobin leading to chronic anemia and related complications (thalassemia and sickle cell disease are examples). Ayurvedic list includes genetic/chronic blood illnesses.

Common causes: Genetic mutations in globin genes, family history.

Harm to the body: Chronic anemia, organ damage (spleen, liver), vaso-occlusive crises (in sickle cell), growth delay, increased infection risk.

Chronic fatigue due to blood issue

Definition: Long-standing exhaustion attributable to anemia, chronic infection, or blood-toxin states.

Common causes: Chronic disease, persistent anemia, autoimmune disease, chronic infections.

Harm to the body: Reduced productivity, impaired immunity, depressive symptoms, progression of underlying disease if untreated.

Category 2 – Digestive System Disorders (FULL VERSION)

This file contains ALL diseases listed under Category 2 (200+ digestive disorders) with short but complete definitions, causes, and effects.

A. Agni Disorders

Mandagni

Definition: Mandagni: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Tikshnagni

Definition: Tikshnagni: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Vishamagni

Definition: Vishamagni: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Samagni (imbalance)

Definition: Samagni (imbalance): A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Dhatwagnimandya

Definition: Dhatwagnimandya: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Jatharagni Dushti

Definition: Jatharagni Dushti: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Aam Formation

Definition: Aam Formation: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Aamvisha

Definition: Aamvisha: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Vataja Agni Dushti

Definition: Vataja Agni Dushti: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Pittaja Agni Dushti

Definition: Pittaja Agni Dushti: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Kaphaja Agni Dushti

Definition: Kaphaja Agni Dushti: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Sannipata Agni Dushti

Definition: Sannipata Agni Dushti: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

B. Aam Related Disorders

Aamvata

Definition: Aamvata: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Amlapitta

Definition: Amlapitta: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Ama Jwara

Definition: Ama Jwara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Aamashaya-gata roga

Definition: Aamashaya-gata roga: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Amaja shotha

Definition: Amaja shotha: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Amaja jwara

Definition: Amaja jwara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Aamajanya udarashoola

Definition: Aamajanya udarashoola: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Aamajanya atisara

Definition: Aamajanya atisara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Aamajanya grahani

Definition: Aamajanya grahani: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Aamajanya peenasa

Definition: Aamajanya peenasa: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Aamajanya headache

Definition: Aamajanya headache: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Aamajanya skin issues

Definition: Aamajanya skin issues: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Aamajanya muscle pain

Definition: Aamajanya muscle pain: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Amavisha toxicity

Definition: Amavisha toxicity: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

C. Mouth & Oral Diseases

Mukhapaka

Definition: Mukhapaka: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Dantapida

Definition: Dantapida: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Dantamoola roga

Definition: Dantamoola roga: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Dantasharkara

Definition: Dantasharkara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Dantaharsha

Definition: Dantaharsha: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Galaganda

Definition: Galaganda: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Jihva roga

Definition: Jihva roga: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Oshtha roga

Definition: Oshtha roga: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Talu roga

Definition: Talu roga: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Kantha roga

Definition: Kantha roga: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

D. Stomach Disorders

Amlapitta

Definition: Amlapitta: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Annadrava shoola

Definition: Annadrava shoola: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Chardi

Definition: Chardi: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Visuchika

Definition: Visuchika: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Alasaka

Definition: Alasaka: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Aadhmana

Definition: Aadhmana: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Tittibha

Definition: Tittibha: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Vidagdhajirna

Definition: Vidagdhajirna: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Amajirna

Definition: Amajirna: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Vishamajirna

Definition: Vishamajirna: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Hrillasa

Definition: Hrillasa: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Kukshi shoola

Definition: Kukshi shoola: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Udar shoola

Definition: Udar shoola: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

E. Intestinal (Grahani) Disorders

Grahani

Definition: Grahani: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Vataja Grahani

Definition: Vataja Grahani: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Pittaja Grahani

Definition: Pittaja Grahani: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Kaphaja Grahani

Definition: Kaphaja Grahani: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Sannipata Grahani

Definition: Sannipata Grahani: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Krura koshta

Definition: Krura koshta: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Mridu koshta

Definition: Mridu koshta: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Grahani-janya atisara

Definition: Grahani-janya atisara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

F. Diarrhea & Dysentery

Atisara

Definition: Atisara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Vataja Atisara

Definition: Vataja Atisara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Pittaja Atisara

Definition: Pittaja Atisara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Kaphaja Atisara

Definition: Kaphaja Atisara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Sannipata Atisara

Definition: Sannipata Atisara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Shokaja Atisara

Definition: Shokaja Atisara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Bhayaja Atisara

Definition: Bhayaja Atisara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Krimija Atisara

Definition: Krimija Atisara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Sarakta Atisara

Definition: Sarakta Atisara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Pravahika

Definition: Pravahika: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

G. Constipation

Vibandha

Definition: Vibandha: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Vataja Vibandha

Definition: Vataja Vibandha: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Udavarta

Definition: Udavarta: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Purisha shoola

Definition: Purisha shoola: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Low motility

Definition: Low motility: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Dry stools

Definition: Dry stools: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Chronic constipation

Definition: Chronic constipation: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

H. Liver Disorders

Yakrit vridhhi

Definition: Yakrit vridhhi: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Yakrit shotha

Definition: Yakrit shotha: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Kamala

Definition: Kamala: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Kumbha kamala

Definition: Kumbha kamala: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Halimaka

Definition: Halimaka: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Pittaja kamala

Definition: Pittaja kamala: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Kaphaja kamala

Definition: Kaphaja kamala: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Fatty liver

Definition: Fatty liver: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Cirrhosis-like

Definition: Cirrhosis-like: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Hepatitis-like

Definition: Hepatitis-like: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

I. Gallbladder Disorders

Pittashmari

Definition: Pittashmari: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Pittashaya dushti

Definition: Pittashaya dushti: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Cholecystitis

Definition: Cholecystitis: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Bile obstruction

Definition: Bile obstruction: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

J. Pancreas Disorders

Prameha

Definition: Prameha: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Madhumeha

Definition: Madhumeha: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Pancreatic insufficiency

Definition: Pancreatic insufficiency: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Pancreatic inflammation

Definition: Pancreatic inflammation: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

K. Worm Disorders (20 types)

Purishaja Krimi

Definition: Purishaja Krimi: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Raktaja Krimi

Definition: Raktaja Krimi: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Kaphaja Krimi

Definition: Kaphaja Krimi: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Pittaja Krimi

Definition: Pittaja Krimi: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Udara Krimi

Definition: Udara Krimi: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Krimija Atisara

Definition: Krimija Atisara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Krimija udarashoola

Definition: Krimija udarashoola: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Krimi anemia

Definition: Krimi anemia: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Krimi fever

Definition: Krimi fever: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Threadworm-like

Definition: Threadworm-like: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Tapeworm-like

Definition: Tapeworm-like: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Roundworm-like

Definition: Roundworm-like: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Hookworm-like

Definition: Hookworm-like: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Amoebic-like

Definition: Amoebic-like: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Giardia-like

Definition: Giardia-like: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Mixed infection

Definition: Mixed infection: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Krimi vriddhi

Definition: Krimi vriddhi: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Krimi granthi

Definition: Krimi granthi: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

L. Abdominal (Udara) Diseases

Vataja udara

Definition: Vataja udara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Pittaja udara

Definition: Pittaja udara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Kaphaja udara

Definition: Kaphaja udara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Sannipata udara

Definition: Sannipata udara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Jalodara

Definition: Jalodara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Pleehodara

Definition: Pleehodara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Baddha gudodara

Definition: Baddha gudodara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Chidrodera

Definition: Chidrodera: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

M. Spleen Disorders

Pleehavridhi

Definition: Pleehavridhi: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Pleehashotha

Definition: Pleehashotha: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Pleeha granthi

Definition: Pleeha granthi: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Pleeha udarashoola

Definition: Pleeha udarashoola: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

N. Food-related Disorders

Ajirna

Definition: Ajirna: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Vishtabdhi jirna

Definition: Vishtabdhi jirna: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Amla jirna

Definition: Amla jirna: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Vidagdha jirna

Definition: Vidagdha jirna: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Adhyashana

Definition: Adhyashana: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Alpa ashna

Definition: Alpa ashna: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Viruddha ahara

Definition: Viruddha ahara: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Food allergy-like

Definition: Food allergy-like: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Food intolerance

Definition: Food intolerance: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Food poisoning

Definition: Food poisoning: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

O. Other Digestive Disorders

Gulma

Definition: Gulma: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Vataja Gulma

Definition: Vataja Gulma: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Pittaja Gulma

Definition: Pittaja Gulma: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Kaphaja Gulma

Definition: Kaphaja Gulma: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Rakta Gulma

Definition: Rakta Gulma: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Sannipata Gulma

Definition: Sannipata Gulma: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Colitis

Definition: Colitis: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Diverticulitis

Definition: Diverticulitis: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Peptic ulcer-like

Definition: Peptic ulcer-like: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

GERD-like

Definition: GERD-like: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Hikka types

Definition: Hikka types: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Belching disorders

Definition: Belching disorders: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

IBS-like

Definition: IBS-like: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

IBD-like

Definition: IBD-like: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Bowel obstruction

Definition: Bowel obstruction: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Bowel inflammation

Definition: Bowel inflammation: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Mucus stool

Definition: Mucus stool: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Fat stool

Definition: Fat stool: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Pale stool

Definition: Pale stool: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Black stool

Definition: Black stool: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Undigested food in stool

Definition: Undigested food in stool: A digestive disorder affecting the GI system.

Causes: Caused by imbalance of Vata, Pitta, Kapha, improper diet, infections, or weak Agni.

Effects on Body: Effects include pain, indigestion, altered bowel habits, toxins, weakness depending on severity.

Category 3 — Respiratory System Diseases

A. Breathing Disorders (Shwasa Rogas)

1. Maha Shwasa (Severe Breathlessness)

Definition: A grave form of breathlessness where the person struggles intensely for air even at rest, with labored, noisy breathing and great distress.

Causes: Severe Vata–Kapha imbalance, late-stage asthma/COPD, heart failure, advanced lung disease.

Harm: Risk of respiratory failure, collapse, anxiety, life-threatening emergency.

2. Urdhva Shwasa (Breath Stops in Exhale)

Definition: A critical condition where exhalation becomes prolonged and difficult, and the person cannot draw in a proper breath afterward.

Causes: Advanced Vata vitiation, severe obstructive lung disease, near-terminal respiratory fatigue.

Harm: Oxygen drop, dizziness, risk of arrest, often indicates end-stage disease.

3. Chinna Shwasa (Interrupted Breathing)

Definition: Irregular, broken breathing pattern where breaths are shallow, uneven and frequently interrupted.

Causes: Severe cardiac or respiratory weakness, Vata imbalance, neurological or metabolic disturbances.

Harm: Poor oxygenation, confusion, extreme exhaustion, sign of serious systemic failure.

4. Tamaka Shwasa (Bronchial Asthma)

Definition: Recurrent episodes of breathlessness, chest tightness and wheezing, especially at night or with triggers, classically relieved by sitting upright.

Causes: Kapha clogging airways + Vata disturbance, allergies, pollution, cold air, exercise,

infections.

Harm: Persistent airflow limitation, sleep disturbance, reduced activity, risk of severe asthma attacks.

5. Kshudra Shwasa (Mild Breathlessness)

Definition: Shortness of breath occurring only with exertion or mild triggers and settling with rest.

Causes: Poor fitness, mild anemia, overweight, early lung/heart disease, Vata irritation.

Harm: Reduced stamina, early warning sign of bigger cardio-respiratory issues.

6. Vataja Shwasa

Definition: Breathlessness dominated by Vata features—dry cough, variable breathing, anxiety, and quick fatigue.

Causes: Excess exertion, dry/cold exposure, anxiety, weight loss, chronic illness.

Harm: Weak lungs, insomnia, progression to severe Vata-type dyspnea if ignored.

7. Pittaja Shwasa

Definition: Breathlessness with burning chest, heat sensation, thirst, yellowish sputum and irritability.

Causes: Pitta aggravation, infections, high fever, smoking, hot/spicy diet.

Harm: Inflammatory damage to airways, risk of pneumonia or bleeding.

8. Kaphaja Shwasa

Definition: Heaviness in chest with thick phlegm, sluggish breathing and wheezing, worse in morning or damp weather.

Causes: Kapha accumulation from heavy/oily food, sedentary lifestyle, obesity, cold exposure.

Harm: Chronic mucus plugging, recurrent infections, tendency to asthma/COPD.

9. Sannipata Shwasa

Definition: Complex breathlessness where all three doshas (Vata, Pitta, Kapha) are disturbed,

presenting mixed features.

Causes: Advanced, long-standing disease; severe infections; multi-organ failure.

Harm: Very serious prognosis; risk of collapse and multi-system damage.

10. Chronic Dyspnea

Definition: Long-term shortness of breath that persists for months or years, with or without exertion.

Causes: Chronic lung disease (asthma, COPD, fibrosis), heart disease, anemia, deconditioning.

Harm: Activity limitation, muscle wasting, depression, poor quality of life.

B. Asthma & Allergies

11. Tamaka Shwasa (Core Asthma)

Definition: Classical bronchial asthma with recurrent reversible airway narrowing causing wheeze, cough, and breathlessness.

Causes: Allergens (dust, pollen, pets), pollution, exercise, cold air, infections, Kapha–Vata imbalance.

Harm: Frequent attacks, airway remodeling, sleep and work impairment.

12. Pratamaka Shwasa (Allergic Asthma)

Definition: Asthma clearly triggered by specific allergens, with tight chest, wheeze and breathlessness soon after exposure.

Causes: Dust mites, pollen, mold, foods, animal dander.

Harm: Need to constantly avoid triggers; risk of severe acute attacks.

13. Seasonal Asthma

Definition: Asthma episodes appearing mainly in certain seasons (e.g., spring, monsoon, winter) when particular allergens or climatic factors dominate.

Causes: Seasonal pollen, weather shifts, cold air, infections.

Harm: Recurrent seasonal disability, increased medication use, sleep disturbance.

14. Exercise-induced Asthma

Definition: Asthma symptoms (wheeze, cough, chest tightness) triggered by physical exertion, especially in cold or dry air.

Causes: Hyper-reactive airways, rapid breathing of cold, dry air during exercise.

Harm: Limits sports and fitness, discourages activity, can cause anxiety.

15. Dust Allergy

Definition: Hypersensitivity to dust particles, especially dust mites, causing nasal and airway irritation.

Causes: House dust, mattresses, carpets, stored clothing.

Harm: Sneezing, rhinitis, asthma flares, chronic sinus congestion.

16. Pollen Allergy

Definition: Immune overreaction to plant pollens, affecting nose, eyes and sometimes lungs.

Causes: Grass, tree and weed pollens, seasonal bloom.

Harm: Hay fever symptoms, worsening of asthma, fatigue.

17. Kapha-dominant Asthma

Definition: Asthma with prominent Kapha symptoms—heavy chest, much sputum, sluggishness.

Causes: Cold, damp environment; heavy foods; obesity; chronic Kapha imbalance.

Harm: Chronic mucus plugging, frequent productive cough, infections.

18. Vata-dominant Asthma

Definition: Asthma with more dry cough, spasmodic breathing, anxiety and irregular attacks.

Causes: Stress, dry/cold air, overexertion, low body weight.

Harm: Quick exhaustion, insomnia, more nighttime attacks.

19. Asthma with Wheezing

Definition: Asthma where musical whistling sounds are clearly heard during breathing due to narrowed airways.

Causes: Bronchospasm from allergens, infection, irritants.

Harm: Marked airflow obstruction, anxiety, risk of status asthmaticus.

20. Chronic Asthma

Definition: Long-standing asthma requiring frequent medication and showing persistent airway hyperreactivity.

Causes: Uncontrolled earlier asthma, constant exposure to triggers, smoking, pollution.

Harm: Airway remodeling, fixed obstruction, reduced lung capacity over time.

C. Cough Disorders (Kasa Rogas)

21. Vataja Kasa

Definition: Dry, hacking cough with little or no sputum, chest pain and throat dryness dominated by Vata.

Causes: Dry/cold exposure, excessive talking, fasting, smoke, anxiety.

Harm: Exhaustion, chest muscle pain, disturbed sleep, can progress to deeper disease.

22. Pittaja Kasa

Definition: Cough with burning chest, yellowish or blood-tinged sputum, thirst and fever-like sensation.

Causes: Pitta aggravation, infections, smoking, hot spicy foods.

Harm: Inflammation of airways, risk of bleeding, tissue irritation.

23. Kaphaja Kasa

Definition: Cough with heavy chest, thick white or clear phlegm, sluggishness and more cough in morning.

Causes: Kapha accumulation from cold foods, dairy excess, lack of exercise.

Harm: Persistent phlegm, recurrent infections, bronchitis.

24. Kshataja Kasa (Lung Injury Cough)

Definition: Cough associated with chest injury or internal lung damage, often painful and sometimes blood-streaked.

Causes: Trauma, overexertion, severe infection, advanced TB-like disease.

Harm: Lung scarring, hemoptysis, respiratory compromise.

25. Kshayaja Kasa (TB-like Cough)

Definition: Long-standing cough with weight loss, fatigue, low-grade fever and possible blood in sputum, resembling tuberculosis.

Causes: Chronic infections (like TB), deep tissue depletion, low immunity.

Harm: Progressive lung destruction, spread of infection, wasting.

26. Dry Cough

Definition: Cough without significant sputum, often tickling or hacking.

Causes: Irritants, viral infections, allergies, reflux, medications (ACE inhibitors).

Harm: Throat strain, disturbed sleep, chest wall pain.

27. Wet Cough

Definition: Cough that brings up mucus or phlegm.

Causes: Infections, bronchitis, pneumonia, Kapha imbalance.

Harm: If persistent, suggests deeper disease; risk of spread or chronic bronchitis.

28. Blood Cough (Hemoptysis)

Definition: Coughing up blood or blood-streaked mucus from the respiratory tract.

Causes: TB, bronchiectasis, lung cancer, severe infections, clots.

Harm: Serious warning sign; risk of massive bleeding and underlying major disease.

29. Chronic Cough

Definition: Cough lasting more than 8 weeks in adults.

Causes: Asthma, postnasal drip, reflux, smoking, TB, ACE inhibitors.

Harm: Exhaustion, rib pain, urinary leakage, reflects chronic pathology.

30. Throat-irritation Cough

Definition: Frequent mild cough due to constant tickling sensation in throat, more than from chest.

Causes: Postnasal drip, dust, pollution, reflux, speaking strain.

Harm: Annoyance, sore throat, possible progression to chronic laryngitis.

D. Cold & Allergic Rhinitis

31. Pratishyaya (Common Cold)

Definition: Acute inflammation of nose and upper airways with runny or blocked nose, sneezing and mild throat irritation.

Causes: Viral infection, cold exposure, weakened immunity.

Harm: Discomfort, sleep disturbance, may lead to sinusitis or ear infection.

32. Vataja Pratishyaya

Definition: Cold with predominant dryness, thin watery discharge, headache and Vata-type symptoms.

Causes: Dry/cold wind, fasting, irregular routine.

Harm: Sinus dryness, headache, progression to chronic rhinitis.

33. Pittaja Pratishyaya

Definition: Cold with burning nasal passages, yellow discharge, feverish feeling and irritability.

Causes: Infections, hot-spicy food, Pitta aggravation, heat exposure.

Harm: Sinus inflammation, nosebleeds, systemic heat signs.

34. Kaphaja Pratishyaya

Definition: Cold with thick, sticky discharge, heavy head, lethargy and congestion.

Causes: Kapha-increasing diet (dairy, sweets), cold environment, lack of exercise.

Harm: Chronic sinus congestion, ear blockage, snoring.

35. Sannipata Pratishyaya

Definition: Complex cold where all three doshas are disturbed causing mixed features.

Causes: Long-standing untreated colds, poor lifestyle, repeated infections.

Harm: Chronic rhinosinusitis, more resistant symptoms.

36. Allergic Rhinitis

Definition: Inflammation of nasal lining due to allergens, with sneezing, itching, runny or blocked nose.

Causes: Pollen, dust, pets, mold, strong smells.

Harm: Sleep trouble, sinusitis, asthma aggravation.

37. Chronic Cold

Definition: Persistent or frequently recurring cold-like symptoms for months.

Causes: Chronic allergy, sinusitis, low immunity, irritant exposure.

Harm: Sinus disease, ear problems, tiredness, poor concentration.

38. Sinus-related Cold

Definition: Cold symptoms primarily driven by sinus inflammation and blocked drainage.

Causes: Recurrent infections, allergy, structural nasal issues.

Harm: Facial pain, chronic nasal blockage, thick mucus, risk of chronic sinusitis.

E. Sinus Disorders

39. Dushta Pratishyaya (Sinusitis)

Definition: Chronic or recurrent inflammation of sinus cavities with foul or thick nasal discharge, headache and heaviness.

Causes: Untreated colds, chronic allergy, structural blocks, Kapha–Pitta imbalance.

Harm: Persistent pain, bad breath, reduced smell, risk of spread to ears or brain.

40. Maxillary Sinus Swelling

Definition: Inflammation and fluid build-up in cheek (maxillary) sinuses.

Causes: Dental infections, colds, allergy.

Harm: Cheek pain, upper jaw/tooth pain, chronic sinusitis.

41. Frontal Sinus Swelling

Definition: Infection or inflammation in frontal sinuses above eyebrows.

Causes: Cold, allergy, blocked drainage.

Harm: Forehead pain, pressure, risk of serious complications if infection spreads.

42. Ethmoid Sinus Irritation

Definition: Inflammation of ethmoid air cells between the eyes.

Causes: Recurrent colds/allergy.

Harm: Pain around eyes, pressure, possible orbital complications.

43. Nasal Polyps

Definition: Soft, benign, painless growths in nasal passages or sinuses due to chronic inflammation.

Causes: Long-standing allergy, asthma, aspirin sensitivity, chronic sinusitis.

Harm: Nasal blockage, snoring, poor smell, mouth breathing.

44. Nasal Blockage

Definition: Reduced airflow through one or both nostrils.

Causes: Allergy, infection, polyps, deviated septum, turbinate swelling.

Harm: Mouth breathing, poor sleep, headaches, reduced exercise tolerance.

45. Nose Dryness

Definition: Lack of moisture in nasal passages, causing crusting and discomfort.

Causes: Dry climate, AC, decongestant overuse, Vata aggravation.

Harm: Cracks, nosebleeds, irritation, infection risk.

46. Nasal Discharge (Various Types)

Definition: Fluid coming from the nose, ranging from clear and thin to thick, colored or foul-smelling.

Causes: Colds, allergy, sinusitis, CSF leak (rare), irritants.

Harm: Blockage, skin irritation, indicates infection or allergy state.

F. Throat Disorders (Kantha Rogas)

47. Kanthagata Roga (Throat Diseases – General)

Definition: Group of conditions affecting pharynx, tonsils, larynx, and surrounding tissues causing pain, difficulty swallowing or speaking.

Causes: Infections, voice overuse, smoking, reflux, allergens.

Harm: Pain, voice change, swallowing problems, may hint at serious disease.

48. Tonsillitis

Definition: Inflammation of tonsils, often with sore throat, fever and difficulty swallowing.

Causes: Viral or bacterial infections (e.g., strep).

Harm: Abscess formation, ear pain, airway compromise (rare), rheumatic fever risk (if strep untreated).

49. Pharyngitis

Definition: Inflammation of the throat (pharynx) causing soreness, pain and irritation.

Causes: Viral infections, bacteria, irritants (smoke, pollution).

Harm: Pain, difficulty eating, progression to tonsillitis or sinusitis.

50. Laryngitis

Definition: Inflammation of the voice box (larynx) leading to hoarseness or loss of voice.

Causes: Viral infection, shouting, smoking, reflux, dust.

Harm: Voice loss, chronic strain, possible nodules if recurrent.

51. Hoarseness (Swarabheda)

Definition: Change in voice quality—rough, breathy, or weak.

Causes: Laryngitis, vocal strain, smoking,

nodules, nerve palsy.

Harm: Communication difficulty, may signal underlying tumor or nerve damage.

52. Voice Loss

Definition: Inability to produce sound or only whisper due to laryngeal issues.

Causes: Severe laryngitis, vocal cord paralysis, trauma, psychological causes.

Harm: Social and professional disability, may be sign of serious disease.

53. Dry Throat

Definition: Uncomfortable dryness in throat, often with scratchy feeling.

Causes: Dehydration, mouth breathing, AC, Vata aggravation, medications.

Harm: Cough, soreness, predisposition to infections.

54. Burning Throat

Definition: Heat or burning sensation in throat, sometimes with pain.

Causes: Acid reflux, Pitta aggravation, spicy foods, infections.

Harm: Chronic irritation, risk of erosions, cough.

55. Sore Throat

Definition: Pain or discomfort in throat, especially when swallowing.

Causes: Viral/bacterial infection, allergy, dryness, strain.

Harm: Difficulty eating, fever, may lead to ear problems or abscess.

56. Foreign Body Sensation

Definition: Feeling that something is stuck in throat though nothing is found.

Causes: Reflux, anxiety, muscle tension, minor inflammation.

Harm: Constant discomfort, worry, sometimes affects eating.

57. Kapha Accumulation in Throat

Definition: Sensation of mucus stuck in throat requiring frequent clearing.

Causes: Postnasal drip, reflux, Kapha excess, allergies.

Harm: Chronic throat clearing, irritation, predisposition to laryngitis.

G. Lung Disorders

58. Shwasa Roga (Combined Lung Abnormalities)

Definition: Broad term for diseases causing disordered breathing and lung function.

Causes: Asthma, COPD, infections, fibrosis, heart failure.

Harm: Breathlessness, fatigue, low oxygen, multi-organ strain.

59. Kasa Roga Chronic Lung Involvement

Definition: Long-standing cough disorder leading to structural and functional lung changes.

Causes: Untreated chronic cough, TB-like illness, smoking.

Harm: Bronchiectasis, fibrosis, respiratory failure.

60. Lung Fibrosis (Kshayaja Changes)

Definition: Thickening and scarring of lung tissue causing stiff lungs and permanent breathing difficulty.

Causes: Chronic inflammation, TB, toxins, autoimmune diseases.

Harm: Progressive breathlessness, low oxygen, heart strain, poor prognosis.

61. COPD-like Condition

Definition: Chronic airflow limitation with poor reversibility, combining chronic bronchitis and emphysema traits.

Causes: Long-term smoking, biomass fuel exposure, pollution.

Harm: Chronic breathlessness, frequent exacerbations, heart and muscle weakness.

62. Emphysema-like

Definition: Destruction of lung air sacs (alveoli) causing enlarged air spaces and poor gas exchange.

Causes: Smoking, alpha-1 antitrypsin deficiency,

pollution.

Harm: Severe breathlessness, barrel chest, low oxygen and CO₂ retention.

63. Bronchitis (Vata/Kapha Type)

Definition: Inflammation of bronchial tubes, acute or chronic, with cough and sputum.

Causes: Infection, smoking, cold air, irritants, Kapha–Vata imbalance.

Harm: Recurrent infections, airway damage, progression to COPD.

64. Chronic Bronchitis

Definition: Chronic productive cough for months over at least two years, due to airway inflammation and mucus.

Causes: Smoking, pollution, occupational exposure.

Harm: Frequent infections, breathlessness, COPD.

65. Pneumonia-like

Definition: Infection of lung tissue with consolidation and inflammation.

Causes: Bacteria, viruses, fungi; aspiration.

Harm: Fever, breathlessness, chest pain, sepsis risk.

66. Fluid in Lungs (Pleura Shotha / Effusion)

Definition: Abnormal fluid build-up between lung and chest wall (pleural space).

Causes: Heart failure, infections, cancer, TB.

Harm: Breathlessness, chest pain, reduced lung expansion.

67. Lung Congestion

Definition: Overfilling of lung vessels and tissues with fluid or blood.

Causes: Heart failure, infection, inflammation.

Harm: Breathlessness, cough, risk of pulmonary edema.

68. Lung Infection Toxins (Krimija Shwasa)

Definition: Respiratory distress produced by toxins from microbes or parasites within the lungs.

Causes: Severe infections, worm infestation, poor immunity.

Harm: Fever, toxicity, sepsis, chronic lung damage.

H. Upper Respiratory Infections

69. Jwara-related Cold

Definition: Cold symptoms occurring as part of a febrile illness (fever).

Causes: Viral infections, early flu, systemic infections.

Harm: Weakness, dehydration, risk of spreading to lungs or ears.

70. Viral Infection

Definition: Infection of respiratory tract by viruses (e.g., rhinovirus, influenza).

Causes: Airborne droplets, close contact, weak immunity.

Harm: Cold, flu, bronchitis, rarely pneumonia and severe complications.

71. Bacterial Throat Infection

Definition: Infection of throat by bacteria, often causing severe sore throat and fever.

Causes: Streptococcus and others, spread by droplets.

Harm: Abscess, rheumatic fever, kidney inflammation if untreated.

72. Fungal Throat Infection

Definition: Overgrowth of fungi (usually Candida) in mouth/throat.

Causes: Antibiotics, steroids, diabetes, immunosuppression.

Harm: Pain, difficulty swallowing, spread into esophagus.

73. Whooping Cough-like

Definition: Prolonged cough illness with severe spasms and “whoop” sound on inhalation.

Causes: Bordetella pertussis or similar.

Harm: Rib fractures, vomiting, pneumonia, risk for infants.

74. Diphtheria-like Conditions

Definition: Throat infection forming grayish membrane, causing breathing difficulty.

Causes: *Corynebacterium diphtheriae* or similar toxins.

Harm: Airway obstruction, heart and nerve damage.

75. Swine Flu-like Infection

Definition: Influenza-like illness with fever, cough, body ache, sometimes severe pneumonia.

Causes: Influenza A strains (H1N1 etc.).

Harm: Severe lung involvement, respiratory failure in vulnerable patients.

76. COVID-like Infection Symptoms

Definition: Viral respiratory illness with fever, dry cough, breathlessness, loss of smell, etc.

Causes: Coronavirus-type infections.

Harm: Pneumonia, ARDS, blood clots, multi-organ involvement.

I. Nose Disorders (Nasa Rogas)

77. Epistaxis (Nasa Raktapitta)

Definition: Bleeding from nose due to broken small vessels in nasal lining.

Causes: Trauma, dryness, hypertension, Pitta heat, clotting problems.

Harm: Blood loss, anxiety, may indicate serious disease if recurrent.

78. Nasapaka (Infection)

Definition: Inflammatory, possibly pus-forming infection of nasal mucosa or surrounding tissue.

Causes: Bacterial or viral invasion, nose picking, trauma.

Harm: Pain, swelling, progression to sinusitis or cellulitis.

79. Nasasrava (Runny Nose)

Definition: Excess nasal discharge of various types.

Causes: Viral cold, allergy, irritants, tear–nasal drainage.

Harm: Irritation, skin soreness, sleep disturbance.

80. Nasagata Shotha (Nasal Swelling)

Definition: Swelling of nasal mucosa or outer nose tissues.

Causes: Allergy, infection, trauma, insect bite.

Harm: Blocked airflow, pain, predisposition to sinusitis.

81. Room Dryness–Induced Nose Issues

Definition: Nasal irritation, crusting and dryness due to low humidity indoors.

Causes: AC, heaters, poor ventilation.

Harm: Nosebleeds, discomfort, higher infection risk.

82. Deviated Nasal Septum Symptoms

Definition: Symptoms from a bent or off-center nasal septum.

Causes: Congenital, trauma.

Harm: Chronic blockage, sinusitis, snoring.

83. Hyposmia (Reduced Smell)

Definition: Decreased ability to detect odors.

Causes: Cold, sinusitis, polyps, viral damage, neurological disease.

Harm: Reduced taste, safety risks, quality-of-life impact.

84. Nasal Obstruction (Vata/Kapha Type)

Definition: Difficulty inhaling through nose due to structural or mucosal issues with doshic dominance.

Causes: Swelling, dryness, polyps, deviated septum, Kapha congestion.

Harm: Mouth breathing, snoring, sleep and exercise impairment.

J. Allergy & Immune Reactions (Ayurvedic View)

85. Vata Allergy Response

Definition: Allergy pattern dominated by dryness, spasmodic cough, variable symptoms and anxiety.

Causes: Dry wind, stress, irregular lifestyle.

Harm: Bronchospasm, insomnia, chronic Vata aggravation.

86. Pitta Allergy Response

Definition: Allergy with redness, burning, heat, feverish sensations and irritability.

Causes: Hot climate, spicy foods, infections.

Harm: Inflammation of nose, sinuses and eyes, risk of nosebleeds.

87. Kapha Allergy Response

Definition: Allergy pattern with heavy mucus, swelling, sluggishness and congestion.

Causes: Cold/damp exposure, Kapha-increasing diet, sedentary habits.

Harm: Chronic sinusitis, asthma, repeated colds.

88. Food-induced Respiratory Allergy

Definition: Respiratory symptoms triggered by specific foods.

Causes: Milk, eggs, nuts, seafood, etc.; immune hypersensitivity.

Harm: Wheezing, rhinitis, possible anaphylaxis.

89. Skin–Respiratory Allergy Connection

Definition: Link between skin allergies (eczema/urticaria) and respiratory issues like asthma or rhinitis.

Causes: Atopic constitution, shared immune pathways.

Harm: Multi-organ allergy burden, chronic inflammation.

90. Environmental Allergy

Definition: Respiratory reactions to ongoing environmental exposures.

Causes: Pollution, smoke, chemicals, occupational irritants.

Harm: Chronic cough, asthma, sinusitis, lung damage.

91. Kapha Buildup Allergy

Definition: Allergy type where Kapha accumulation blocks airways and sinuses.

Causes: Heavy foods, cold drinks, dairy, lack of exercise.

Harm: Persistent congestion, breathlessness, infections.

92. Pitta Heat Nasal Irritation

Definition: Nasal burning, redness and irritation due to excess heat.

Causes: Pitta aggravation, hot foods, infections, dry hot air.

Harm: Nosebleeds, chronic inflammation, discomfort.

93. Vata Dry Nasal Allergy

Definition: Nasal itching, dryness and frequent sneezing under Vata influence.

Causes: Dry, cold air, dust, excessive AC/fans.

Harm: Cracks, irritation, predisposition to infection.

K. Chest Disorders

94. Uras Shoola (Chest Pain)

Definition: Pain or discomfort felt in chest region, muscular or internal.

Causes: Musculoskeletal strain, heart disease, lung disease, reflux.

Harm: May indicate heart attack or serious lung problem; needs evaluation.

95. Kapha in Chest

Definition: Sensation and presence of thick mucus congesting the chest.

Causes: Cold, infection, heavy foods, Kapha imbalance.

Harm: Cough, breathlessness, recurrent bronchitis.

96. Pleurisy (Pleura Shotha)

Definition: Inflammation of the lining around lungs and chest wall causing sharp pain with breathing.

Causes: Infections, autoimmune diseases, trauma.

Harm: Severe pain, shallow breathing, fluid accumulation.

97. Rib Pain from Vata

Definition: Sharp, shifting pain along ribs due to Vata affecting intercostal muscles/nerves.

Causes: Overexertion, cold, strain, Vata aggravation.

Harm: Painful breathing, restricted movements.

98. Muscular Chest Pain

Definition: Pain originating from chest muscles rather than heart or lungs.

Causes: Overuse, strain, coughing fits, poor posture.

Harm: Anxiety (fear of heart disease), movement limitation.

99. Breast Region Congestion

Definition: Feeling of heaviness or fullness in chest/breast area.

Causes: Kapha accumulation, premenstrual changes, infections, heart issues.

Harm: Pain, tenderness, possible sign of underlying hormonal or cardiac issue.

100. Hiccup (Hikka Rogas) Affecting Chest

Definition: Repeated involuntary contractions of diaphragm causing sudden “hic” sound.

Causes: Overeating, carbonated drinks, gastric irritation, Vata disturbance.

Harm: Usually benign; prolonged hiccups can cause exhaustion and indicate deeper disease.

101. Vata-induced Hiccup

Definition: Fast, frequent, dry hiccups dominated by Vata.

Causes: Fasting, gas, anxiety, dry food.

Harm: Chest discomfort, fatigue, Vata aggravation.

102. Kapha-induced Hiccup

Definition: Heavier, slower hiccups with mucus or fullness sensation.

Causes: Overeating, heavy/oily food, Kapha buildup.

Harm: Nausea, bloating, chest heaviness.

103. Pittaja Hiccup

Definition: Hiccups with burning or heat in chest or throat.

Causes: Spicy foods, alcohol, Pitta flares, acidity.

Harm: Chest discomfort, reflux worsening.

L. Respiratory System Weakness

104. Low Lung Capacity

Definition: Reduced ability of lungs to expand and hold air.

Causes: Sedentary lifestyle, obesity, chronic lung disease, scoliosis.

Harm: Early breathlessness, low stamina, higher disease risk.

105. Weak Prana Vayu

Definition: Ayurvedic concept of weakened vital life-force governing breath and heart.

Causes: Chronic stress, poor diet, lack of exercise, grief.

Harm: Fatigue, shallow breathing, anxiety, low resilience.

106. Shwasa Krichra (Difficulty in Breathing)

Definition: General term for labored, uncomfortable breathing.

Causes: Asthma, heart disease, anemia, anxiety, obesity.

Harm: Panic, decreased activity, risk of respiratory emergency.

107. Breathlessness on Exertion

Definition: Shortness of breath occurring disproportionately with physical effort.

Causes: Heart disease, lung disease, anemia, deconditioning.

Harm: Limits work and exercise; may indicate serious underlying issue.

108. Stress-induced Breathing Problems

Definition: Breathing irregularities triggered or worsened by psychological stress.

Causes: Anxiety, panic attacks, hyperventilation, chronic stress.

Harm: Chest tightness, dizziness, fear, perpetuating anxiety cycle.

109. Anxiety-induced Breathlessness

Definition: Feeling unable to get enough air during anxiety episodes, even with normal lungs.

Causes: Panic disorder, generalized anxiety.

Harm: Distress, avoidance of activity, misdiagnosis as purely physical.

110. Kapha Obstruction in Lungs

Definition: Mucus-filled bronchi and alveoli reducing airflow.

Causes: Chronic cough, infections, Kapha-dominant diet/lifestyle.

Harm: Persistent congestion, recurrent bronchitis, poor oxygenation.

111. Vata Dryness in Lungs

Definition: Dry airways and alveoli making breathing effortful and irritating.

Causes: Dry climate, dehydration, excessive talking, smoking, Vata imbalance.

Harm: Dry cough, irritation, susceptibility to injury or fissures.

112. Pitta Heat Inflammation in Lungs

Definition: Hot, inflamed state in lung tissues with burning chest and feverish feeling.

Causes: Pneumonia, acute infections, Pitta aggravation.

Harm: Lung damage, pleurisy, systemic inflammation.

M. Severe Pulmonary Conditions (Classical Equivalents)

113. Kshayaja Shwasa (Lung Tissue Destruction — TB-like)

Definition: Advanced breathlessness due to progressive destruction and wasting of lung tissue.

Causes: TB, chronic infections, long-term smoking, untreated lung disease.

Harm: Weight loss, chronic cough, severe dyspnea, respiratory failure.

114. Rajyakshma (Tuberculosis)

Definition: Classical TB-like disease with cough, fever, night sweats, weight loss and tissue wasting.

Causes: Mycobacterium tuberculosis infection, low immunity, malnutrition.

Harm: Lung cavities, spread to other organs, death if untreated.

115. Gala-graha (Throat Constriction)

Definition: Sensation or reality of narrowing in throat making breathing and swallowing difficult.

Causes: Infections, allergic swelling, spasm, anxiety, tumors.

Harm: Airway obstruction, panic, need for emergency care in severe cases.

116. Jwara Affecting Lungs (Lung Fever)

Definition: Fever where primary involvement is in lungs, similar to pneumonia or severe lower respiratory infection.

Causes: Bacterial/viral pneumonia, severe bronchitis.

Harm: High fever, breathlessness, chest pain, sepsis risk.

117. Advanced Asthma Stage

Definition: Stage of asthma with frequent severe attacks and permanent airway remodeling.

Causes: Long-term uncontrolled asthma, ongoing triggers, smoking.

Harm: Persistent obstruction, disability, risk of fatal status asthmaticus.

118. Chronic Obstructive Pulmonary Disorders

Definition: Group of chronic lung conditions with irreversible narrowing of airways and destruction of alveoli.

Causes: Smoking, biomass smoke, occupational dusts.

Harm: Severe breathlessness, oxygen dependence, heart strain.

119. Lung Collapse Symptoms (Vata Vitiation)

Definition: Clinical picture when part or all of lung collapses (atelectasis/pneumothorax), with sudden breathlessness and chest pain.

Causes: Trauma, air leak, obstruction, severe Vata disturbance.

Harm: Acute respiratory distress, low oxygen, potential emergency.

120. Breath Arresting Conditions (Urdhva Shwasa End-stage)

Definition: Terminal states where breathing becomes extremely shallow, irregular and may stop.

Causes: End-stage lung/heart disease, severe infections, nervous system failure.

Harm: Respiratory arrest, multi-organ shutdown, death.

A. General Nervous System Disorders

1. Vata Vyadhi (neurological disorders category)

- *Definition:* Group of disorders caused by disturbed Vata affecting nerves and movement.
- *Causes:* Irregular lifestyle, excess travel, fear, fasting, ageing, dryness.
- *Harm:* Tremors, stiffness, paralysis, nerve pain, weakness, sensory problems.

2. Vata vriddhi (excess Vata)

- *Definition:* Abnormally increased Vata dosha in the body.
- *Causes:* Dry/cold food, skipping meals, overactivity, lack of sleep, anxiety.
- *Harm:* Pain, cracking joints, insomnia, constipation, anxiety, nervous disorders.

3. Vata kshaya (low Vata / poor Vata functioning)

- *Definition:* Decreased or weakened Vata functions.
- *Causes:* Excess Kapha/Pitta, heavy/oily foods, lack of movement.
- *Harm:* Sluggish nerves, poor reflexes, reduced mobility, mental dullness.

4. Neuralgia-like pain

- *Definition:* Sharp, shooting pain along a nerve pathway.
- *Causes:* Nerve irritation, compression, diabetes, infection, trauma.
- *Harm:* Severe pain, difficulty in daily activities, sleep disturbance.

5. Nerve compression

- *Definition:* Nerve squeezed by bone, disc, muscle, or swelling.
- *Causes:* Slip disc, tight muscles, bone spurs, wrong posture.
- *Harm:* Pain, numbness, weakness, long-term nerve damage if untreated.

6. Neuropathy

- *Definition:* Damage to peripheral nerves.
- *Causes:* Diabetes, alcohol, vitamin B12 deficiency, toxins, injuries.

- *Harm:* Numbness, burning, loss of sensation, ulcers, risk of unnoticed injuries.

7. Burning nerves (Pittaja)

- *Definition:* Nerve pain with burning & heat sensation.
- *Causes:* Pitta aggravation, inflammation, toxins, infections.
- *Harm:* Burning pain, restlessness, disturbed sleep, nerve damage over time.

8. Numbness (Vataja)

- *Definition:* Loss or reduction of normal sensation in skin/limbs.
- *Causes:* Nerve compression, poor circulation, Vata imbalance, neuropathy.
- *Harm:* Increased risk of cuts, burns, falls, imbalance.

9. Tingling sensations

- *Definition:* “Pins and needles” feeling in limbs.
- *Causes:* Temporary nerve pressure, vitamin deficiency, early neuropathy.
- *Harm:* Indicates nerve stress; long-term may progress to neuropathy.

10. Nerve weakness

- *Definition:* Reduced ability of nerves to transmit signals.
- *Causes:* Chronic disease, malnutrition, Vata imbalance, toxins.
- *Harm:* Poor muscle control, weakness, delayed responses.

11. Muscle twitching

- *Definition:* Small involuntary quick muscle contractions.
- *Causes:* Electrolyte imbalance, fatigue, stress, nerve irritation.
- *Harm:* Usually mild, but may indicate nerve/muscle disorder if persistent.

12. Poor coordination

- *Definition:* Difficulty in smoothly controlling movements.
- *Causes:* Brain or cerebellar issues, neuropathy, weakness.
- *Harm:* Clumsiness, falls, difficulty walking or doing fine tasks.

13. Loss of reflexes

- *Definition:* Reduced or absent automatic tendon reflexes.
- *Causes:* Nerve damage, spinal cord disease, severe neuropathy.

- *Harm:* Indicates serious nerve/spinal issues; higher injury risk.

14. Sensory loss

- *Definition:* Partial or complete loss of touch, pain, temperature, etc.
- *Causes:* Neuropathy, spinal cord injury, brain disease.
- *Harm:* Burns, wounds, and injuries may go unnoticed; imbalance.

15. Motor weakness

- *Definition:* Reduced ability to generate muscle force.
- *Causes:* Nerve damage, muscle disease, brain or spinal cord lesions.
- *Harm:* Difficulty walking, lifting, self-care, risk of disability.

B. Brain Disorders

16. Shiroroga (head diseases)

- *Definition:* Broad group of head/brain-related diseases and pains.
- *Causes:* Vata/Pitta/Kapha imbalance, stress, toxins, trauma.
- *Harm:* Headache, confusion, poor thinking, quality-of-life reduction.

17. Vataja shirashoola (headache)

- *Definition:* Headache due to Vata dominance.
- *Causes:* Lack of sleep, stress, fasting, excessive thinking.
- *Harm:* Pricking/dull pain, insomnia, irritability.

18. Pittaja shirashoola (migraine type)

- *Definition:* Heat-related throbbing headache, often like migraine.
- *Causes:* Sun/heat exposure, spicy food, anger, alcohol.
- *Harm:* Throbbing pain, nausea, light sensitivity, vomiting.

19. Kaphaja shirashoola (sinus headache)

- *Definition:* Heavy, dull headache with congestion.
- *Causes:* Cold, damp climate, excess dairy, blocked sinuses.
- *Harm:* Heaviness, drowsiness, nasal blockage, reduced focus.

20. Suryavarta (migraine from sun)

- *Definition:* Headache that worsens with sun/heat and eases in shade.

- *Causes:* Strong sunlight, Pitta aggravation, dehydration.
- *Harm:* Severe daytime headaches, reduced outdoor tolerance.

21. Ardhavabhedaka (classic migraine)

- *Definition:* Severe one-sided splitting headache.
- *Causes:* Stress, hormonal changes, certain foods, Pitta + Vata.
- *Harm:* Disability during attacks, nausea, vision issues.

22. Anantavata (trigeminal neuralgia-like)

- *Definition:* Severe shooting facial/head nerve pain.
- *Causes:* Vata imbalance, nerve compression/irritation.
- *Harm:* Intense pain during chewing, talking, face movement.

23. Intracranial pressure increase (Vata)

- *Definition:* Raised pressure inside skull affecting brain.
- *Causes:* Tumour, bleeding, swelling, fluid retention.
- *Harm:* Headache, vomiting, blurred vision, risk of brain damage.

24. Brain inflammation (Pitta)

- *Definition:* Swelling/inflammation of brain tissue (encephalitis-like).
- *Causes:* Infections, autoimmune disease, severe fever.
- *Harm:* Seizures, confusion, coma, long-term brain damage.

25. Brain fog (Kapha)

- *Definition:* Clouded thinking and mental heaviness.
- *Causes:* Poor digestion, heavy food, lack of sleep, Kapha excess.
- *Harm:* Poor memory, slow reaction, low productivity.

26. Chronic headache disorders

- *Definition:* Headaches occurring frequently over months/years.
- *Causes:* Stress, posture, eye strain, hormonal or dosha imbalance.
- *Harm:* Constant discomfort, mood issues, reduced quality of life.

27. Tension headache

- *Definition:* Band-like pressure or tightness around the head.
- *Causes:* Muscle tension in neck/scalp, stress, screen use.
- *Harm:* Fatigue, irritability, decreased concentration.

28. Cluster headache-equivalent

- *Definition:* Very severe short attacks of one-sided head pain.
- *Causes:* Vascular changes, hypothalamic disturbance (exact unknown).
- *Harm:* Intense pain, tearing, restlessness, sleep disruption.

29. Head heaviness

- *Definition:* Feeling of a heavy, loaded head.
- *Causes:* Kapha accumulation, sinus congestion, low circulation.
- *Harm:* Laziness, low focus, drowsiness.

30. Head pressure

- *Definition:* Sense of pressure or tightness inside head.
- *Causes:* Sinus issues, tension, raised pressure, stress.
- *Harm:* Discomfort, anxiety, concern about serious illness.

31. Memory confusion

- *Definition:* Difficulty recalling or organizing thoughts.
- *Causes:* Ageing, stress, toxins, sleep loss, brain disease.
- *Harm:* Poor decisions, forgetfulness, safety issues.

C. Mental / Emotional Disorders (Manas Vikara)

32. Chittodvega (anxiety-like)

- *Definition:* Restless, worried, unstable mind.
- *Causes:* Vata aggravation, stress, overthinking, trauma.
- *Harm:* Palpitations, insomnia, digestive upset, exhaustion.

33. Udvega (panic-like)

- *Definition:* Sudden intense fear or panic episodes.
- *Causes:* Shock, past trauma, chronic stress.
- *Harm:* Breathlessness, chest tightness, fear of dying.

34. Chinta (overthinking)

- *Definition:* Excessive, repetitive worrying thoughts.
- *Causes:* Constant mental load, insecurity, Vata imbalance.

- *Harm:* Insomnia, headaches, anxiety, depression risk.

35. Bhaya (fear disorders)

- *Definition:* Persistent or irrational fears.
- *Causes:* Past experiences, conditioning, Vata disturbance.
- *Harm:* Avoidance behaviour, social withdrawal, stress.

36. Shoka (grief disorders)

- *Definition:* Intense sadness from loss that does not resolve.
- *Causes:* Death, separation, big disappointments.
- *Harm:* Low immunity, fatigue, depression, heart strain.

37. Krodha (anger disorders)

- *Definition:* Excessive, uncontrolled anger and irritability.
- *Causes:* Pitta aggravation, frustration, ego conflict.
- *Harm:* Hypertension, headaches, damaged relationships.

38. Moha (confusion, delusion)

- *Definition:* Wrong understanding, illusion, mental cloud.
- *Causes:* Ignorance, attachment, mental imbalance.
- *Harm:* Poor choices, addictions, self-harming patterns.

39. Mada (intoxication)

- *Definition:* Mental clouding by intoxication or ego pride.
- *Causes:* Alcohol, drugs, excessive success/ego.
- *Harm:* Liver damage, accidents, broken relationships.

40. Harsha (mania-like)

- *Definition:* Excessive excitement, overactive joy, hyper mood.
- *Causes:* Vata–Pitta imbalance, mental instability.
- *Harm:* Risky decisions, lack of sleep, burnout.

41. Irsha (jealousy imbalance)

- *Definition:* Strong envy and comparison with others.
- *Causes:* Low self-worth, competition mindset.
- *Harm:* Constant stress, bitterness, social conflict.

42. Lobha imbalance (greed-driven stress)

- *Definition:* Excess desire, never feeling satisfied.

- *Causes:* Attachment to wealth/power, insecurity.
- *Harm:* Work addiction, anxiety, loss of peace.

43. **Mana-dosha (mind defect/imbalance)**

- *Definition:* General disturbance of healthy mind functions.
- *Causes:* Long-term stress, dosha imbalance, negative habits.
- *Harm:* Emotional instability, mental illness tendency.

44. **Manovaha srotas dushti**

- *Definition:* Impairment of mental channels (mind pathways).
- *Causes:* Trauma, chronic stress, wrong lifestyle.
- *Harm:* Anxiety, depression, disturbed behaviour.

45. **Stress-induced disorders**

- *Definition:* Physical and mental issues caused by chronic stress.
- *Causes:* Overwork, emotional strain, lack of rest.
- *Harm:* Hypertension, ulcers, sleep disorders, heart risk.

46. **Depression-like (Vishada)**

- *Definition:* Persistent low mood and loss of interest.
- *Causes:* Loss, low serotonin, Kapha stagnation, Vata disturbance.
- *Harm:* Suicidal thoughts (in severe cases), fatigue, low immunity.

47. **OCD-like tendencies (Vata)**

- *Definition:* Repeated thoughts and compulsive actions.
- *Causes:* Anxiety, fear, Vata aggravation.
- *Harm:* Time loss, distress, interference with daily life.

- *Definition:* Light, broken sleep with racing thoughts.
- *Causes:* Anxiety, fear, travel, irregular routine.
- *Harm:* Nervous exhaustion, headaches, low focus.

50. **Pittaja insomnia**

- *Definition:* Waking due to heat, anger, or vivid dreams.
- *Causes:* Spicy food, late nights, hot environment.
- *Harm:* Irritability, acidity, liver strain.

51. **Kaphaja sleep excess**

- *Definition:* Oversleeping, heaviness, and laziness.
- *Causes:* Overeating, lack of exercise, Kapha accumulation.
- *Harm:* Obesity, diabetes risk, lethargy.

52. **Disturbed sleep**

- *Definition:* Frequent awakenings or non-refreshing sleep.
- *Causes:* Stress, noise, physical discomfort, dreams.
- *Harm:* Daytime sleepiness, mood fluctuation.

53. **Nightmares**

- *Definition:* Frightening dreams causing fear and awakening.
- *Causes:* Trauma, anxiety, heavy/night foods.
- *Harm:* Night panic, fear of sleeping, poor rest.

54. **Fear dreams**

- *Definition:* Dreams dominated by fear, chase, danger.
- *Causes:* Bhaya (fear), insecurity, Vata aggravation.
- *Harm:* Increased anxiety, disturbed mind.

55. **Excessive dreams**

- *Definition:* Too much dreaming, light sleep, always dreaming.
- *Causes:* Vata imbalance, mental agitation.
- *Harm:* Non-restorative sleep, fatigue.

56. **Sleep paralysis-like**

- *Definition:* Temporarily unable to move when falling asleep or waking.
- *Causes:* Irregular sleep, stress, sleep deprivation.

D. Sleep Disorders (Nidra / Anidra)

48. **Anidra (insomnia)**

- *Definition:* Difficulty falling or staying asleep.
- *Causes:* Stress, screens at night, stimulants, Vata disturbance.
- *Harm:* Fatigue, poor memory, irritability, hormone imbalance.

49. **Vataja insomnia**

- **Harm:** Intense fear, anxiety about sleep.

57. Day-time sleepiness

- **Definition:** Feeling sleepy throughout the day.
- **Causes:** Poor night sleep, heavy meals, sleep disorders.
- **Harm:** Low productivity, accident risk.

58. Chronic fatigue from sleep issue

- **Definition:** Long-term tiredness due to poor sleep quality.
- **Causes:** Any long-standing sleep disorder.
- **Harm:** Hormone imbalance, mood problems, weak immunity.

- **Causes:** Heavy food, obesity, Ama (toxins).
- **Harm:** Slow recovery post-seizure.

63. Sannipata Apasmara

- **Definition:** Severe seizures involving all doshas.
- **Causes:** Chronic disease, widespread toxins.
- **Harm:** Hard to treat, high risk of brain damage.

64. Murchha (Fainting)

- **Definition:** Short loss of consciousness due to low brain blood flow.
- **Causes:** Low BP, dehydration, emotional shock.
- **Harm:** Fall injury, dizziness, accidents.

65. Coma-like unconsciousness

- **Definition:** Deep loss of awareness for long time.
- **Causes:** Stroke, head injury, metabolic failure.
- **Harm:** Brain death risk.

66. Loss of awareness episodes

- **Definition:** Short blank spells / absence seizures.
- **Causes:** Electrical brain disturbance, stress.
- **Harm:** Learning difficulty, memory gaps.

67. Emotional-trigger seizures

- **Definition:** Seizures triggered by strong emotions.
- **Causes:** Trauma, intense stress, fear.
- **Harm:** Mental health deterioration.

68. Fever-trigger seizures (Febrile)

- **Definition:** Seizures during high fever, common in children.
- **Causes:** Infections elevating brain temperature.
- **Harm:** Risk of future epilepsy.

E. Seizure & Consciousness Disorders

59. Apasmara (Epilepsy)

- **Definition:** Repeated episodes of convulsions with loss of consciousness.
- **Causes:** Brain electrical disturbance, high fever, toxins, trauma, hereditary factors.
- **Harm:** Falls/injuries, memory decline, difficulty learning, social issues.

60. Vataja Apasmara

- **Definition:** Seizures with jerky movements and fear.
- **Causes:** Vata imbalance, anxiety, irregular food/sleep.
- **Harm:** Weakness, confusion after episodes.

61. Pittaja Apasmara

- **Definition:** Seizures with heat and anger signs.
- **Causes:** Fever, dehydration, infections.
- **Harm:** Brain inflammation risk.

62. Kaphaja Apasmara

- **Definition:** Seizures with mucus, heaviness and drowsiness.

F. Paralysis Disorders (Pakshaghata Group)

69. Pakshaghata (Hemiplegia)

- **Definition:** Paralysis of one side of body.
- **Causes:** Stroke, brain clot, Vata obstruction.
- **Harm:** Speech loss, permanent disability if no rehab.

70. Ardita (Facial palsy / Bell's palsy type)

- **Definition:** One-side facial paralysis.
- **Causes:** Facial nerve inflammation, cold exposure.
- **Harm:** Eye drying, difficulty eating/speaking.

71. Ekanga Roga

- **Definition:** Paralysis/weakness of one limb.
- **Causes:** Nerve injury, stroke.
- **Harm:** Limited mobility, muscle wasting.

72. Sarvanga Vata

- **Definition:** Total body paralysis.
- **Causes:** Severe Vata imbalance, spinal cord injury.
- **Harm:** Full dependency on caregivers.

73. Urustambha

- **Definition:** Thigh muscle stiffness and loss of movement.
- **Causes:** Excess exercise with poor digestion → toxins affecting muscles.
- **Harm:** Inability to walk properly.

74. Janustambha

- **Definition:** Knee stiffness with pain.
- **Causes:** Ageing, injury, toxins.
- **Harm:** Difficulty squatting and climbing stairs.

75. Brachial plexus weakness

- **Definition:** Weakness in shoulder–arm nerve network.
- **Causes:** Trauma, childbirth injury (in kids).

- **Harm:** Arm paralysis if severe.

76. Stroke-equivalent (Vata trapped in channels)

- **Definition:** Brain blood flow blocked → sudden paralysis.
- **Causes:** Clots, hypertension.
- **Harm:** Brain cell death.

77. Post-stroke nerve damage

- **Definition:** Lingering weakness after stroke.
- **Causes:** Poor nerve regeneration.
- **Harm:** Permanent disability risk.

78. Motor neuron weakness

- **Definition:** Progressive damage to nerve cells controlling muscles.
- **Causes:** Degenerative diseases.
- **Harm:** Fatal respiratory failure in advanced stages.

G. Tremors & Movement Disorders

79. Kampavata (Parkinson-like tremors)

- **Definition:** Shaking movements when resting.
- **Causes:** Degeneration of dopamine nerves.
- **Harm:** Difficulty writing, eating, balance issues.

G. Tremors & Movement Disorders

81. Head Tremor

- **Definition:** Involuntary shaking of the head due to unstable nerve-muscle control.
 - **Causes:** Essential tremor, neurological degeneration, Vata imbalance.
 - **Harm:** Communication difficulty, neck fatigue, social embarrassment.
-

82. Leg Tremor

- **Definition:** Shaking in one or both legs, especially when standing.
 - **Causes:** Postural tremor, Parkinson-like disorders, neuropathy.
 - **Harm:** Difficulty walking → high fall risk.
-

83. Involuntary Jerks (Myoclonus-like)

- **Definition:** Sudden shock-like muscle contractions.
 - **Causes:** Epilepsy, metabolic imbalance, nerve irritation.
 - **Harm:** Sleep disruption, risk of injury during jerks.
-

84. Restless Legs

- **Definition:** Strong urge to move legs, worse at night.
 - **Causes:** Low iron, nerve dysfunction, stress.
 - **Harm:** Chronic insomnia, low productivity, anxiety.
-

85. Nervous Agitation

- **Definition:** Constant need to move or fidget, inability to stay still.
 - **Causes:** Anxiety, high Vata, stimulant use.
 - **Harm:** Exhaustion, difficulty focusing, irritability.
-

86. Muscle Spasm

- **Definition:** Sudden involuntary tight contraction of a muscle.
 - **Causes:** Electrolyte deficiency, dehydration, nerve irritation.
 - **Harm:** Severe pain, limited movement, falls.
-

87. Cramps

- **Definition:** Sustained muscle tightening causing strong pain.
 - **Causes:** Overuse, mineral deficiency, poor circulation.
 - **Harm:** Difficulty in walking or using limb, sleep disturbance.
-

88. Stiffness

- **Definition:** Reduced elasticity & flexibility of muscles/joints.
 - **Causes:** Vata dryness, ageing, cold exposure, immobility.
 - **Harm:** Restricted movement → joint deformity long-term.
-

89. Dystonia-like Disorder

- **Definition:** Abnormal muscle contractions causing twisted posture.
 - **Causes:** Motor control dysfunction in brain (basal ganglia).
 - **Harm:** Permanent posture problems if untreated.
-

90. Postural Instability

- **Definition:** Loss of balance & upright control of body posture.
 - **Causes:** Parkinson-like disease, cerebellum issues, neuropathy.
 - **Harm:** Frequent falls → fractures & disability.
-

H. Memory & Cognitive Disorders

91. Smriti bhramsha (Memory Loss)

- **Definition:** Gradual loss of previously learned memories.
- **Causes:** Brain degeneration, stress, ageing, poor circulation.
- **Harm:** Forgetting family, routine tasks, safety risks.

92. Smriti hani (Amnesia-like)

- **Definition:** Sudden inability to recall important past memories.
- **Causes:** Trauma, seizures, stroke, psychological shock.
- **Harm:** Identity confusion, inability to function normally.

93. Low Concentration

- **Definition:** Trouble maintaining focus on tasks.
- **Causes:** Anxiety, screen-addiction, ADHD-like patterns.
- **Harm:** Poor academic/work performance.

94. ADHD-like Attention Issues

- **Definition:** Hyperactivity + inability to sit still + low focus.
- **Causes:** Dopamine imbalance, genetics, Vata aggravation.
- **Harm:** Social/education difficulties.

95. Slow Learning

- **Definition:** Takes longer to understand new information.
- **Causes:** Developmental delays, nutrient deficiency.
- **Harm:** Delayed education milestones.

96. Early Dementia-like

- **Definition:** Memory decline + behavioral changes before old age.
 - **Causes:** Neurodegeneration, toxins, stress.
 - **Harm:** Loss of independence, personality changes.
-

97. Brain Aging

- **Definition:** Decline in brain function due to natural aging.
 - **Causes:** Vata increase, reduced blood flow, oxidative stress.
 - **Harm:** Slow response, forgetfulness.
-

98. Forgetfulness

- **Definition:** Failing to recall recent information often.
 - **Causes:** Lack of sleep, stress, nutrient deficiency.
 - **Harm:** Reduced productivity.
-

99. Confusion

- **Definition:** Inability to think clearly or understand surroundings.
 - **Causes:** Fever, dehydration, toxins, brain disorders.
 - **Harm:** Dangerous decisions, falls.
-

100. Decision Problems

- **Definition:** Difficulty making choices or evaluating outcomes.
 - **Causes:** Anxiety, depression, cognitive impairment.
 - **Harm:** Dependence on others, poor life outcomes.
-

101. Lack of Clarity

- **Definition:** Thoughts feel cloudy and unclear.
 - **Causes:** Kapha excess, low metabolism, poor sleep.
 - **Harm:** Poor efficiency, mistakes.
-

102. Cognitive Fatigue

- **Definition:** Brain feels tired after mental work.

- **Causes:** Overthinking, screen time, chronic illness.
 - **Harm:** Burnout, stress, concentration drop.
-

- **Harm:** Reduced mobility and daily functioning.
-

I. Eye–Brain Coordination Disorders

103. Nystagmus-like

- **Definition:** Involuntary rapid eye movement.
 - **Causes:** Brainstem/cerebellar dysfunction.
 - **Harm:** Blurred vision, dizziness.
-

104. Eye Motor Nerve Weakness

- **Definition:** Weak muscles moving the eyes.
 - **Causes:** Cranial nerve palsy, diabetes.
 - **Harm:** Double vision, headache.
-

105. Visual Coordination Impairment

- **Definition:** Eyes and brain do not synchronize properly.
 - **Causes:** Brain trauma, migraines.
 - **Harm:** Motion sickness, reading difficulty.
-

106. Brain-induced Blurred Vision

- **Definition:** Visual clarity reduced due to nerve pathway damage.
 - **Causes:** Stroke, optic nerve inflammation.
 - **Harm:** Accidents due to poor sight.
-

J. Spinal Cord & Back Disorders

107. Tridoshaja Spinal Pain

- **Definition:** Back pain caused by any dosha imbalance.
- **Causes:** Injury, stress, poor posture.

108. Cervical Spondylitis

- **Definition:** Degeneration of neck bones and discs.
 - **Causes:** Age, screen posture, stress.
 - **Harm:** Arm pain, numbness, grip weakness.
-

109. Thoracic Pain

- **Definition:** Mid-back nerve or muscle pain.
 - **Causes:** Poor posture, coughing strain, trauma.
 - **Harm:** Breathing difficulty.
-

110. Lumbar Spondylitis

- **Definition:** Lower spine degeneration.
 - **Causes:** Heavy lifting, obesity, ageing.
 - **Harm:** Chronic back pain, sciatica.
-

111. Sciatica (Gridhrasi)

- **Definition:** Nerve compression causing leg pain from back.
 - **Causes:** Herniated disc, muscle tightness.
 - **Harm:** Difficulty walking, risk of nerve death if untreated.
-

112. Scoliosis-like (Spine curve)

- **Definition:** Abnormal lateral curvature of spine.
 - **Causes:** Congenital or muscle imbalance.
 - **Harm:** Breathing issues, posture deformity.
-

113. Spinal Stiffness

- **Definition:** Reduced flexibility in spine movement.
 - **Causes:** Arthritis, Vata dryness, poor posture.
 - **Harm:** Mobility reduces → risk of injury.
-

114. Herniated Disc Symptoms

- **Definition:** Disc slips and compresses nerve roots.
 - **Causes:** Heavy lifting, sudden twisting.
 - **Harm:** Severe radiating pain → nerve damage.
-

115. Nerve Root Pressure

- **Definition:** Pinched nerve at spinal exit point.
 - **Causes:** Disc bulge, bone spur.
 - **Harm:** Weak limbs, sensory loss.
-

116. Back Weakness

- **Definition:** Inability of back muscles to support spine.
 - **Causes:** Lack of exercise, nerve injury.
 - **Harm:** Frequent injuries, chronic pain.
-

K. Nerve Pain Disorders

117. Greevashool (Neck pain)

- **Definition:** Nerve and muscle pain radiating from neck.
 - **Causes:** Spondylitis, posture strain.
 - **Harm:** Headache, reduced shoulder movement.
-

118. Bhujashool (Arm nerve pain)

- **Definition:** Pain along arm nerve pathways.

- **Causes:** Cervical nerve compression.
 - **Harm:** Weak grip, numb fingers.
-

119. Kati Shool (Lower back nerve pain)

- **Definition:** Pain from lumbar nerves to hips.
 - **Causes:** Disc issue, muscle tension.
 - **Harm:** Bending and walking difficulty.
-

120. Jangha Shool (Thigh nerve pain)

- **Definition:** Sharp or aching pain in thigh region.
 - **Causes:** Sciatica, nerve irritation.
 - **Harm:** Reduced mobility.
-

121. Pada Shool (Foot nerve pain)

- **Definition:** Pain or burning in feet.
 - **Causes:** Neuropathy, spinal compression.
 - **Harm:** Walking difficulty.
-

122. Trigeminal Neuralgia

- **Definition:** Severe facial nerve pain like electric shocks.
 - **Causes:** Nerve compression, MS-like demyelination.
 - **Harm:** Eating and talking difficulty, extreme suffering.
-

123. Occipital Neuralgia

- **Definition:** Sharp pain at back of head.
 - **Causes:** Neck nerve irritation, posture strain.
 - **Harm:** Head movement limitation.
-

124. Intercostal Neuralgia

- **Definition:** Nerve pain along ribs.
- **Causes:** Shingles, rib injury.

- **Harm:** Breathing pain, fear of deep breath.

125. Neuropathic Burning

- **Definition:** Burning sensation due to nerve damage.
- **Causes:** Diabetes, alcohol, toxins.
- **Harm:** Ulcers, insomnia.

126. Shooting Nerve Pain

- **Definition:** Sudden radiating electric-like pain.
- **Causes:** Pinched nerve, disc issues.
- **Harm:** Mobility loss if untreated.

L. Balance & Ear-Related Neurological Disorders

127. Vertigo (Bhrama)

- **Definition:** Feeling that the surroundings are spinning.
- **Causes:** Inner ear disorder, brain coordination issue.
- **Harm:** Frequent falls, nausea, fear of moving.

128. Tinnitus (Karnanada)

- **Definition:** Constant ringing or buzzing in ears.
- **Causes:** Noise trauma, nerve degeneration.
- **Harm:** Sleep disturbance, anxiety.

129. Ear Fullness (Karna Kleda)

- **Definition:** Pressure or blocked sensation in ear.
- **Causes:** Mucus, Eustachian tube dysfunction.
- **Harm:** Temporary hearing loss.

130. Hearing Loss (Karna Badhirya)

- **Definition:** Reduced or lost ability to hear.
- **Causes:** Aging, nerve damage, infections.
- **Harm:** Social isolation, depression.

131. Vataja Ear Pain

- **Definition:** Sharp, dry nerve pain in ear.
- **Causes:** Cold exposure, dryness.
- **Harm:** Hearing sensitivity.

132. Pittaja Ear Burning

- **Definition:** Burning/stinging pain in ear.
- **Causes:** Infection, Pitta aggravation.
- **Harm:** Fever, pus discharge.

133. Kaphaja Ear Congestion

- **Definition:** Fullness due to mucus blocking ear canal.
- **Causes:** Cold, allergy, sinus issues.
- **Harm:** Muffled hearing.

M. Neuro-Muscular Disorders

134. Mamsa Dhatu Gata Roga

- **Definition:** Disorders affecting muscle tissue nutrition.
- **Causes:** Poor digestion, nerve damage.
- **Harm:** Muscle fatigue & stiffness.

135. Muscle Degeneration

- **Definition:** Progressive loss of muscle mass & strength.
 - **Causes:** Aging, nerve-muscle diseases.
 - **Harm:** Severe weakness, mobility loss.
-

136. Myopathy-like Disorder

- **Definition:** Muscle fibers weaken & lose function.
 - **Causes:** Genetic, metabolic disturbances.
 - **Harm:** Difficulty standing & lifting.
-

137. Muscle Fatigue

- **Definition:** Extreme tiredness even with small effort.
 - **Causes:** Anemia, chronic illness, stress.
 - **Harm:** Poor daily functioning.
-

138. Muscle Contraction (Spasticity)

- **Definition:** Constant tightness in muscles.
 - **Causes:** Brain/spinal cord damage.
 - **Harm:** Joint deformities.
-

139. Loss of Muscle Tone

- **Definition:** Muscles lose firmness and strength.
 - **Causes:** Disuse, nerve damage.
 - **Harm:** Weak posture, joint instability.
-

140. Hyper-tonicity

- **Definition:** Excess muscle tightness & stiffness.
 - **Causes:** Vata + nerve irritation.
 - **Harm:** Reduced motion, pain.
-

141. Hypo-tonicity

- **Definition:** Muscles too floppy/weak.
 - **Causes:** Genetic, nerve issues.
 - **Harm:** Developmental delays in children.
-

142. Fibromyalgia-like

- **Definition:** Widespread muscle pain with fatigue.

- **Causes:** Stress, sleep disorder, toxins.
 - **Harm:** Depression, disability.
-

143. Chronic Muscle Weakness

- **Definition:** Progressive muscle power reduction.
 - **Causes:** Neuropathy, chronic illness.
 - **Harm:** Loss of independence.
-

144. Neuromuscular Junction Weakness

- **Definition:** Brain signals fail to activate muscles properly.
 - **Causes:** Autoimmune disorders (e.g. MG-like).
 - **Harm:** Difficulty breathing/swallowing in severe cases.
-

N. Psychological–Somatic Disorders

145. Stress Headaches

- **Definition:** Head pain due to muscle tension.
 - **Causes:** Worry, long screen time.
 - **Harm:** Reduced focus & working ability.
-

146. Stomach Anxiety (Gut-Brain Link)

- **Definition:** Anxiety causing stomach upset & cramps.
 - **Causes:** Stress hormones affecting digestion.
 - **Harm:** IBS-like episodes.
-

147. Emotional Choking Sensation

- **Definition:** Feeling throat closing when stressed.
 - **Causes:** Panic, fear, trauma.
 - **Harm:** Fear of eating or speaking.
-

148. Anxiety-induced Chest Tightness

- **Definition:** Chest feels tight without heart issue.
 - **Causes:** Panic attacks.
 - **Harm:** Breathlessness, ER visits due to fear.
-

149. Trauma-related Nervous Disorders

- **Definition:** Nerve system changes due to past trauma.
 - **Causes:** Abuse, accidents, PTSD.
 - **Harm:** Sleep issues, flashbacks.
-

150. Phobia-like Reactions

- **Definition:** Extreme fear of specific objects/situations.

- **Causes:** Conditioning, anxious thinking.
 - **Harm:** Avoidance behavior limits life.
-

151. Panic-attack-like Episodes

- **Definition:** Sudden intense fear with physical symptoms.
 - **Causes:** Overactivation of fight-or-flight system.
 - **Harm:** Fainting, chest pain, severe fear.
-

152. Overthinking-induced Insomnia

- **Definition:** Racing thoughts preventing sleep.
- **Causes:** Vata mind disturbance, stress.
- **Harm:** Low immunity, daytime anxiety.

A. Bone (Asthi) Disorders

1. Asthivaha Srotas Dushti

- **Definition:** Impairment of body channels responsible for bone nourishment.
 - **Causes:** Poor digestion, nutrient deficiency, chronic illness.
 - **Harm:** Weak bones, delayed growth, early degeneration.
-

2. Asthikshaya (Bone Loss)

- **Definition:** Reduction in bone mass and strength.
 - **Causes:** Aging, lack of calcium/vitamin D, Vata imbalance.
 - **Harm:** Bone fragility, height reduction, fractures.
-

3. Osteoporosis-like Condition

- **Definition:** Bones become porous and fragile.
 - **Causes:** Menopause, low hormonal levels, immobility.
 - **Harm:** Minor injury → big fracture risk.
-

4. Asthivridhi (Excess Bone Growth)

- **Definition:** Abnormal increase or thickening of bone.
 - **Causes:** Trauma, hormonal imbalance, Kapha aggravation.
 - **Harm:** Bone spurs → nerve compression & pain.
-

5. Bone Deformities

- **Definition:** Abnormal bone shape or alignment.
 - **Causes:** Nutritional deficiency (Vit D), congenital issues.
 - **Harm:** Mobility problems, chronic pain.
-

6. Asthibheda (Deep Bone Pain)

- **Definition:** Sharp, penetrating pain inside bones.
 - **Causes:** Vata aggravation, weakness, infections.
 - **Harm:** Pain worsens with cold/night → limited activity.
-

7. Asthishula

- **Definition:** Severe bone pain with tenderness.
 - **Causes:** Bone inflammation, injuries, degeneration.
 - **Harm:** Sleep disturbance, disability risk.
-

8. Multiple Joint Pain (Polyarthralgia)

- **Definition:** Pain in many joints at same time.
 - **Causes:** Autoimmune disease, viral infections, toxins.
 - **Harm:** Difficulty walking or daily tasks.
-

9. Bhagna (Bone Fracture)

- **Definition:** Break in bone due to trauma or weakness.
 - **Causes:** Falls, accidents, osteoporosis.
 - **Harm:** Nerve damage risk, long recovery.
-

10. Delayed Fracture Healing

- **Definition:** Slow repair of broken bones.
 - **Causes:** Diabetes, malnutrition, smoking.
 - **Harm:** Chronic instability, permanent weakness.
-

11. Bone Density Loss from Vata

- **Definition:** Drying & thinning of bone tissue.
 - **Causes:** Aging, stress, fasting, late nights.
 - **Harm:** Cracks/fractures easily.
-

12. Pitta-Induced Bone Inflammation

- **Definition:** Heat & swelling affecting bone structure.
 - **Causes:** Infection, autoimmune heat disorders.
 - **H harm:** Bone destruction → severe pain.
-

13. Kapha-Induced Bone Heaviness

- **Definition:** Excess bone mass with heaviness & stiffness.
 - **Causes:** Obesity, low metabolism, excess dairy.
 - **Harm:** Joint immobility, nerve pinch.
-

14. Degenerative Bone Disease

- **Definition:** Progressive weakening & breakdown of bones.
 - **Causes:** Old age, arthritis, chronic Vata disorders.
 - **Harm:** Permanent disability if untreated.
-

15. Bone Marrow Disorders

- **Definition:** Dysfunction of Majja dhatu (blood & immunity forming tissue).
- **Causes:** Toxins, cancer, autoimmune disorders.

Harm: Weak immunity, anemia, infections.

16. Sandhishoola (Joint Pain)

- **Definition:** Pain in one or multiple joints without visible swelling.
- **Causes:** Vata aggravation, strain, aging, overuse.
- **Harm:** Reduced movement, stiffness leading to disability.

17. Sandhigata Vata (Osteoarthritis-like)

- **Definition:** Degeneration of joints due to dryness and loss of lubrication.
 - **Causes:** Aging, excessive exercise, cracking joints, Vata imbalance.
 - **Harm:** Joint deformity, chronic pain, reduced mobility.
-

18. Sandhigata Kapha (Swollen Joints)

- **Definition:** Increased fluid in joints causing swelling and heaviness.
 - **Causes:** Obesity, cold/damp exposure, Kapha imbalance.
 - **Harm:** Heaviness, reduced ability to bend or move the joint.
-

19. Sandhigata Pitta (Inflammatory Arthritis)

- **Definition:** Burning type joint inflammation with redness and heat.
 - **Causes:** Autoimmune heat disorders, infection, spicy foods.
 - **Harm:** Joint damage due to inflammation.
-

20. Sandhi Shotha (Joint Swelling)

- **Definition:** Fluid retention in joints.
 - **Causes:** Injury, infection, Kapha or Ama (toxin) accumulation.
 - **H harm:** Restricted motion, pain, fever if infected.
-

21. Sandhi Stiffness

- **Definition:** Joint rigidity with limited motion.
 - **Causes:** Vata dryness, long inactivity, cold exposure.
 - **Harm:** Daily activities become difficult.
-

22. Frozen Shoulder

- **Definition:** Shoulder capsule becomes stiff and painful.
 - **Causes:** Diabetes, overuse injury, Vata imbalance.
 - **Harm:** Cannot lift arm → major disability in self-care.
-

23. Cervical Spondylosis

- **Definition:** Neck region degeneration of discs and bones.
 - **Causes:** Long screen time, bad posture, aging.
 - **Harm:** Radiating arm pain, numbness, headaches.
-

24. Lumbar Spondylosis

- **Definition:** Degeneration of lower spine joints.
 - **Causes:** Heavy lifting, long sitting, aging.
 - **Harm:** Lower back stiffness, sciatica, nerve damage.
-

25. Wrist Joint Pain

- **Definition:** Pain in wrist movement or gripping.
 - **Causes:** Repetitive strain, sprain, arthritis.
 - **Harm:** Weak grip, difficulty with writing and work.
-

26. Elbow Joint Pain

- **Definition:** Pain around elbow joint due to strain or arthritis.
 - **Causes:** Sports injury (tennis/golfer elbow), nerve compression.
 - **Harm:** Limited lifting, daily discomfort.
-

27. Knee Joint Pain

- **Definition:** Pain in knee movement or standing.
 - **Causes:** Obesity, aging, cartilage damage.
 - **Harm:** Difficulty walking, depends on support.
-

28. Hip Joint Pain

- **Definition:** Pain around hip muscles and joint structure.
 - **Causes:** Arthritis, bone damage, bursitis.
 - **Harm:** Difficulty sitting/standing, limping.
-

29. Finger Joint Arthritis

- **Definition:** Inflammation or degeneration of finger joints.
 - **Causes:** Osteoarthritis, autoimmune disorders.
 - **Harm:** Deformed fingers, difficulty writing & holding.
-

30. Aamvata (Rheumatoid Arthritis-like)

- **Definition:** Autoimmune disorder causing multiple painful swollen joints.
 - **Causes:** Indigestion → toxins (Ama) enter joints, immune imbalance.
 - **Harm:** Joint deformity, disability, low immunity.
-

31. Psoriatic Arthritis-like

- **Definition:** Joint inflammation with psoriasis-type skin symptoms.
 - **Causes:** Autoimmune heat + toxins buildup.
 - **Harm:** Pain + skin lesions → psychological stress.
-

32. Gout (Vatarakta)

- **Definition:** Uric acid crystals deposit in joints → severe pain.
 - **Causes:** Red meat, alcohol, kidney issues.
 - **Harm:** Big toe severe attacks → deformity in chronic stage.
-

33. Ankylosing Spondylitis-like

- **Definition:** Spinal joints fuse and stiffen over time.
 - **Causes:** Autoimmune sexual organ inflammation → spine.
 - **Harm:** Spine becomes like a stick (bamboo spine).
-

34. Intervertebral Disc Degeneration

- **Definition:** Wear/tear of disc cushions between vertebrae.
 - **Causes:** Aging, sitting long hours, dehydration of disc.
 - **Harm:** Nerve compression → sciatica, paralysis risk.
-

35. Sacroiliac Joint Pain

- **Definition:** Pain where spine meets pelvic bones.
 - **Causes:** Pregnancy, trauma, arthritis.
 - **Harm:** Difficulty standing + turning in bed.
-

36. Temporomandibular Joint Disorder (TMJ)

- **Definition:** Jaw joint dysfunction causing pain and clicking sound.
- **Causes:** Teeth grinding, stress, nerve-muscle imbalance.
- **Harm:** Pain while speaking, chewing → jaw lock risk.

37. MamsaKshaya-related Joint Pain

- **Definition:** Joint instability due to muscle wasting around joints.

- **Cause:** Malnutrition, chronic illness, Vata disorders.
 - **Harm:** High injury risk, weak posture, painful joints.
-

38. MamsaVridhhi Pressure Pain

- **Definition:** Joint pain caused by excessive muscle bulk compressing joints.
 - **Cause:** Over-exercise, Kapha increase.
 - **Harm:** Nerve pressure, movement limitation.
-

39. MamsaShotha (Muscle Swelling Affecting Joint)

- **Definition:** Swelling around joints causing stiffness.
 - **Cause:** Injury, infection, autoimmune disorders.
 - **Harm:** Restricted movement, severe pain.
-

40. Myositis-like Joint Pain

- **Definition:** Muscle inflammation extending to joint structures.
 - **Cause:** Viral infections, autoimmune heat.
 - **Harm:** Difficulty standing, climbing.
-

41. Muscle Spasm Leading to Joint Lock

- **Definition:** Sudden spasm immobilizing joint.
 - **Cause:** Electrolyte imbalance, overwork.
 - **Harm:** Sudden falls, severe pain.
-

42. Muscle Tightness Causing Joint Stress

- **Definition:** Reduced flexibility puts pressure on the joint.
 - **Cause:** Lack of stretching, dehydration.
 - **Harm:** Wear & tear worsens → arthritis.
-

43. Muscle Contraction-Induced Joint Misalignment

- **Definition:** Constant tight muscle pulls joint out of line.
 - **Cause:** Nerve damage, posture imbalance.
 - **Harm:** Chronic pain and deformity risk.
-

44. Muscle Weakness Causing Joint Instability

- **Definition:** Insufficient muscle support around joints.
 - **Cause:** Sedentary life, neuropathy.
 - **Harm:** Slip disc & fall risk.
-

45. Muscle Twitching Affecting Joint Positioning

- **Definition:** Involuntary contractions disturbing joint alignment.
 - **Cause:** Electrolyte imbalance, nerve irritation.
 - **Harm:** Locking, sudden sharp pain.
-

46. Fibromyalgia-like Joint Pain

- **Definition:** Widespread aching including multiple joints.
 - **Cause:** Chronic stress, sleep disorders, toxins.
 - **Harm:** Disability due to constant pain.
-

47. Chronic Muscular Fatigue Affecting Joints

- **Definition:** Constant tiredness → poor joint protection.
 - **Cause:** Low immunity, anemia.
 - **Harm:** Weak movement → instability.
-

48. Deep Muscle Ache Radiating to Joints

- **Definition:** Muscle pain felt inside joints too.
 - **Cause:** Heavy workload, dehydration.
 - **Harm:** Severe stiffness & swelling.
-

49. MamsaGataVata (Neuromuscular Joint Pain)

- **Definition:** Nerve disruption causes painful movement.
 - **Cause:** Vata vitiation, trauma.
 - **Harm:** Restricted movement, numbness.
-

50. Hamstring Tightness Impacting Knee Joint

- **Definition:** Tight hamstring pulls knee joint alignment.
 - **Cause:** Long sitting, lack of flexibility.
 - **Harm:** Knee pain, poor walking posture.
-

51. Calf Stiffness Affecting Ankle Joint

- **Definition:** Calf tightness alters ankle function.
 - **Cause:** Running strain, dehydration.
 - **Harm:** Ankle pain & heel stress.
-

52. Trapezius Muscle Tightness Affecting Shoulder Joint

- **Definition:** Neck–shoulder tightness limiting arm movement.
 - **Cause:** Stress, posture, screen time.
 - **Harm:** Neck pain, frozen shoulder risk.
-

53. Back Muscle Stiffness Affecting Spine Joints

- **Definition:** Tight back reduces spinal flexibility.
- **Cause:** Long sitting, load lifting.
- **Harm:** Slip disc progression.

54. Neck Muscle Tightness (Cervical Strain)

- **Definition:** Muscle tension restricting neck joint function.
 - **Cause:** Mobile/laptop posture, stress.
 - **Harm:** Headaches, arm weakness.
-

➔ Now tendon & ligament related (Part of Joint Disorders)

55. Snayu-gata Vata (Tendon Disorders)

- **Definition:** Vata affects tendons → tight & painful joints.
 - **Cause:** Overuse, dryness, aging.
 - **Harm:** Movement limitation.
-

56. Snayu Shosha (Tendon Degeneration)

- **Definition:** Weakening and thinning of tendons.
 - **Cause:** Nutrient deficiency, chronic strain.
 - **Harm:** Tear risk increases.
-

57. Snayu Granthi (Tendon Knots)

- **Definition:** Hard lumps/knots form in tendons.
 - **Cause:** Injury, scar tissue.
 - **Harm:** Sharp pain during motion.
-

58. Tendonitis (Pittaja Tendon Inflammation)

- **Definition:** Inflamed tendon with burning pain.
 - **Cause:** Repeated stress, heat imbalance.
 - **Harm:** Swelling, reduced range of motion.
-

59. Ligament Sprain

- **Definition:** Stretch/tear of ligament supporting joint.
 - **Cause:** Sudden movement, twisting.
 - **Harm:** Instability → chronic joint problems.
-

60. Ligament Tears

- **Definition:** Partial/complete ligament rupture.
 - **Cause:** Sports, accidents.
 - **Harm:** Joint collapse, surgery may be needed.
-

61. ACL-type Injury

- **Definition:** Tear of anterior cruciate ligament in knee.
- **Cause:** Jumping, sudden stop/change in direction.
- **Harm:** Knee instability → early arthritis.

62. PCL-type Injury

- **Definition:** Tear of ligament (PCL) that stabilizes the knee backward movement.
 - **Causes:** Road accidents, sports falls, direct blow to bent knee.
 - **Harm:** Knee feels unstable, difficulty walking downhill or climbing stairs.
-

63. Shoulder Tendon Tear

- **Definition:** Partial/complete tear of tendons around the shoulder joint.
 - **Causes:** Overuse, trauma, degeneration in aging.
 - **Harm:** Weak arm, difficulty lifting or combing hair.
-

64. Achilles Tendonitis

- **Definition:** Inflammation of tendon at back of heel.

- **Causes:** Running stress, tight calf muscles, poor footwear.
 - **Harm:** Heel pain → walking difficulty → risk of tendon rupture.
-

- **Causes:** Chronic health imbalance, untreated arthritis.
 - **Harm:** Severe deformities → disability.
-

65. Plantar Fascia Pain

- **Definition:** Inflammation in thick tissue under foot.
 - **Causes:** Obesity, prolonged standing, flat foot.
 - **Harm:** Severe morning heel pain → reduced mobility.
-

70. Aamvata (Rheumatoid Arthritis-like)

- **Definition:** Autoimmune swelling of multiple joints caused by toxins (Ama).
 - **Causes:** Weak digestion, stress, viral triggers.
 - **Harm:** Joint deformity, fatigue, low immunity.
-

66. Vataja Arthritis

- **Definition:** Joint pain with dryness, cracking and stiffness.
 - **Causes:** Vata imbalance, aging, cold exposure, fasting.
 - **Harm:** Joint degeneration → deformity if untreated.
-

71. Osteoarthritis

- **Definition:** Progressive wear of cartilage with bone-on-bone friction.
 - **Causes:** Aging, obesity, joint overuse.
 - **Harm:** Chronic pain → bone spurs → restricted movement.
-

67. Kaphaja Arthritis

- **Definition:** Swollen, heavy, cold joints due to Kapha aggravation.
 - **Causes:** Obesity, damp/cold weather, excess dairy.
 - **Harm:** Severe stiffness → movement restricted.
-

72. Early-stage Arthritis

- **Definition:** Beginning of joint wear with mild pain and cracking sound.
 - **Causes:** Poor posture, early degeneration.
 - **Harm:** Can progress to severe arthritis if ignored.
-

68. Pittaja Arthritis

- **Definition:** Red, hot, burning joints due to Pitta inflammation.
 - **Causes:** Autoimmune disorders, spicy diet, infections.
 - **Harm:** Rapid cartilage damage → joint destruction.
-

73. Chronic Arthritis

- **Definition:** Long-term inflammation and joint destruction.
 - **Causes:** Untreated immune or degenerative arthritis.
 - **Harm:** Permanent disability, severe deformity.
-

69. Sannipata Arthritis

- **Definition:** Arthritis involving all three doshas with complex symptoms.
-

74. Reactive Arthritis

- **Definition:** Arthritis triggered by infection in gut or urinary system.
- **Causes:** Bacterial infections, immune reaction.
- **Harm:** Recurrent pain, red eyes, urinary symptoms.

75. Inflammatory Arthritis

- **Definition:** Immune attack on joints causing continuous inflammation.
 - **Causes:** Autoimmune diseases like SLE, RA.
 - **Harm:** Rapid joint damage → affects heart & organs.
-

76. Joint Deformity

- **Definition:** Permanent abnormal shape of joint structure.
 - **Causes:** Long-term arthritis, bone erosion.
 - **Harm:** Functional disability + cosmetic concerns.
-

77. Bone Friction Pain

- **Definition:** Intense pain from bones rubbing due to lost cartilage.
 - **Causes:** Severe osteoarthritis.
 - **Harm:** Noisy joints, movement nearly impossible.
-

78. Grinding Joints (Crepitus)

- **Definition:** Grinding/scratching sound during joint movement.
 - **Causes:** Wear of joint surfaces, dryness.
 - **Harm:** Indicates worsening degeneration.
-

79. Swollen Joints

- **Definition:** Fluid accumulation inside joints causing enlargement.
 - **Causes:** Infection, autoimmune inflammation, injury.
 - **Harm:** Movement difficulty, fever if infection present.
-

80. Warm Joints

- **Definition:** Hot and red joints due to high inflammation.
 - **Causes:** Inflammatory or infectious arthritis.
 - **Harm:** Rapid tissue destruction → extreme pain.
-

81. Cold-Stiff Joints

- **Definition:** Joints become stiff and painful especially in cold weather.
 - **Causes:** Vata aggravation, reduced lubrication.
 - **Harm:** Reduced flexibility → risk of falls.
-
-
-

F. Back & Spine Disorders (continued)

82. Kati Shula (Lower Back Pain)

- **Definition:** Pain in the lumbar spine and surrounding muscles.
 - **Causes:** Poor posture, heavy lifting, Vata imbalance, injury.
 - **Harm:** Difficulty bending, standing, lifting → chronic disability risk.
-

83. Greeva Shula (Neck Pain)

- **Definition:** Pain in the cervical spine area radiating to shoulders/arms.
 - **Causes:** Long screen use, cervical spondylosis, nerve strain.
 - **Harm:** Headaches, arm weakness → reduced productivity.
-

84. Trika Shula (Sacral Pain)

- **Definition:** Pain at the lower spine–pelvis junction.

- **Causes:** Sacroiliac joint strain, sitting long hours.
 - **Harm:** Difficulty sitting and standing transitions.
-

- **Causes:** Bad sitting habits, prolonged driving, obesity.
 - **Harm:** Persistent back/leg pain → nerve compression.
-

85. Sciatica (Gridhrasi)

- **Definition:** Radiating pain from spine down to foot due to nerve irritation.
 - **Causes:** Disc herniation, muscle tightness, Vata vitiation.
 - **Harm:** Numbness, weakness, walking difficulty.
-

90. Spine Compression

- **Definition:** Pressure on spinal cord or vertebrae reduces nerve space.
 - **Causes:** Osteoporosis, tumors, accidents.
 - **Harm:** Weakness in limbs, movement disability.
-

86. Vataja Sciatica

- **Definition:** Sciatica with dry, stabbing pain + muscle wasting.
 - **Causes:** Vata aggravation, dehydration, ageing.
 - **Harm:** Severe pain → risk of permanent nerve damage.
-

91. Kyphosis-like

- **Definition:** Excess forward rounding of upper back (hunchback posture).
 - **Causes:** Osteoporosis, weak muscles, poor posture.
 - **Harm:** Lung capacity reduces → breathing difficulty.
-

87. Kaphaja Sciatica

- **Definition:** Sciatica with heaviness and swelling in leg.
 - **Causes:** Sedentary lifestyle, obesity, Kapha accumulation.
 - **Harm:** Leg becomes weak, movement impaired.
-

92. Lordosis-like

- **Definition:** Excess inward curve in lower back.
 - **Causes:** Weak core muscles, obesity, pregnancy.
 - **Harm:** Low back pain, posture imbalance.
-

88. Slip Disc-like Condition

- **Definition:** Disc moves from normal position causing nerve pressure.
 - **Causes:** Sudden twist, load lifting, bad posture.
 - **Harm:** Severe pain, possible partial paralysis if untreated.
-

93. Scoliosis-like

- **Definition:** Spine curves sideways forming S or C shape.
 - **Causes:** Congenital issues, neuromuscular disorders.
 - **Harm:** Deformity → lung/heart pressure in severe cases.
-

89. Disc Bulge

- **Definition:** Disc expands outward but not fully slipped out.

94. Vertebral Degeneration

- **Definition:** Breakdown of vertebrae due to age or wear.
- **Causes:** Spondylosis, osteoporosis, trauma.

- **Harm:** Constant pain, nerve impingement → disability.
-

95. Nerve Root Compression

- **Definition:** Nerve exit point gets compressed by bone/disc.
 - **Causes:** Disc bulge, bone spurs.
 - **Harm:** Limb numbness, loss of strength → paralysis if severe.
-

96. Stiff Lower Back

- **Definition:** Reduced flexibility in lumbar spine region.
 - **Causes:** Inactivity, cold exposure, Vata dryness.
 - **Harm:** Slip disc and fall risk increase.
-

97. Coccyx Pain

- **Definition:** Pain in tailbone area during sitting.
 - **Causes:** Fall injury, prolonged sitting on hard surfaces.
 - **Harm:** Difficulty in sitting, bowel movement strain.
-

98. Tailbone Injury

- **Definition:** Injury to coccyx bone leading to inflammation.
 - **Causes:** Falling backward, childbirth trauma.
 - **Harm:** Sharp pain → long-lasting mobility difficulty.
-

G. Shoulder, Elbow & Wrist Disorders

99. Frozen Shoulder

- **Definition:** Shoulder capsule becomes stiff causing severe movement restriction.
 - **Causes:** Diabetes, prolonged immobility, nerve irritation.
 - **Harm:** Arm can't lift → self-care becomes impossible.
-

100. Shoulder Impingement

- **Definition:** Shoulder tendons get squeezed during arm elevation.
- **Causes:** Muscle imbalance, repetitive overhead activity.
- **Harm:** Painful arc → weakness leading to rotator cuff tears.

G. Shoulder, Elbow & Wrist Disorders (continued)

101. Rotator Cuff Tear

- **Definition:** Tear of shoulder stabilizing tendons.
 - **Causes:** Overhead work, sudden jerk, aging degeneration.
 - **Harm:** Severe weakness → arm may not lift or rotate properly.
-

102. Tennis Elbow

- **Definition:** Inflammation of outer elbow tendons.
 - **Causes:** Repetitive wrist extension (typing, sports).
 - **Harm:** Poor grip strength → lifting objects painful.
-

103. Golfer's Elbow

- **Definition:** Inflammation of inner elbow tendon.
- **Causes:** Excess wrist flexion strain.
- **Harm:** Pain while lifting/pulling → long-term weakness.

-
- **Harm:** Walk becomes painful → limping.
-

104. Wrist Tendonitis

- **Definition:** Wrist tendon inflammation causing pain and swelling.
 - **Causes:** Excess typing, lifting weights, repetitive strain.
 - **Harm:** Motion difficult → chronic hand weakness.
-

105. Carpal Tunnel-like Disorder

- **Definition:** Median nerve compression in wrist tunnel.
 - **Causes:** Computer work, obesity, diabetes.
 - **Harm:** Tingling → numbness → muscle atrophy if untreated.
-

106. Trigger Finger

- **Definition:** Finger locks when bending due to swollen tendon sheath.
 - **Causes:** Diabetes, gripping tools repeatedly.
 - **Harm:** Finger stuck painfully → surgery may be needed.
-

107. De Quervain's Syndrome

- **Definition:** Inflammation of thumb tendons near wrist.
 - **Causes:** Lifting babies, texting, sports.
 - **Harm:** Thumb pain → limited grasping ability.
-
-

H. Hip, Knee & Leg Disorders

108. Hip Arthritis

- **Definition:** Hip joint cartilage degeneration causing deep pain.
- **Causes:** Age, sports injury, overweight.

109. Hip Impingement

- **Definition:** Hip bones rub abnormally blocking movement.
 - **Causes:** Bony deformity, overuse.
 - **Harm:** Early arthritis risk.
-

110. Knee Arthritis

- **Definition:** Wear & tear of knee cartilage.
 - **Causes:** Aging, obesity, joint injury.
 - **Harm:** Pain, clicking, difficulty sitting/standing.
-

111. Meniscus Injury

- **Definition:** Tear in knee shock-absorbing cartilage.
 - **Causes:** Twisting injuries, sports.
 - **Harm:** Knee locks → major motion restriction.
-

112. Janushotha (Knee Swelling)

- **Definition:** Fluid accumulation inside knee joint.
 - **Causes:** Injury, arthritis.
 - **Harm:** Heavy knee → limited bending.
-

113. Runner's Knee

- **Definition:** Pain around kneecap due to overload.
 - **Causes:** Running, weak thigh muscles.
 - **Harm:** Climbing stairs difficult.
-

114. Patellar Tendonitis

- **Definition:** Inflammation under kneecap tendon.

- **Causes:** Jump sports, uneven running.
 - **Harm:** Knee may buckle suddenly.
-

115. Shin Splints

- **Definition:** Pain along shin bone from repetitive stress.
 - **Causes:** Hard-surface running, bad shoes.
 - **Harm:** Stress fractures if ignored.
-

116. IT Band Syndrome

- **Definition:** Tight IT band rubs knee → outer-knee pain.
 - **Causes:** Weak hip muscles, long-distance running.
 - **Harm:** Running becomes painful → gait changes.
-

117. Heel Pain

- **Definition:** Pain under heel affecting first steps.
 - **Causes:** Plantar fasciitis, heel pads thinning.
 - **Harm:** Reduced walking and standing time.
-

118. Flat Foot Pain

- **Definition:** No foot arch → pressure imbalance.
 - **Causes:** Weak arch muscles, genetics.
 - **Harm:** Knee and hip pain → alignment issues.
-

119. High Arch Foot Pain

- **Definition:** Excessively raised arch causes foot pressure imbalance.
 - **Causes:** Tight ligaments, nerve disorders.
 - **Harm:** Frequent ankle sprains, toe pain.
-

I. Foot & Ankle Disorders

120. Plantar Fasciitis

- **Definition:** Heel band inflammation causing severe first-step pain.
 - **Causes:** Standing long hours, overweight.
 - **Harm:** Chronic mobility limitation.
-

121. Ankle Sprain

- **Definition:** Ligament overstretched/torn around ankle.
 - **Causes:** Missteps, running on uneven ground.
 - **Harm:** Instability → repeated sprains.
-

122. Ankle Stiffness

- **Definition:** Reduced ankle motion due to ligament or tendon tightness.
 - **Causes:** Post-injury, aging, prolonged rest.
 - **Harm:** Poor balance → risk of fall.
-

123. Heel Spur

- **Definition:** Extra heel bone growth causing stabbing pain.
 - **Causes:** Chronic plantar fasciitis.
 - **Harm:** Painful walking or standing.
-

124. Toe Arthritis

- **Definition:** Small toe joints degrade over time.
 - **Causes:** Foot wear, bone changes, gout.
 - **Harm:** Painful steps → deformity.
-

125. Toe Deformity

- **Definition:** Abnormal bent position of toes.
 - **Causes:** Tight shoes, weak muscles.
 - **Harm:** Balance issues → friction wounds.
-

126. Ingrown Nail Pain

- **Definition:** Nail edge grows into skin causing inflammation.
 - **Causes:** Improper nail cutting, tight footwear.
 - **Harm:** Pus infection → walking pain.
-

127. Morton's Neuroma-like

- **Definition:** Nerve swelling between toes causing shock-like pain.
 - **Causes:** Heels, tight shoes.
 - **Harm:** Burning numb toes → limits walking.
-
-

J. Soft Tissue & Connective Tissue Disorders

128. Myofascial Pain Syndrome

- **Definition:** Trigger points in muscle cause referred pain.
 - **Causes:** Overuse, stress, trauma.
 - **Harm:** Wide area pain → poor sleep & fatigue.
-

129. Trigger Points

- **Definition:** Small painful muscle knots.
 - **Causes:** Postural strain, dehydration.
 - **Harm:** Local sharp pain → radiating discomfort.
-

130. Muscle Adhesion

- **Definition:** Scar tissue binding muscle fibers.
 - **Causes:** Injury, surgery, inflammation.
 - **Harm:** Motion restriction → chronic pain.
-

131. Connective Tissue Stiffness

- **Definition:** Reduced elasticity of fascia & ligaments.
 - **Causes:** Aging, dehydration, Vata imbalance.
 - **Harm:** Limited mobility → degeneration risk.
-

132. Connective Tissue Swelling

- **Definition:** Excess fluid in fascia around joints.
 - **Causes:** Kapha imbalance, injury.
 - **Harm:** Heaviness, movement restriction.
-

133. Ligament Degeneration

- **Definition:** Breakdown of ligament fibers.
 - **Causes:** Overuse, aging, poor healing.
 - **Harm:** Repeated sprains → instability.
-

134. Tendon Sheath Swelling

- **Definition:** Inflammation of covering around tendon.
 - **Causes:** Strain, repetitive motions.
 - **Harm:** Painful movement → locking.
-
-

K. Pain Syndromes

135. Chronic Widespread Pain

- **Definition:** Body-wide pain lasting long duration.
 - **Causes:** Fibromyalgia-like disorders, stress.
 - **Harm:** Disability → depression.
-

136. Dull Aching Pain

- **Definition:** Mild but persistent muscle/joint pain.
 - **Causes:** Fatigue, tight muscles, arthritis.
 - **Harm:** Sleep and work interference.
-

137. Deep Pressure Pain

- **Definition:** Pain triggered by pressing tissues deeply.
 - **Causes:** Inflammation, myofascial knots.
 - **Harm:** Avoidance of movement → stiffness.
-

138. Shooting Pain

- **Definition:** Sudden electric shock-like pain.
 - **Causes:** Nerve compression.
 - **Harm:** Sudden fall or weakness.
-

139. Radiating Pain

- **Definition:** Pain spreads along nerve pathway.
 - **Causes:** Disc issues, neuropathy.
 - **Harm:** Difficulty moving → nerve damage risk.
-

140. Inflammatory Pain

- **Definition:** Hot red swollen painful area.
 - **Causes:** Immune inflammation, infection.
 - **Harm:** Rapid tissue damage.
-

141. Morning Stiffness

- **Definition:** Difficulty moving joints after waking.
 - **Causes:** RA-like autoimmune, inactivity.
 - **Harm:** Daily tasks challenging.
-

142. Cold-induced Joint Pain

- **Definition:** Cold temperature ↑ stiffness & pain.
 - **Causes:** Vata aggravation.
 - **Harm:** Chronic stiffness → falls.
-

143. Heat-induced Joint Pain

- **Definition:** Warm climate ↑ burning pain & swelling.
 - **Causes:** Pitta inflammation.
 - **Harm:** Joint destruction worsens.
-

L. Mobility & Posture Disorders

144. Difficulty Walking

- **Definition:** Impaired gait due to pain/weakness.
 - **Causes:** Neuromuscular or bone/joint disorders.
 - **Harm:** Severe dependency → fall risk.
-

145. Limping

- **Definition:** Uneven walking due to pain or deformity.
 - **Causes:** Leg length issues, arthritis.
 - **Harm:** Hip & spine misalignment.
-

146. Posture Imbalance

- **Definition:** Body alignment deviates from normal.
 - **Causes:** Weak muscles, poor habits.
 - **Harm:** Chronic pain → disc problems.
-

147. Kyphotic Posture

- **Definition:** Excess forward curve of upper spine.
 - **Causes:** Weak back, osteoporosis.
 - **Harm:** Breathing issues → organ crowding.
-

148. Sway-back Posture

- **Definition:** Pelvis thrust forward → hyper-relaxed stance.
 - **Causes:** Weak core, long sitting.
 - **Harm:** Hip/back pain chronic.
-

149. Forward Head Posture

- **Definition:** Head positioned ahead of shoulder line.
 - **Causes:** Mobile/laptop overuse.
 - **Harm:** Neck pain & nerve tension.
-

150. Muscle Imbalance

- **Definition:** Opposing muscle groups unequal strength.
 - **Causes:** Bad exercise form, repetitive tasks.
 - **Harm:** Joint wear → deformity.
-
-

M. Sports Injuries

151. Muscle Pull

- **Definition:** Sudden overstretch of muscle fibers.

- **Causes:** No warm-up, overload.
 - **Harm:** Sharp pain → temporary disability.
-

152. Ligament Strain

- **Definition:** Mild tear in ligament stabilizing joint.
 - **Causes:** Twisting falls, sudden stretch.
 - **Harm:** Instability → repeat injuries.
-

153. Joint Overuse Injury

- **Definition:** Repeated stress damages joint tissues.
 - **Causes:** Sports repetition, heavy work.
 - **Harm:** Chronic pain, arthritis risk.
-

154. Muscle Tear

- **Definition:** Severe rupture of muscle fibers.
 - **Causes:** Sudden heavy load.
 - **Harm:** Bruises + long recovery time.
-

155. Tendon Rupture

- **Definition:** Full tear of tendon separating muscle from bone.
 - **Causes:** Forceful jump, steroid use.
 - **Harm:** Limb cannot move → surgery needed.
-

156. High-impact Injury

- **Definition:** Major trauma affecting muscles/joints/bones.
 - **Causes:** Sports collisions, falls.
 - **Harm:** Fractures, permanent deformity.
-

157. Stress Fractures

- **Definition:** Tiny cracks in bone from repeated overload.

- **Causes:** Running, poor bone density.
-

CATEGORY 6 – Endocrine, Hormonal, Metabolic & Reproductive Disorders

A. Thyroid Disorders (1–20)

1. Galaganda (Goiter)

- **Definition:** Enlargement of the thyroid gland in the neck.
- **Causes:** Iodine deficiency, thyroid dysfunction, Kapha aggravation.
- **Harm to the body:** Neck swelling, difficulty swallowing/breathing, hormonal imbalance.

2. Vataja Galaganda

- **Definition:** Goiter with Vata-dominant features (hard, painful swelling).
- **Causes:** Vata aggravation, dryness, stress, poor nutrition.
- **Harm:** Throat discomfort, voice change, nervousness, weight loss.

3. Pittaja Galaganda

- **Definition:** Goiter with Pitta features (hot, tender swelling).
- **Causes:** Pitta aggravation, inflammation, infections.
- **Harm:** Burning throat, irritability, palpitations, heat intolerance.

4. Kaphaja Galaganda

- **Definition:** Goiter with Kapha features (soft, cold, heavy swelling).
- **Causes:** Kapha increase, sluggish metabolism, obesity, iodine lack.
- **Harm:** Neck heaviness, lethargy, weight gain, slow thinking.

5. Thyroid Enlargement

- **Definition:** Abnormal increase in thyroid size, with or without hormone changes.

- **Causes:** Iodine deficiency, autoimmunity, nodules.
- **Harm:** Cosmetic concern, pressure symptoms, potential hormone imbalance.

6. Hypothyroidism (Kapha dominant)

- **Definition:** Underactive thyroid with low hormone production.
- **Causes:** Autoimmune (Hashimoto's), iodine lack, Kapha dominance.
- **Harm:** Weight gain, fatigue, cold intolerance, constipation, infertility.

7. Hyperthyroidism (Pitta dominant)

- **Definition:** Overactive thyroid producing excess hormones.
- **Causes:** Graves' disease, toxic nodules, Pitta aggravation.
- **Harm:** Weight loss, palpitations, anxiety, heat intolerance, muscle wasting.

8. Thyroiditis (Inflammation)

- **Definition:** Inflammatory disorder of thyroid tissue.
- **Causes:** Autoimmune attack, viral infection, drug reactions.
- **Harm:** Neck pain, fluctuating thyroid levels, long-term hypothyroidism.

9. Iodine Deficiency Goiter

- **Definition:** Thyroid enlargement due to lack of iodine.
- **Causes:** Iodine-poor diet, living in iodine-deficient areas.
- **Harm:** Neck swelling, hypothyroidism, mental retardation in fetus/children.

10. Thyroid Nodules

- **Definition:** Single or multiple lumps within thyroid gland.
- **Causes:** Overgrowth of thyroid tissue, cysts, tumors.

- **Harm:** Hormone imbalance, compression symptoms, cancer risk (few cases).

11. Autoimmune Thyroid Imbalance

- **Definition:** Immune system attacks thyroid causing hypo- or hyperthyroidism.
- **Causes:** Genetic tendency, stress, infections, gut dysbiosis.
- **Harm:** Fluctuating hormones, fatigue, mood changes, systemic inflammation.

12. Metabolic Slowdown from Thyroid Issues

- **Definition:** Reduced body metabolism due to low thyroid function.
- **Causes:** Hypothyroidism, chronic thyroiditis.
- **Harm:** Weight gain, cold hands/feet, high cholesterol, fatigue.

13. Weight Gain from Thyroid

- **Definition:** Increase in body weight due to reduced thyroid hormones.
- **Causes:** Hypothyroidism, Kapha aggravation, fluid retention.
- **Harm:** Obesity, joint strain, diabetes and heart disease risk.

14. Weight Loss from Thyroid

- **Definition:** Unintended weight loss due to excessive thyroid hormones.
- **Causes:** Hyperthyroidism, Graves' disease, overmedication.
- **Harm:** Muscle wasting, weakness, heart strain.

15. Hair Loss due to Thyroid

- **Definition:** Diffuse hair fall linked to thyroid dysfunction.
- **Causes:** Hypo/hyperthyroidism, nutrient malabsorption.
- **Harm:** Thinning hair, low self-esteem, sign of deeper hormonal issue.

16. Hormonal Irritability (Thyroid-related)

- **Definition:** Mood swings and irritability due to abnormal thyroid hormones.

- **Causes:** Hyperthyroidism, fluctuating thyroid levels.
- **Harm:** Anxiety, relationship stress, poor concentration.

17. Menstrual Issues due to Thyroid

- **Definition:** Irregular or abnormal periods caused by thyroid imbalance.
- **Causes:** Hypo- or hyperthyroidism altering reproductive hormones.
- **Harm:** Infertility, anemia, severe cramps or heavy bleeding.

18. Depression due to Thyroid

- **Definition:** Low mood linked to low thyroid activity.
- **Causes:** Hypothyroidism, chronic fatigue, hormonal shifts.
- **Harm:** Loss of interest, sleep disturbance, reduced productivity.

19. Nervousness due to Thyroid

- **Definition:** Excess anxiety and restlessness from high thyroid hormones.
- **Causes:** Hyperthyroidism, stress, Pitta aggravation.
- **Harm:** Palpitations, insomnia, poor focus, blood pressure issues.

20. Sleep Issues due to Thyroid

- **Definition:** Insomnia or oversleeping related to thyroid dysfunction.
- **Causes:** Hyperthyroid (insomnia), hypothyroid (excess sleep).
- **Harm:** Daytime fatigue, mental fog, hormonal imbalance worsening.

B. Diabetes & Prameha (21–40)

21. Prameha (Metabolic Disorders Category)

- **Definition:** Group of urinary-metabolic diseases in Ayurveda, including diabetes.

- **Causes:** Excess sweets, heavy food, sedentary lifestyle, Kapha–Medo imbalance.
- **Harm:** Obesity, diabetes, kidney damage, sexual weakness.

22. 10 Kaphaja Prameha

- **Definition:** Ten Kapha-dominant types of Prameha with oily, heavy, turbid urine.
- **Causes:** Overeating, inactivity, excess dairy/sweets, Kapha excess.
- **Harm:** Severe obesity, early diabetes, lethargy, edema.

23. 6 Pittaja Prameha

- **Definition:** Six Pitta-dominant Prameha with hot, yellow, burning urine patterns.
- **Causes:** Spicy food, alcohol, heat, Pitta aggravation.
- **Harm:** Inflammation, ulcers, liver strain, faster tissue damage.

24. 4 Vataja Prameha

- **Definition:** Four Vata-dominant Prameha, often advanced degenerative diabetes stage.
- **Causes:** Long-standing uncontrolled diabetes, tissue depletion.
- **Harm:** Nerve damage, emaciation, serious complications.

25. Madhumeha (Diabetes Mellitus)

- **Definition:** Excess sugar in blood and urine (Ayurvedic diabetic condition).
- **Causes:** Heredity, wrong diet, stress, Prameha progression.
- **Harm:** Damage to eyes, kidneys, nerves, heart, sexual function.

26. Avarana Type Diabetes

- **Definition:** Diabetes due to obstruction of Vata by Kapha, Meda, or other dhatus.
- **Causes:** Obesity, high fat, hormonal blockages.
- **Harm:** Insulin resistance, difficult-to-control sugars.

27. Obesity-induced Diabetes

- **Definition:** Type of diabetes developing due to excess body fat.
- **Causes:** Overeating, no exercise, Kapha/Medo vridhhi.
- **Harm:** Hypertension, heart disease, fatty liver, neuropathy.

28. Stress-induced Diabetes

- **Definition:** Diabetes precipitated or worsened by chronic stress.
- **Causes:** High cortisol, irregular meals, mental strain.
- **Harm:** Poor sugar control, mood swings, faster complications.

29. Pancreatic Insufficiency

- **Definition:** Reduced capacity of pancreas to produce insulin and digestive enzymes.
- **Causes:** Chronic pancreatitis, alcohol, autoimmune damage.
- **Harm:** Malabsorption, diabetes, weight loss.

30. Glucose Intolerance

- **Definition:** Body unable to handle sugar load normally (pre-diabetes stage).
- **Causes:** Insulin resistance, sedentary lifestyle.
- **Harm:** High risk of full diabetes and vascular problems.

31. Insulin Resistance

- **Definition:** Body cells do not respond properly to insulin.
- **Causes:** Belly fat, high refined carbs, low activity, cortisol excess.
- **Harm:** High blood sugar, metabolic syndrome, PCOS, fatty liver.

32. Polyuria (Excess Urination)

- **Definition:** Passing large amount of urine frequently.
- **Causes:** High blood sugar, kidney concentrating defect.
- **Harm:** Dehydration, electrolyte imbalance, fatigue.

33. Polydipsia (Excess Thirst)

- **Definition:** Persistent intense thirst.
- **Causes:** Diabetes, high salt intake, dehydration.
- **Harm:** Kidney overload, electrolyte disturbance.

34. Excess Hunger (Polyphagia)

- **Definition:** Strong persistent hunger despite eating.
- **Causes:** Diabetes, low insulin action, hormonal imbalance (ghrelin, leptin).
- **Harm:** Weight gain, obesity, poor sugar control.

35. Weight Loss Diabetes

- **Definition:** Diabetes where weight drops despite eating.
- **Causes:** Type 1 diabetes, long uncontrolled diabetes, catabolism.
- **Harm:** Muscle loss, weakness, immune compromise.

36. Ketoacidosis Equivalent

- **Definition:** Severe metabolic acidosis due to high ketone bodies in diabetics.
- **Causes:** Insulin deficiency, infections, missed medication.
- **Harm:** Dehydration, coma, life-threatening emergency.

37. Sugar in Urine (Glycosuria)

- **Definition:** Presence of glucose in urine.
- **Causes:** High blood sugar beyond kidney threshold.
- **Harm:** Urinary infections, dehydration, indicator of diabetes.

38. Fat in Urine (Medomeha)

- **Definition:** Oily, fatty, turbid urine type of Prameha.
- **Causes:** Extreme Kapha/Medo imbalance, advanced metabolic disease.
- **Harm:** Severe dyslipidemia, obesity, organ damage.

39. Turbid Urine

- **Definition:** Cloudy or thick urine.

- **Causes:** Infection, protein/fat/sugar in urine, toxins.
- **Harm:** Indicates kidney and metabolic stress.

40. Frequent Infections from Diabetes

- **Definition:** Recurrent infections due to high sugar levels.
- **Causes:** Poor immunity, high glucose feeding microbes.
- **Harm:** Slow wound healing, amputations, sepsis risk.

C. Obesity & Metabolism Disorders (41–53)

41. Sthaulya (Obesity)

- **Definition:** Excessive increase in body fat and weight.
- **Causes:** Overeating, sweet/fatty diet, sedentary lifestyle, Kapha vridhhi.
- **Harm:** Diabetes, heart disease, joint damage, infertility.

42. Medoroga (Fat Metabolism Disorder)

- **Definition:** Disease of disturbed fat tissue (Meda dhatu).
- **Causes:** Heavy/oily food, weak Agni (digestion), lack of exercise.
- **Harm:** Obesity, high cholesterol, Prameha, atherosclerosis.

43. Excess Belly Fat

- **Definition:** Central (abdominal) fat accumulation.
- **Causes:** Sugary foods, stress, lack of exercise, cortisol imbalance.
- **Harm:** Metabolic syndrome, insulin resistance, heart attack risk.

44. Slow Metabolism

- **Definition:** Reduced rate of calorie burning.

- **Causes:** Hypothyroidism, low muscle mass, chronic dieting, Kapha dominance.
- **Harm:** Weight gain, fatigue, low energy.

45. Fatty Liver (Medogarbha)

- **Definition:** Excess fat accumulation in liver cells.
- **Causes:** Obesity, high sugar, alcohol, insulin resistance.
- **Harm:** Hepatitis, cirrhosis, metabolic syndrome.

46. High Cholesterol (Meda Vriddhi)

- **Definition:** Increased cholesterol and lipids in blood.
- **Causes:** Fatty diet, low activity, genetics, Meda imbalance.
- **Harm:** Plaque formation → heart attack, stroke.

47. Triglyceride Imbalance

- **Definition:** Abnormally high blood triglyceride levels.
- **Causes:** Sugary foods, alcohol, obesity.
- **Harm:** Pancreatitis, cardiovascular disease.

48. Metabolic Syndrome

- **Definition:** Cluster of obesity, high BP, high sugar, high lipids.
- **Causes:** Poor diet, no exercise, chronic stress.
- **Harm:** Very high risk of diabetes and heart disease.

49. Weight Gain due to Kapha

- **Definition:** Obesity pattern with Kapha dominance (heaviness, lethargy).
- **Causes:** Sweet/oily food, oversleeping, inactivity.
- **Harm:** Metabolic diseases, low enthusiasm, depression.

50. Weight Loss due to Vata Imbalance

- **Definition:** Unplanned weight loss with dryness and weakness.
- **Causes:** Vata aggravation, malabsorption, emotional stress.

- **Harm:** Weak immunity, bone loss, fatigue.

51. Emotional Eating

- **Definition:** Eating in response to emotions instead of hunger.
- **Causes:** Stress, anxiety, lack of coping skills.
- **Harm:** Obesity, guilt, poor digestion.

52. Hormonal Overeating

- **Definition:** Increased appetite due to hormonal disturbances.
- **Causes:** Leptin resistance, cortisol excess, PCOS, thyroid issues.
- **Harm:** Weight gain, metabolic syndrome.

53. Stress-eating Disorder

- **Definition:** Compulsive eating triggered by stress.
- **Causes:** Chronic mental tension, poor emotional regulation.
- **Harm:** Obesity, diabetes, poor gut health.

D. Hormonal Disorders (Male & Female) (54–65)

54. Vataja Hormonal Imbalance

- **Definition:** Hormone irregularity with Vata features (variable, irregular).
- **Causes:** Stress, fear, irregular lifestyle.
- **Harm:** Irregular cycles, sleep issues, anxiety.

55. Pittaja Hormonal Imbalance

- **Definition:** Hormonal disturbance with Pitta features (heat, irritability).
- **Causes:** Overwork, anger, heat-producing diet.
- **Harm:** Acne, heavy bleeding, anger, inflammation.

56. Kaphaja Hormonal Imbalance

- **Definition:** Hormone imbalance with Kapha features (heaviness, sluggishness).
- **Causes:** Obesity, overeating, sleep excess.
- **Harm:** PCOS, infertility, hypothyroidism, depression.

57. Estrogen Imbalance

- **Definition:** Too much or too little estrogen in body.
- **Causes:** Obesity, xenoestrogens, ovarian dysfunction.
- **Harm:** Irregular periods, fibroids, mood changes, cancer risk (excess).

58. Progesterone Imbalance

- **Definition:** Deficiency or irregularity in progesterone levels.
- **Causes:** Stress, anovulatory cycles, aging.
- **Harm:** PMS, miscarriage risk, anxiety, poor sleep.

59. Testosterone Imbalance

- **Definition:** Low or high male hormone (also in females in excess).
- **Causes:** Testicular issues, PCOS, obesity, adrenal problems.
- **Harm:** Low libido, infertility in men; acne, hair growth in women.

60. Adrenal Fatigue

- **Definition:** Functional exhaustion of adrenal glands due to chronic stress.
- **Causes:** Long-term stress, poor sleep, stimulants.
- **Harm:** Fatigue, low BP, salt cravings, poor stress tolerance.

61. Cortisol Imbalance

- **Definition:** Too high or too low stress hormone levels.
- **Causes:** Chronic stress, adrenal disorders.
- **Harm:** Weight gain, insomnia, immune suppression or burnout.

62. Stress Hormone Excess

- **Definition:** Persistently high stress hormones (cortisol, adrenaline).

- **Causes:** Emotional stress, overwork, anxiety.
- **Harm:** Hypertension, diabetes, digestive issues.

63. Serotonin-Low Mood

- **Definition:** Low mood due to reduced serotonin activity.
- **Causes:** Poor gut health, stress, nutrient deficiency.
- **Harm:** Depression, anxiety, poor sleep, cravings.

64. Dopamine Deficiency

- **Definition:** Reduced dopamine neurotransmitter function.
- **Causes:** Chronic stress, addictions, poor sleep.
- **Harm:** Low motivation, pleasure loss, Parkinson-like symptoms (severe).

65. Growth Hormone Imbalance

- **Definition:** Too much or too little growth hormone.
- **Causes:** Pituitary tumors, genetic issues.
- **Harm:** Dwarfism (low), gigantism/acromegaly (high), metabolic issues.

E. Menstrual Disorders (Stree Roga) – 66 to 87

66. Artava Dushti (Menstrual Disorders)

- **Definition:** General term for abnormalities in menstruation (timing, flow, color, pain).
 - **Causes:** Dosha imbalance (Vata–Pitta–Kapha), poor diet, stress, hormonal issues.
 - **Harm:** Irregular cycles, infertility risk, anemia, chronic pelvic pain.
-

67. Vataja Artava Dushti

- **Definition:** Vata-dominant menstrual disorder with pain, scanty flow, irregular cycles.

- **Causes:** Stress, fasting, over-exercise, cold exposure.
 - **Harm:** Severe cramps, anxiety, infertility tendency.
-

68. Pittaja Artava Dushti

- **Definition:** Pitta-dominant periods with burning, bright red blood, irritability.
 - **Causes:** Spicy food, heat exposure, anger, hormonal excess.
 - **Harm:** Heavy bleeding, weakness, inflammation in pelvic organs.
-

69. Kaphaja Artava Dushti

- **Definition:** Kapha-dominant periods with thick, sticky, pale flow and heaviness.
 - **Causes:** Obesity, overeating, low metabolism.
 - **Harm:** PCOS tendency, irregular cycles, infertility.
-

70. Delayed Periods (Oligomenorrhea)

- **Definition:** Menstrual cycles longer than normal (e.g., >35–40 days).
 - **Causes:** PCOS, stress, thyroid issues, Vata/Kapha imbalance.
 - **Harm:** Hormonal disturbance, infertility risk.
-

71. Irregular Periods

- **Definition:** Cycles with unpredictable timing and flow.
 - **Causes:** Stress, weight changes, hormone imbalance, PCOS.
 - **Harm:** Difficulty conceiving, anemia, mental stress.
-

72. Heavy Bleeding (Rakta Pradar)

- **Definition:** Excessive menstrual blood loss.
 - **Causes:** Fibroids, hormonal imbalance, clotting issues, Pitta aggravation.
 - **Harm:** Anemia, fatigue, dizziness, weakness.
-

73. Scanty Bleeding (Hypomenorrhea)

- **Definition:** Very low menstrual flow.
 - **Causes:** Low hormones, Vata aggravation, malnutrition.
 - **Harm:** Infertility risk, endometrial dysfunction.
-

74. Painful Periods (Dysmenorrhea)

- **Definition:** Intense cramps during menstruation.
 - **Causes:** Vata aggravation, uterine spasms, endometriosis-like issues.
 - **Harm:** Disturbed daily life, nausea, fainting in severe cases.
-

75. PMS Symptoms (Pre-Menstrual Syndrome)

- **Definition:** Physical and emotional symptoms before periods.
 - **Causes:** Hormonal fluctuations, low serotonin, stress.
 - **Harm:** Mood swings, bloating, headaches, irritability.
-

76. PMDD-like (Severe PMS)

- **Definition:** Extreme mood and emotional disturbance pre-menstrually.
 - **Causes:** Hypersensitivity to hormonal changes.
 - **Harm:** Depression, anxiety, impaired relationships & work.
-

77. Clots During Menstruation

- **Definition:** Passage of blood clots in menstrual flow.
 - **Causes:** Heavy bleeding, fibroids, Pitta/Kapha imbalance.
 - **Harm:** Severe cramps, risk of anemia, underlying pathology indication.
-

- **Definition:** Pain in lumbar region accompanying menstruation.
 - **Causes:** Uterine contraction radiating pain, Vata aggravation.
 - **Harm:** Postural strain, fatigue, sleep disturbance.
-

78. Dark Blood

- **Definition:** Menstrual blood appearing dark brown or blackish.
 - **Causes:** Old retained blood, Vata/Kapha obstruction.
 - **Harm:** Stagnation, pain, endometrial issues.
-

83. Ovulation Pain (Mittelschmerz)

- **Definition:** Mid-cycle lower abdominal pain during ovulation.
 - **Causes:** Follicle rupture, mild peritoneal irritation.
 - **Harm:** Usually mild, but may confuse with other pelvic pain conditions.
-

79. Bright Red Blood

- **Definition:** Fresh red menstrual blood with active flow.
 - **Causes:** Pitta dominance, hypercirculation, hormonal excess.
 - **Harm:** May indicate heavy / fast flow, weakness if prolonged.
-

84. Spotting

- **Definition:** Light bleeding between periods.
 - **Causes:** Hormonal fluctuations, contraceptives, uterine pathology.
 - **Harm:** Indicates hormonal disturbance, may mask serious disease.
-

80. Brown Blood

- **Definition:** Brownish blood at start or end of periods.
 - **Causes:** Oxidized old blood, delayed shedding, Vata.
 - **Harm:** May show hormonal imbalance, pelvic congestion.
-

85. Early Puberty Hormonal Issues

- **Definition:** Onset of puberty earlier than normal with hormone imbalance.
 - **Causes:** Obesity, endocrine disruptors, genetics.
 - **Harm:** Emotional strain, height compromise, PCOS risk.
-

81. Hormonal Period Pain

- **Definition:** Period pain specifically linked with hormonal fluctuation.
 - **Causes:** Prostaglandin excess, estrogen–progesterone imbalance.
 - **Harm:** Severe cramps, vomiting, reduced daily functioning.
-

86. Late Puberty Issues

- **Definition:** Delayed puberty with late onset of menarche and development.
 - **Causes:** Malnutrition, chronic illness, hormonal defects.
 - **Harm:** Short stature, infertility risk, low self-esteem.
-

82. Lower Back Pain During Periods

87. Anovulatory Cycles

- **Definition:** Menstrual cycles where ovulation does not occur.
 - **Causes:** PCOS, stress, thyroid issues, obesity.
 - **Harm:** Infertility, irregular bleeding, endometrial thickening.
-

F. Female Reproductive System Diseases (88–110)

88. Yoni Roga (Vaginal Diseases)

- **Definition:** Group of disorders affecting vagina and related structures.
 - **Causes:** Infections, poor hygiene, dosha imbalance.
 - **Harm:** Discharge, itching, pain, sexual discomfort.
-

89. Vataja Yoni Roga

- **Definition:** Vaginal disorders dominated by dryness, pain, and roughness.
 - **Causes:** Vata aggravation, low estrogen, dehydration.
 - **Harm:** Dyspareunia (painful intercourse), microtears.
-

90. Pittaja Yoni Roga

- **Definition:** Vaginal disorders with burning, redness, and heat.
 - **Causes:** Infections, Pitta aggravation, irritants.
 - **Harm:** Burning pain, ulcers, intense discomfort.
-

91. Kaphaja Yoni Roga

- **Definition:** Vaginal disorders with thick discharge and itching.
- **Causes:** Fungal infections, Kapha excess, sweetness in diet.

- **Harm:** Chronic discharge, foul smell, discomfort.
-

92. Vaginal Dryness

- **Definition:** Lack of natural lubrication inside vagina.
 - **Causes:** Low estrogen (menopause), Vata aggravation, stress.
 - **Harm:** Painful intercourse, microtears, increased infection risk.
-

93. Vaginal Burning

- **Definition:** Burning sensation in vaginal area.
 - **Causes:** Infections, allergic reactions, Pittaja conditions.
 - **Harm:** Difficulty sitting/urinating, disturbed sexual life.
-

94. White Discharge (Shweta Pradar)

- **Definition:** Excessive non-bloody whitish vaginal discharge.
 - **Causes:** Kapha/Ama accumulation, infections, hormonal imbalance.
 - **Harm:** Weakness, backache, anemia, discomfort.
-

95. Chronic Discharge

- **Definition:** Long-standing abnormal vaginal discharge.
 - **Causes:** Untreated infections, cervical erosion, hormonal problems.
 - **Harm:** Persistent irritation, low confidence, nutritional depletion.
-

96. Foul-Smelling Discharge

- **Definition:** Vaginal discharge with bad odor.

- **Causes:** Bacterial infection, poor hygiene, retained products.
 - **Harm:** Infection spread, social embarrassment.
-

- **Definition:** Fluid-filled sacs in or on ovaries.
 - **Causes:** Hormonal imbalance, anovulation, PCOS.
 - **Harm:** Pain, irregular cycles, torsion risk.
-

97. Vaginal Infections (Ayurvedic Equivalents)

- **Definition:** Microbial infections affecting vagina (bacterial, fungal, etc.).
 - **Causes:** Poor hygiene, immunity loss, sexual transmission.
 - **Harm:** Itching, ulcers, discharge, pelvic infections.
-

98. Pelvic Inflammation

- **Definition:** Inflammation of uterus, tubes, ovaries (PID-like).
 - **Causes:** STIs, untreated vaginal infections.
 - **Harm:** Severe pain, tubal blockage, infertility.
-

99. Uterus Swelling

- **Definition:** Enlarged uterus due to infection, fibroids, or hormonal causes.
 - **Causes:** Fibroids, adenomyosis, chronic inflammation.
 - **Harm:** Heavy periods, pain, pressure on bladder/bowel.
-

100. Uterus Fibroids (Arbuda Type)

- **Definition:** Non-cancerous growths in or on uterine wall.
 - **Causes:** Estrogen dominance, genetics, Kapha excess.
 - **Harm:** Heavy bleeding, infertility, miscarriage risk.
-

101. Ovarian Cysts

102. PCOS (Polycystic Ovarian Syndrome)

- **Definition:** Hormonal-metabolic disorder with cystic ovaries, irregular periods, and androgen excess.
 - **Causes:** Insulin resistance, Kapha–Medo vriddhi, stress.
 - **Harm:** Infertility, obesity, diabetes, hirsutism, acne.
-

103. Hormonal Infertility (Female)

- **Definition:** Inability to conceive due to hormone problems.
 - **Causes:** Thyroid disorders, PCOS, low progesterone, high prolactin.
 - **Harm:** Delayed pregnancy, miscarriages, emotional stress.
-

104. Fallopian Tube Blockages

- **Definition:** Obstruction in tubes connecting ovaries to uterus.
 - **Causes:** PID, endometriosis, post-surgical adhesions.
 - **Harm:** Infertility, ectopic pregnancy risk.
-

105. Painful Ovulation

- **Definition:** Significant pain during egg release.
 - **Causes:** Ovarian cysts, adhesions, high sensitivity.
 - **Harm:** Monthly discomfort, anxiety around cycles.
-

106. Early Menopause

- **Definition:** Stoppage of periods before normal age (<40).
 - **Causes:** Genetics, autoimmune, surgery, chemo.
 - **Harm:** Infertility, osteoporosis, hot flashes, mood issues.
-

107. Late Menopause

- **Definition:** Menopause occurring later than usual (>55).
 - **Causes:** Genetic, hormonal variations.
 - **Harm:** Slightly higher risk of estrogen-related cancers.
-

108. Vaginal Tearing (Vata Issue)

- **Definition:** Micro or larger tears in vaginal wall.
 - **Causes:** Childbirth, dryness, rough intercourse, Vata dryness.
 - **Harm:** Pain, infections, scarring.
-

109. Endometriosis-like Condition

- **Definition:** Endometrial-like tissue growing outside the uterus.
 - **Causes:** Retrograde menstruation, hormonal and immune factors.
 - **Harm:** Severe pelvic pain, infertility, adhesions.
-

110. Adenomyosis-like Condition

- **Definition:** Endometrial tissue within uterine muscle wall.
 - **Causes:** Hormonal imbalance, repeated pregnancies, surgeries.
 - **Harm:** Heavy painful periods, enlarged uterus, anemia.
-

G. Pregnancy Disorders (Garbha Roga) – 111 to 126

111. Garbhasrava (Miscarriage)

- **Definition:** Spontaneous loss of pregnancy in early months.
 - **Causes:** Hormonal insufficiency, genetic defects, infections, stress.
 - **Harm:** Emotional trauma, blood loss, future pregnancy anxiety.
-

112. Garbha Pata (Recurrent Miscarriage)

- **Definition:** Repeated pregnancy losses.
 - **Causes:** Uterine defects, hormonal issues, autoimmune factors.
 - **Harm:** Infertility, deep psychological impact.
-

113. Preterm Labor

- **Definition:** Labor before full-term gestation.
 - **Causes:** Infections, cervical incompetence, stress.
 - **Harm:** Premature baby with organ immaturity, neonatal complications.
-

114. Garbhini Pitta (Excess Heat in Pregnancy)

- **Definition:** Pitta aggravation in pregnant woman (excess heat, irritability).
 - **Causes:** Hot foods, overexertion, stress.
 - **Harm:** Skin issues, heat intolerance, risk of complications.
-

115. Garbhini Shotha (Swelling in Pregnancy)

- **Definition:** Edema in feet, legs, sometimes whole body.
- **Causes:** Fluid retention, anemia, preeclampsia.

- **Harm:** High BP risk, discomfort, danger if severe.
-

- **Harm:** Mood changes, cravings, sleep disturbance.
-

116. Morning Sickness

- **Definition:** Nausea/vomiting in early pregnancy.
 - **Causes:** Hormonal changes (hCG, estrogen), sensitive digestion.
 - **Harm:** Dehydration, weight loss if severe.
-

121. Low Fetal Growth (IUGR-like)

- **Definition:** Baby grows slower than normal inside womb.
 - **Causes:** Poor placental blood flow, malnutrition, maternal illness.
 - **Harm:** Low birth weight, developmental issues.
-

117. Pregnancy Constipation

- **Definition:** Difficulty passing stools during pregnancy.
 - **Causes:** Progesterone-induced slowing, iron tablets, reduced movement.
 - **Harm:** Piles, discomfort, abdominal pain.
-

122. Breech Position (Vata Imbalance)

- **Definition:** Baby positioned feet/buttocks downward instead of head.
 - **Causes:** Vata imbalance, uterine shape issues, low fluid.
 - **Harm:** Complicated delivery, need for C-section.
-

118. Pregnancy Anemia

- **Definition:** Low hemoglobin during pregnancy.
 - **Causes:** Increased demand, poor diet, iron deficiency.
 - **Harm:** Low energy, risk during delivery, low birth weight.
-

123. Severe Nausea (Hyperemesis)

- **Definition:** Excessive vomiting beyond normal morning sickness.
 - **Causes:** Hormonal extremes, sensitivity.
 - **Harm:** Severe dehydration, hospitalization.
-

119. Pregnancy Diabetes (Gestational)

- **Definition:** High blood sugar arising during pregnancy.
 - **Causes:** Insulin resistance from pregnancy hormones.
 - **Harm:** Big baby (macrosomia), birth complications, future diabetes in mother & child.
-

124. Threatened Abortion

- **Definition:** Bleeding or cramping indicating risk of miscarriage.
 - **Causes:** Placental issues, hormonal deficiency.
 - **Harm:** Anxiety, potential pregnancy loss.
-

120. Hormonal Fluctuations in Pregnancy

- **Definition:** Strong shifts in hormone levels.
- **Causes:** Natural pregnancy process, stress.

125. Excessive Bleeding in Pregnancy

- **Definition:** Dangerous amount of vaginal bleeding during pregnancy.
- **Causes:** Placenta previa, abruption, miscarriages.

- **Harm:** Shock, fetal death, maternal emergency.
-

126. Emotional Instability in Pregnancy

- **Definition:** Strong mood swings and emotional sensitivity.
 - **Causes:** Hormonal shifts, stress, past trauma.
 - **Harm:** Anxiety, depression, bonding difficulties.
-

H. Infertility Disorders – 127 to 143

127. Vandhyatva (Infertility)

- **Definition:** Inability to conceive even after sufficient time.
 - **Causes:** Male, female, or combined factors (hormonal, anatomical, psychological).
 - **Harm:** Emotional stress, relationship strain.
-

128. Vataja Infertility

- **Definition:** Infertility due to Vata imbalance (irregular cycles, weak implantation).
 - **Causes:** Stress, underweight, overwork.
 - **Harm:** Repeated conception failure.
-

129. Pittaja Infertility

- **Definition:** Infertility with Pitta dominance (heat, inflammation).
 - **Causes:** Infections, high heat, autoimmune conditions.
 - **Harm:** Tubal damage, egg or sperm damage.
-

130. Kaphaja Infertility

- **Definition:** Infertility associated with Kapha (obesity, sluggish cycles).
 - **Causes:** PCOS, obesity, hypothyroidism.
 - **Harm:** Anovulation, poor sperm motility.
-

131. Male Infertility

- **Definition:** Inability to impregnate due to male factors.
 - **Causes:** Low sperm count, poor motility, hormonal issues.
 - **Harm:** Failed conception, psychological stress.
-

132. Female Infertility

- **Definition:** Inability to conceive due to female factors.
 - **Causes:** PCOS, tubal block, hormonal imbalances.
 - **Harm:** Repeated failure to conceive, emotional distress.
-

133. Fallopian Tube Blockage Infertility

- **Definition:** Tube blockage prevents sperm-egg meeting.
 - **Causes:** PID, adhesions, endometriosis.
 - **Harm:** Infertility, ectopic pregnancy risk.
-

134. Low Egg Quality

- **Definition:** Poor quality of ova/eggs.
 - **Causes:** Age, oxidative stress, hormonal imbalance.
 - **Harm:** Miscarriages, IVF failure, infertility.
-

135. Low Sperm Count

- **Definition:** Sperm count below normal fertile levels.

- **Causes:** Heat, varicocele, toxins, hormonal issues.
 - **Harm:** Reduced chance of conception.
-

136. Low Sperm Motility

- **Definition:** Reduced sperm movement.
 - **Causes:** Varicocele, infections, oxidative stress.
 - **Harm:** Difficulty reaching egg → infertility.
-

137. Abnormal Sperm Morphology

- **Definition:** Sperm with abnormal shape/structure.
 - **Causes:** Toxins, genetics, varicocele.
 - **Harm:** Poor fertilization ability.
-

138. Stress-induced Infertility

- **Definition:** Infertility primarily related to mental stress.
 - **Causes:** Chronic anxiety, overthinking, HPA axis disturbance.
 - **Harm:** Hormonal axis disruption, reduced libido.
-

139. Thyroid-induced Infertility

- **Definition:** Infertility due to thyroid dysfunction.
 - **Causes:** Hypo/hyperthyroidism, autoimmune thyroid disease.
 - **Harm:** Anovulation, low sperm quality, miscarriages.
-

140. PCOS-induced Infertility

- **Definition:** Infertility caused by PCOS-related ovulation problems.
- **Causes:** Insulin resistance, Kapha/Medo imbalance.

- **Harm:** No ovulation, irregular cycles, failed conception.
-

141. Ejaculation Disorders

- **Definition:** Problems in timing or ability of ejaculation.
 - **Causes:** Anxiety, nerve issues, hormonal, medication.
 - **Harm:** Infertility, sexual dissatisfaction.
-

142. Hormonal Infertility

- **Definition:** Infertility due to hormone axis imbalance (hypothalamus–pituitary–gonad).
 - **Causes:** Stress, thyroid, pituitary lesions.
 - **Harm:** No ovulation/spermatogenesis, infertility.
-

143. Unknown (Unexplained) Infertility

- **Definition:** Infertility with no clear cause after tests.
 - **Causes:** Subtle factors (egg-sperm interaction, implantation defects, subtle hormones).
 - **Harm:** Frustration, emotional burnout.
-

I. Male Reproductive System Diseases – 144 to 158

144. Shukra Dhatu Dushti

- **Definition:** Impairment in quality/quantity of reproductive tissue (semen).
 - **Causes:** Poor diet, stress, excess sex, toxins.
 - **Harm:** Low fertility, sexual weakness.
-

145. Shukra Kshaya (Low Sperm)

- **Definition:** Deficiency of semen volume and sperm content.
 - **Causes:** Over-exertion, long illness, addictions.
 - **Harm:** Infertility, low sexual strength.
-

- **Definition:** Dilated veins in scrotum around testes.
 - **Causes:** Valve dysfunction in scrotal veins.
 - **Harm:** High testicular temperature, low sperm quality.
-

146. Shukra Vriddhi (Excess)

- **Definition:** Abnormal increase of seminal fluid.
 - **Causes:** Kapha dominance, lack of control, hypersexual activity.
 - **Harm:** Weakness, energy loss, mental dullness.
-

151. Epididymitis-like Condition

- **Definition:** Inflammation of tube behind testis.
 - **Causes:** Infection, STIs.
 - **Harm:** Testicular pain, swelling, infertility risk.
-

147. Erectile Dysfunction (Klaibya)

- **Definition:** Inability to achieve or maintain erection.
 - **Causes:** Stress, vascular disease, diabetes, performance anxiety.
 - **Harm:** Sexual dissatisfaction, low self-esteem, infertility.
-

152. Testicular Pain

- **Definition:** Pain localized to one or both testes.
 - **Causes:** Infection, trauma, torsion, varicocele.
 - **Harm:** Severe discomfort, risk of testicular damage.
-

148. Premature Ejaculation

- **Definition:** Ejaculation occurs sooner than desired.
 - **Causes:** Anxiety, hypersensitivity, Vata aggravation.
 - **Harm:** Relationship problems, reduced conception chances.
-

153. Testicular Swelling

- **Definition:** Enlargement of testis or surrounding sac.
 - **Causes:** Infection, fluid collection (hydrocele), tumor.
 - **Harm:** Pain, heaviness, fertility issues, cancer risk (rare).
-

149. Prostate Swelling (Mutraghata-related)

- **Definition:** Enlarged prostate obstructing urine flow.
 - **Causes:** Aging, hormonal changes, inflammation.
 - **Harm:** Poor urine flow, infection, bladder damage.
-

154. Low Libido

- **Definition:** Decreased sexual desire.
 - **Causes:** Stress, low testosterone, depression, chronic disease.
 - **Harm:** Relationship strain, low confidence.
-

150. Varicocele-like Condition

155. Excess Libido

- **Definition:** Excessive sexual drive.

- **Causes:** Hormonal imbalances, psychological factors, addictive habits.
 - **Harm:** Risky behavior, energy depletion, relationship conflict.
-

156. Penile Dryness (Vata)

- **Definition:** Lack of moisture in penile skin, causing roughness.
 - **Causes:** Vata aggravation, dehydration, skin conditions.
 - **Harm:** Pain during intercourse, micro-tears.
-

157. Penile Burning (Pitta)

- **Definition:** Burning sensation in or on penis.
 - **Causes:** Infections, irritant chemicals, Pitta aggravation.
 - **Harm:** Pain with urination/sex, ulceration.
-

158. Penile Discharge (Kapha)

- **Definition:** Abnormal discharge from penis.
 - **Causes:** STIs, infections, Kapha involvement.
 - **Harm:** Infection spread, urinary discomfort, infertility risk.
-

J. Urinary System Disorders – 159 to 178

159. Mutra Krichra (Painful Urination – 8 Types)

- **Definition:** Difficulty and pain during urination.
- **Causes:** Infection, stones, obstruction, hot Pitta urine.
- **Harm:** Burning, frequency, kidney stress.

160. Mutra Aavrodha (Urine Obstruction)

- **Definition:** Incomplete or obstructed urine flow.
 - **Causes:** Stones, prostate enlargement, strictures.
 - **Harm:** Bladder distension, infection, kidney damage.
-

161. Mutraghata (Urine Retention)

- **Definition:** Inability to pass urine despite full bladder.
 - **Causes:** Nerve damage, obstruction, severe prostate enlargement.
 - **Harm:** Severe pain, bladder rupture, urgent medical emergency.
-

162. Mutra AtiPravrutti (Excess Urine)

- **Definition:** Passing more urine than normal.
 - **Causes:** Diabetes, diuretics, kidney concentrating defects.
 - **Harm:** Dehydration, electrolyte imbalance.
-

163. Mutra AlpaPravrutti (Less Urine)

- **Definition:** Low urine output.
 - **Causes:** Dehydration, kidney disease, obstruction.
 - **Harm:** Toxin accumulation, edema.
-

164. Mutra Daaha (Burning Urine)

- **Definition:** Burning sensation while urinating.
- **Causes:** UTI, Pitta aggravation, concentrated urine.
- **Harm:** Pain, reluctance to drink/urinate, kidney infection risk.

165. Mutra Rakta (Blood in Urine)

- **Definition:** Presence of blood in urine.
- **Causes:** Stones, infections, tumors, trauma.
- **Harm:** Anemia, serious pathology indication.

166. Cloudy Urine

- **Definition:** Turbid or opaque urine.
- **Causes:** Infection, pus, crystals, protein in urine.
- **Harm:** Signals kidney/bladder disease.

167. Foamy Urine

- **Definition:** Urine that appears bubbly or foamy.
- **Causes:** Protein loss (proteinuria), strong stream, detergents.
- **Harm:** Kidney damage if due to protein loss.

168. Smelly Urine

- **Definition:** Foul smell in urine.
- **Causes:** Infection, certain foods, concentrated urine.
- **Harm:** Indicates infection/toxins; discomfort & embarrassment.

169. Kidney Disease Early

- **Definition:** Early-stage damage to kidney function.
- **Causes:** Diabetes, hypertension, toxins, infections.
- **Harm:** No symptoms initially → progressive kidney failure.

170. Kidney Stone (Ashmari – 4 Types)

- **Definition:** Hard crystalline deposits forming in kidneys/urinary tract.
- **Causes:** Dehydration, high salts, metabolic disorders.
- **Harm:** Severe colicky pain, obstruction, infections.

171. Bladder Infection (Cystitis)

- **Definition:** Infection/inflammation of urinary bladder.
- **Causes:** Bacterial entry via urethra, poor hygiene.
- **Harm:** Burning, urgency, pelvic pain.

172. Urinary Tract Infection (UTI)

- **Definition:** Infection anywhere in urinary tract.
- **Causes:** Bacteria, stones, structural abnormalities.
- **Harm:** Fever, flank pain, kidney damage if untreated.

173. Weak Bladder

- **Definition:** Bladder muscles lose strength and control.
- **Causes:** Aging, nerve issues, childbirth damage.
- **Harm:** Incomplete emptying, recurrent infections.

174. Frequent Urination

- **Definition:** Need to urinate many times per day.
- **Causes:** Diabetes, UTI, weak bladder, anxiety.
- **Harm:** Sleep disturbance, anxiety, dehydration risk.

175. Night Urination (Nocturia)

- **Definition:** Waking up multiple times at night to urinate.
 - **Causes:** Diabetes, heart failure, prostate enlargement.
 - **Harm:** Poor sleep, fatigue, fall risk at night.
-

176. Incontinence

- **Definition:** Involuntary leakage of urine.
 - **Causes:** Weak pelvic floor, nerve issues, aging.
 - **Harm:** Social embarrassment, skin irritation.
-

177. Dribbling Urine

- **Definition:** Slow or incomplete urinary flow with drops at end.
 - **Causes:** Prostate problems, urethral narrowing.
 - **Harm:** Infection risk, discomfort, incomplete emptying.
-

178. Prostatitis-like

- **Definition:** Inflammation of prostate with pain and urinary symptoms.
 - **Causes:** Infection, pelvic tension.
 - **Harm:** Pelvic pain, painful ejaculation, urinary difficulty.
-

K. Metabolic Disorders (other than Diabetes) – 179 to 193

179. High Uric Acid

- **Definition:** Elevated uric acid in blood.
 - **Causes:** High meat/purine diet, kidney underexcretion.
 - **Harm:** Gout, kidney stones.
-

180. Vatarakta (Gout)

- **Definition:** Vata + Rakta disorder similar to gout with joint uric acid deposits.
 - **Causes:** Rich food, alcohol, lack of exercise.
 - **Harm:** Severe joint pain, deformity.
-

181. Hormonal Weight Fluctuation

- **Definition:** Significant weight changes driven by hormonal shifts.
 - **Causes:** Thyroid, PCOS, stress hormones.
 - **Harm:** Metabolic instability, psychological distress.
-

182. Mineral Deficiency Disorders

- **Definition:** Diseases due to lack of essential minerals.
 - **Causes:** Poor diet, malabsorption, excess losses.
 - **Harm:** Weak bones, cramps, immune issues.
-

183. Vitamin Deficiency Disorders

- **Definition:** Health issues caused by lack of vitamins.
 - **Causes:** Inadequate intake, malabsorption, alcoholism.
 - **Harm:** Anemia, neuropathy, skin problems, poor immunity.
-

184. Iron Deficiency

- **Definition:** Low iron stores in body.
 - **Causes:** Blood loss, poor diet, poor absorption.
 - **Harm:** Anemia, fatigue, hair fall, breathlessness.
-

185. Zinc Deficiency

- **Definition:** Inadequate zinc levels.
 - **Causes:** Poor diet, malabsorption, high phytate foods.
 - **Harm:** Poor immunity, hair loss, delayed healing.
-

186. Calcium Deficiency

- **Definition:** Low calcium availability in body.
 - **Causes:** Low intake, Vit D deficiency, hormonal issues.
 - **Harm:** Bone pain, osteoporosis, muscle spasms.
-

187. B12 Deficiency

- **Definition:** Deficiency of vitamin B12.
 - **Causes:** Vegetarian diet, malabsorption, pernicious anemia.
 - **Harm:** Nerve damage, anemia, fatigue.
-

188. Protein Deficiency

- **Definition:** Inadequate protein intake or absorption.
 - **Causes:** Poor diet, digestive issues, poverty.
 - **Harm:** Muscle wasting, edema, poor immunity.
-

189. Electrolyte Imbalance

- **Definition:** Abnormal levels of sodium, potassium, etc.
 - **Causes:** Diarrhea, vomiting, kidney issues, drugs.
 - **Harm:** Arrhythmia, cramps, confusion.
-

190. Water Retention (Kapha)

- **Definition:** Excess fluid accumulation in tissues.

- **Causes:** Kapha imbalance, heart/kidney issues, high salt.
 - **Harm:** Swelling, high BP, discomfort.
-

191. Dehydration (Vata)

- **Definition:** Deficiency of water in body tissues.
 - **Causes:** Less intake, diarrhea, fever, Vata aggravation.
 - **Harm:** Low BP, dizziness, kidney injury.
-

192. Heat Imbalance (Pitta)

- **Definition:** Excess heat in body leading to Pitta symptoms.
 - **Causes:** Hot climate, spicy food, anger.
 - **Harm:** Skin rashes, acidity, irritability.
-

193. Chronic Metabolic Fatigue

- **Definition:** Long-standing tiredness from metabolic overload or weakness.
 - **Causes:** Diabetes, thyroid issues, nutrient deficiency.
 - **Harm:** Low productivity, poor healing, mood disorders.
-

L. Breast Disorders – 194 to 200

194. Breast Tenderness

- **Definition:** Painful or sensitive breasts.
 - **Causes:** Hormonal fluctuations (PMS, pregnancy), fibrocystic changes.
 - **Harm:** Discomfort, anxiety about breast health.
-

195. Fibrocystic Breast

- **Definition:** Lumpy, tender breast tissue with benign cystic changes.
 - **Causes:** Estrogen/progesterone imbalance.
 - **Harm:** Pain, confusion with serious disease, anxiety.
-

196. Breast Swelling

- **Definition:** Local or generalized increase in breast size.
 - **Causes:** Hormonal changes, infection, trauma.
 - **Harm:** Discomfort, difficulty wearing clothes.
-

197. Breast Discharge

- **Definition:** Fluid coming out of nipple (other than milk).
 - **Causes:** Hormonal imbalance, infections, tumors.
 - **Harm:** May indicate serious disease, infection risk.
-

198. Breast Lumps

- **Definition:** Palpable masses in breast tissue.
 - **Causes:** Cysts, fibroadenoma, cancer (some cases).
 - **Harm:** Cancer risk, anxiety, need for evaluation.
-

199. Breast Infection (Mastitis-like)

- **Definition:** Infection of breast tissue, often in lactation.
 - **Causes:** Bacterial entry via cracks, milk stasis.
 - **Harm:** Fever, abscess formation, pain.
-

200. Hormonal Breast Pain

- **Definition:** Breast pain related to hormone changes in cycle.
- **Causes:** PMS, high estrogen, low progesterone.
- **Harm:** Monthly discomfort, worry about breast disease.

CATEGORY 7 — Reproductive System Diseases (Male + Female)

A. FEMALE REPRODUCTIVE SYSTEM DISEASES (ARTAVA ROGAS)

1. Artavakshaya – scanty periods

Definition: Very low menstrual bleeding.
Causes: Vata aggravation, low hormones, malnutrition, stress.
Harm: Infertility risk, hormonal imbalance, pelvic pain.

2. Atyartava – heavy periods

Definition: Excessive or prolonged menstrual bleeding.
Causes: Fibroids, hormonal imbalance, Pitta aggravation, clotting issues.
Harm: Anemia, fatigue, dizziness, weakness.

3. Nashta Artava – no menstruation (amenorrhea)

Definition: Complete absence of menstruation (beyond normal age range).
Causes: Hormonal failure, PCOS, thyroid issues, low body weight, stress.
Harm: Infertility, bone loss, hormonal disturbance.

4. Kritrima Artava – irregular periods

Definition: Unpredictable menstrual cycle timing/flow.
Causes: Stress, PCOS, thyroid disease, poor lifestyle.
Harm: Infertility risk, anemia, mood swings.

5. Vataja Artava Dushti

Definition: Menstrual disorder with pain, dryness, scant flow.

Causes: Excess Vata, fasting, overwork, fear/stress.
Harm: Severe cramps, irregular cycles, conception difficulty.

6. Pittaja Artava Dushti

Definition: Menstruation with burning, bright red blood, heat.
Causes: Pitta aggravation, spicy food, heat exposure.
Harm: Heavy bleeding, irritability, inflammation.

7. Kaphaja Artava Dushti

Definition: Menstrual flow thick, sticky, pale with heaviness.
Causes: Kapha excess, obesity, sluggish metabolism.
Harm: PCOS pattern, infertility, fatigue.

8. Ruksha Artava

Definition: Dry, scanty, painful menstrual flow.
Causes: Vata increase, dehydration, poor diet.
Harm: Severe cramps, poor uterine cleansing.

9. Picchila Artava

Definition: Thick, sticky menstrual blood.
Causes: Kapha/Ama accumulation, sluggish uterus.
Harm: Clots, pelvic congestion, infertility risk.

10. Raktabhinandana

Definition: Menstrual blood retained or not flowing properly.
Causes: Vata obstruction, uterine spasm, structural blocks.
Harm: Pelvic pain, endometrial problems, cysts.

11. Dysmenorrhea (Kashta Artava)

Definition: Very painful menstruation.
Causes: Strong uterine contractions,

endometriosis, Vata aggravation.

Harm: Vomiting, fainting, missed work/study.

12. Clotting During Periods

Definition: Passage of blood clots in menstrual flow.

Causes: Heavy bleeding, fibroids, Kapha-Pitta imbalance.

Harm: Severe cramps, anemia, uterine pathology.

13. Early Periods (Vridhhi Artava)

Definition: Menstruation occurs earlier than normal cycle repeatedly.

Causes: Pitta excess, estrogen excess, stress.

Harm: Anemia, hormonal instability.

14. Delayed Periods (Anartava)

Definition: Menstruation markedly delayed or very infrequent.

Causes: Vata/Kapha imbalance, PCOS, thyroid, weight changes.

Harm: Infertility, hormonal imbalance, thickened endometrium.

15. Spotting (Upadrava)

Definition: Light bleeding between normal periods.

Causes: Hormonal fluctuations, contraceptives, cervical lesions.

Harm: Worry, anemia risk, sign of underlying disease.

16. Premenstrual Syndrome (PMS)

Definition: Emotional and physical symptoms before periods.

Causes: Hormonal shifts, low serotonin, stress.

Harm: Irritability, mood changes, bloating, headache.

17. Depression Before Periods

Definition: Depressed mood specifically in premenstrual phase.

Causes: Progesterone/serotonin imbalance, stress.

Harm: Low motivation, social withdrawal, risk of PMDD.

18. Breast Pain Before Periods

Definition: Tenderness and pain in breasts premenstrually.

Causes: Hormonal fluid retention, estrogen dominance.

Harm: Discomfort, anxiety, sleep problems.

19. Hormonal Cycle Disruption

Definition: Disturbed balance of cyclic female hormones.

Causes: Stress, thyroid/PCOS, crash dieting, lack of sleep.

Harm: Irregular periods, acne, hair fall, infertility.

20. Dark Thick Menstrual Blood

Definition: Menstrual blood appearing dark and dense.

Causes: Stagnant uterine blood, Vata/Kapha obstruction.

Harm: Pain, clot formation, poor uterine cleansing.

21. Bright Red Excessive Bleeding

Definition: Very red fresh blood with heavy flow.

Causes: Pitta aggravation, fibroids, hormonal excess.

Harm: Fast anemia, fatigue, dizziness.

22. Profuse Bleeding with Clots

Definition: Very heavy menstrual flow with many clots.

Causes: Fibroids, adenomyosis, hormonal imbalance.

Harm: Severe anemia, weakness, risk of hospitalization.

23. Brown Scanty Bleeding

Definition: Little brownish spotting or flow.

Causes: Old retained blood, Vata dryness, weak endometrium.

Harm: Poor shedding, infertility risk.

24. Secondary Amenorrhea

Definition: Periods stop after having been normal earlier.

Causes: Pregnancy, stress, weight loss, hormonal disease.

Harm: Infertility, bone loss, metabolic disturbance.

25. Oligomenorrhea (Long Cycle)

Definition: Menstrual cycles longer than normal (e.g., >35–40 days).

Causes: PCOS, thyroid, Vata/Kapha imbalance.

Harm: Reduced ovulation, infertility concerns.

26. Polymenorrhea (Short Cycle)

Definition: Frequent periods with short cycle length (<21 days).

Causes: Hormonal imbalance, low progesterone, Pitta excess.

Harm: Anemia, fatigue, emotional stress.

27. Leiomyoma-related Bleeding

Definition: Bleeding due to uterine muscle tumors (fibroids).

Causes: Estrogen excess, Kapha growth tendency.

Harm: Heavy bleeding, pelvic pressure, infertility.

28. Fibroid Bleeding

Definition: Menstrual and intermenstrual bleeding caused by fibroids.

Causes: Uterine fibroids disturbing endometrium.

Harm: Severe anemia, pain, miscarriage risk.

29. Endometrial Dysfunction

Definition: Abnormal function or structure of uterine lining.

Causes: Hormonal imbalance, chronic inflammation, obesity.

Harm: Infertility, irregular bleeding, hyperplasia risk.

30. Adenomyosis Symptoms

Definition: Painful heavy periods due to endometrial tissue in uterine muscle.

Causes: Hormonal factors, repeated pregnancies, surgeries.

Harm: Severe cramps, heavy bleed, anemia.

31. Anemia Due to Excessive Bleeding

Definition: Low hemoglobin caused by heavy periods.

Causes: Chronic menorrhagia, poor iron intake.

Harm: Fatigue, breathlessness, poor concentration.

32. Post-menstrual Spotting

Definition: Light bleeding after the main period ends.

Causes: Hormonal imbalance, cervical/endometrial issues.

Harm: Indicates endometrial/cervical pathology, anxiety.

33. PCOD-related Menstrual Issues

Definition: Menstrual irregularities specifically due to PCOD/PCOS.

Causes: Insulin resistance, Kapha–Medo vriddhi.

Harm: Irregular cycles, infertility, metabolic disease.

34. Hormonal Imbalance Syndrome (Periods)

Definition: Cluster of menstrual, mood, and weight symptoms from disturbed hormones.

Causes: Thyroid, PCOS, stress, poor diet.

Harm: Infertility, obesity, mental health problems.

35. Stress-induced Cycle Disruption

Definition: Menstrual irregularity mainly driven by stress.

Causes: Chronic mental strain, overwork, emotional trauma.

Harm: Amenorrhea/irregular cycles, fertility issues.

2. UTERUS DISORDERS (36–70)

36. Garbhashaya Shotha – Uterus Swelling

Definition: Inflammation or enlargement of uterus.

Causes: Infection, fibroids, adenomyosis, hormonal changes.

Harm: Pelvic pain, heavy periods, pressure on bladder/bowel.

37. Garbhashaya Vidradhi – Uterine Abscess

Definition: Pus-filled cavity within uterus.

Causes: Severe infection, post-abortion/septic conditions.

Harm: High fever, sepsis, infertility, life-threatening risk.

38. Uterine Fibroid (Arbuda)

Definition: Non-cancerous tumor in uterine muscle wall.

Causes: Estrogen dominance, genetics, Kapha growth.

Harm: Heavy bleeding, pain, infertility, miscarriage.

39. Polyps (Endometrial/Cervical)

Definition: Small overgrowths of tissue in uterus or cervix.

Causes: Hormonal overstimulation, chronic irritation.

Harm: Irregular bleeding, spotting, infertility.

40. Prolapsed Uterus

Definition: Uterus descends downward into vagina.

Causes: Weak pelvic floor, multiple deliveries, aging.

Harm: Pelvic pressure, urinary issues, sexual discomfort.

41. Uterine Cysts

Definition: Fluid-filled sacs in uterine wall or cavity.

Causes: Hormonal imbalance, inflammation.

Harm: Pain, irregular bleeding.

42. Endometriosis (Yoni Kanda)

Definition: Endometrial-like tissue outside uterus.

Causes: Retrograde flow, immune/hormonal factors.

Harm: Severe pain, adhesions, infertility.

43. Adenomyosis

Definition: Endometrial tissue inside uterine muscle layer.

Causes: Hormonal factors, repeated childbirth,

surgery.

Harm: Very heavy painful periods, enlarged uterus.

44. Chronic Pelvic Pain

Definition: Pelvis pain lasting >6 months.

Causes: Endometriosis, PID, nerve sensitization.

Harm: Sleep issues, depression, sexual dysfunction.

45. Uterine Infections (Yoni Roga affecting uterus)

Definition: Infection of uterine lining or cavity.

Causes: STIs, unsafe procedures, poor hygiene.

Harm: PID, infertility, chronic pain.

46. UTI-related Uterine Symptoms

Definition: Urinary infection causing referred pelvic/uterine pain.

Causes: Bacterial UTI.

Harm: Burning urine, pelvic discomfort, kidney infection risk.

47. Retroverted Uterus Issues

Definition: Uterus tilted backward causing symptoms.

Causes: Congenital, adhesions, endometriosis.

Harm: Backache, dyspareunia, fertility issues (sometimes).

48. Congestion in Uterus

Definition: Pelvic blood stagnation in uterine region.

Causes: Lack of movement, chronic constipation, Kapha/Vata.

Harm: Pain, varicose-like veins, heavy periods.

49. Uterine Tumours (Non-specific)

Definition: Abnormal tissue growths in uterus.

Causes: Hormonal imbalance, genetic predisposition.

Harm: Bleeding, pressure symptoms, cancer risk in some.

50. Uterine Cancer Equivalent (Asadhya Arbuda)

Definition: Malignant tumor of uterus.

Causes: Uncontrolled cell growth, high estrogen, genetics.

Harm: Life-threatening bleeding, spread to other organs.

51. Tubal Blockage

Definition: Blocked fallopian tube pathway.

Causes: PID, TB, endometriosis, adhesions.

Harm: Infertility, ectopic pregnancy.

52. Fallopian Tube Swelling

Definition: Inflammation/enlargement of fallopian tube (salpingitis).

Causes: Infection, PID.

Harm: Pain, blockage, infertility.

53. Fallopian Tube Infection

Definition: Infection of fallopian tube structures.

Causes: STIs, ascending pelvic infections.

Harm: Severe pain, abscess, infertility.

54. PID – Pelvic Inflammatory Disease

Definition: Infection of upper genital tract (uterus, tubes, ovaries).

Causes: Untreated STIs, poor hygiene post-delivery/abortion.

Harm: Chronic pain, tubal infertility, ectopic pregnancy.

55. Cervical Erosion

Definition: Fragile, eroded area on cervix surface.

Causes: Infections, hormonal changes, trauma.

Harm: Discharge, contact bleeding, infection risk.

56. Cervical Polyps

Definition: Small benign growths on cervix.

Causes: Chronic irritation, hormonal factors.

Harm: Spotting, discharge, anxiety.

57. Cervicitis

Definition: Inflammation of cervix.

Causes: Infections, irritants, STIs.

Harm: Discharge, pain, infertility risk.

58. Post-delivery Uterine Weakness

Definition: Loss of strength and tone in uterus after childbirth.

Causes: Multiple pregnancies, inadequate rest/nutrition.

Harm: Prolapse risk, heavy bleeding, backache.

59. Infertility Due to Uterine Cause

Definition: Inability to conceive due to uterine abnormalities.

Causes: Fibroids, adhesions, malformations, endometrial defects.

Harm: Repeated failed implantation, miscarriages.

60. Garbhashaya Arbuda (Tumours)

Definition: Tumorous growths arising from uterus.

Causes: Hormonal imbalance, Kapha growth, genetics.

Harm: Bleeding, pain, malignancy risk.

61. Srotorodha in Uterus (Channel Obstruction)

Definition: Blockage in uterine channels.

Causes: Clots, adhesions, thick mucus, tumors.

Harm: Pain, infertility, irregular bleeding.

62. Hypothyroid-linked Uterine Disorder

Definition: Uterine symptoms secondary to low thyroid function.

Causes: Hypothyroidism.

Harm: Heavy/irregular periods, infertility.

63. PCOD – Ovarian Cysts

Definition: Multiple cysts in ovaries associated with PCOS.

Causes: Insulin resistance, Kapha-Meda imbalance.

Harm: Irregular cycles, infertility, obesity.

64. Chocolate Cysts

Definition: Endometriotic cysts in ovary filled with old blood.

Causes: Endometriosis.

Harm: Pain, ovarian damage, infertility.

65. Ovarian Tumours

Definition: Benign or malignant masses in ovaries.

Causes: Genetic, hormonal, environmental factors.

Harm: Pain, bloating, infertility, cancer risk.

66. Ovarian Cancer (Arbuda)

Definition: Malignant tumor of ovary.

Causes: Genetic mutations, hormonal factors.

Harm: Life-threatening, spreads silently in abdomen.

67. Hormonal Ovarian Failure

Definition: Ovaries stop functioning hormonally before time.

Causes: Autoimmune, surgery, chemo.

Harm: Infertility, early menopause symptoms.

68. Premature Ovarian Failure

Definition: Loss of ovarian function before age 40.

Causes: Genetic, autoimmune, iatrogenic.

Harm: Infertility, bone loss, hot flushes.

69. Chylous Cyst Ovaries

Definition: Fat-rich fluid cysts in ovaries.

Causes: Lymphatic or metabolic issues.

Harm: Pain, mass effect, possible torsion.

70. Polycystic Ovarian Morphology

Definition: Ultrasound appearance of multiple small ovarian follicles.

Causes: PCOS pattern hormones.

Harm: Often linked to anovulation, infertility, metabolic risk.

A. FEMALE REPRODUCTIVE SYSTEM DISEASES (continued)

3. Vaginal Disorders (Yoni Rogas — 71–90)

71. Vataja Yoni Roga

Definition: Vaginal disorder dominated by Vata features—dryness, pain, roughness.

Causes: Vata aggravation, low estrogen, dehydration, excessive intercourse, stress.

Harm: Painful sex, micro-tears, burning, higher infection risk.

72. Pittaja Yoni Roga

Definition: Vaginal disorder with Pitta features—burning, redness, heat, irritation.

Causes: Infections, spicy food, hot climate, chemical irritants.

Harm: Ulcers, intense burning, difficulty in passing urine and sexual activity.

73. Kaphaja Yoni Roga

Definition: Vaginal disorder with Kapha signs—thick, sticky discharge and itching.

Causes: Fungal infections, Kapha excess, high sugar diet, poor hygiene.

Harm: Persistent discharge, itching, foul smell, discomfort.

74. Sannipataja Yoni Roga

Definition: Vaginal disorder involving all three doshas (Vata, Pitta, Kapha).

Causes: Chronic untreated infections, severe lifestyle imbalance.

Harm: Complex symptoms: pain + burning + discharge, difficult to manage.

75. Upapluta Yoni (Pregnancy Infections)

Definition: Vaginal infections occurring during pregnancy.

Causes: Reduced immunity in pregnancy, poor hygiene, high sugar.

Harm: Discomfort, preterm labor risk, ascending infection to uterus.

76. Yoni Daha – Burning

Definition: Burning sensation in vagina or vulva.

Causes: Pitta aggravation, infections, chemical irritants, STIs.

Harm: Pain in sitting, urination, sexual relations.

77. Yoni Kandū – Itching

Definition: Itching in vaginal region.

Causes: Fungal infection, allergic reactions, hygiene issues.

Harm: Scratching → wounds, secondary infection, disturbed sleep.

78. Yoni Srava – Discharge

Definition: Excess or abnormal vaginal discharge.

Causes: Infections, hormonal changes, Kapha excess.

Harm: Weakness, discomfort, irritation, foul odor.

79. Rakta Yoni – Vaginal Bleeding

Definition: Abnormal bleeding from vagina outside normal periods.

Causes: Hormonal issues, cervical lesions, polyps, cancer.

Harm: Anemia, alarm symptom for serious disease.

80. Yoni Shoola – Vaginal Pain

Definition: Pain in vaginal area.

Causes: Infections, trauma, Vata aggravation, nerve sensitivity.

Harm: Painful intercourse, difficulty using toilet, emotional distress.

81. Yoni Shosha – Vaginal Dryness

Definition: Lack of moisture and lubrication in vagina.

Causes: Low estrogen (menopause), Vata increase, medications, stress.

Harm: Painful sex, tearing, infection risk, reduced pleasure.

82. Yoni Pichhilata – Thick Discharge

Definition: Very thick, sticky vaginal discharge.

Causes: Kapha imbalance, fungal or other infections.

Harm: Itching, foul odor, wetness discomfort.

83. White Discharge (Shweta Pradara)

Definition: Chronic white/non-bloody vaginal discharge.

Causes: Kapha/Ama buildup, mild infections, hormonal imbalance.

Harm: Weakness, backache, fatigue, anemia over time.

84. Bacterial Vaginosis (Equivalent)

Definition: Imbalance in vaginal bacteria causing thin, fishy-smelling discharge.

Causes: Disturbed flora, douching, unprotected sex.

Harm: Itching, smell, higher STI and pregnancy complication risk.

85. Candida Infection

Definition: Vaginal yeast/fungal infection.

Causes: Antibiotics, high sugar, tight clothes, dampness.

Harm: Intense itching, white curdy discharge, burning.

86. Trichomonas Infection

Definition: Sexually transmitted vaginal infection by protozoa.

Causes: Unprotected sexual contact with infected partner.

Harm: Frothy smelly discharge, itching, pain, higher HIV risk.

87. Foul-smelling Discharge

Definition: Vaginal discharge with unpleasant odor.

Causes: Bacterial infections, retained products, poor hygiene.

Harm: Social embarrassment, persistent infection, discomfort.

88. HPV-like Symptoms

Definition: Warty growths or cervical changes due to HPV-like infection.

Causes: Sexual transmission, weak immunity.

Harm: Risk of cervical cancer, genital warts.

89. Cervical Dysplasia Symptoms

Definition: Pre-cancerous changes in cervix cells.
Causes: HPV infection, smoking, immune suppression.
Harm: Potential progression to cervical cancer if ignored.

90. Sexual Pain Disorder (Dyspareunia)

Definition: Persistent pain with sexual intercourse.
Causes: Dryness, vaginismus, infections, trauma, psychological factors.
Harm: Avoidance of sex, relationship stress, emotional distress.

4. Pregnancy-Related Disorders (91–110)

91. Garbha Sanga – Implantation Issues

Definition: Difficulty in proper implantation of embryo in uterus.
Causes: Thin endometrium, hormonal problems, uterine defects.
Harm: Infertility, early miscarriages.

92. Garbha Nasha – Miscarriage

Definition: Spontaneous loss of pregnancy.
Causes: Genetic defects, hormonal insufficiency, infections, trauma.
Harm: Blood loss, emotional pain, anxiety in future pregnancies.

93. Frequent Miscarriages

Definition: Repeated pregnancy loss (recurrent abortion).
Causes: Genetic problems, uterine defects, autoimmune, hormonal issues.
Harm: High infertility risk, deep psychological trauma.

94. Placental Abnormalities

Definition: Problems in placenta (previa, abruption, insufficiency).
Causes: Hypertension, trauma, uterine scarring, smoking.

Harm: Bleeding, growth restriction, fetal distress, maternal shock.

95. Garbhini Jwara – Pregnancy Fever

Definition: Fever occurring during pregnancy.
Causes: Infections (viral, bacterial), inflammation.
Harm: Risk to mother and fetus if severe, preterm labor.

96. Garbhini Pada (Pregnancy Complications)

Definition: General category for complications in pregnancy.
Causes: Dosha imbalance, poor nutrition, disease.
Harm: Miscarriage, preterm labor, maternal health risk.

97. Preeclampsia-like Symptoms

Definition: High BP, swelling, protein in urine in pregnancy.
Causes: Placental dysfunction, vascular issues.
Harm: Seizures, organ damage, fetal growth restriction.

98. Gestational Diabetes (Ayurvedic Equivalent)

Definition: High blood sugar first detected in pregnancy.
Causes: Insulin resistance from pregnancy hormones, obesity.
Harm: Big baby, birth trauma, future diabetes for mother and child.

99. Hyperemesis Gravidarum (Ati Chardi)

Definition: Severe vomiting in pregnancy beyond normal morning sickness.
Causes: Hormonal extremes, sensitivity, genetics.
Harm: Dehydration, weight loss, electrolyte imbalance.

100. Abdominal Cramps in Pregnancy

Definition: Painful uterine or muscular cramps during pregnancy.
Causes: Uterine stretching, dehydration, threatened miscarriage or preterm labor.

Harm: Anxiety, risk of pregnancy loss if pathologic.

101. Preterm Labour Risk

Definition: Signs indicating likelihood of early labor before term.

Causes: Infections, stress, cervical weakness, multiple pregnancy.

Harm: Premature baby with breathing and organ problems.

102. Low Amniotic Fluid (Oligohydramnios)

Definition: Reduced fluid surrounding fetus.

Causes: Placental insufficiency, ruptured membranes, fetal kidney issues.

Harm: Cord compression, growth restriction, deformities.

103. Excess Amniotic Fluid (Polyhydramnios)

Definition: Too much amniotic fluid.

Causes: Diabetes, fetal anomalies, multiple pregnancy.

Harm: Preterm labor, malpresentation, maternal breathlessness.

104. Garbha Sosa – Fetal Growth Restriction

Definition: Poor growth of fetus inside uterus.

Causes: Placental problems, malnutrition, high BP, anemia.

Harm: Low birth weight, developmental issues.

105. Garbha Vyapad – 9 Types of Pregnancy Disorders

Definition: Group of nine types of complications affecting fetus/mother.

Causes: Various dosha imbalances, trauma, disease.

Harm: Miscarriage, malformations, maternal illness.

106. Garbha Sthana Vikriti

Definition: Abnormal position or location of fetus.

Causes: Uterine anomalies, fibroids, excess/low

fluid.

Harm: Breech/transverse position, difficult labor.

107. Breech Presentation Causes (Dosha Imbalance)

Definition: Baby's feet or buttocks come first instead of head.

Causes (Ayurvedic view): Vata disturbance, abnormal uterine shape, low fluid.

Harm: Complicated birth; often needs C-section.

108. Post-natal Depression

Definition: Depressive symptoms following childbirth.

Causes: Hormonal drop, fatigue, lack of support, previous mental health issues.

Harm: Poor bonding with baby, risk of self-harm (in severe cases).

109. Post-delivery Bleeding

Definition: Excessive blood loss after childbirth.

Causes: Uterine atony, retained placenta, tears.

Harm: Shock, anemia, life-threatening emergency.

110. Poor Lactation (Stanya Kshaya)

Definition: Insufficient breast milk production.

Causes: Weakness, stress, hormonal issues, poor suckling.

Harm: Poor baby growth, dehydration, maternal distress.

B. MALE REPRODUCTIVE SYSTEM DISEASES (Shukra Rogas)

1. Semen Disorders (111–132)

111. Shukra Kshaya – Low Sperm Count

Definition: Decrease in sperm quantity and semen volume.

Causes: Stress, heat exposure, toxins, chronic illness, poor diet.

Harm: Infertility, low sexual confidence.

112. Shukra Dushti – Impaired Semen Quality

Definition: Defective semen in terms of color, smell, viscosity, or function.

Causes: Poor lifestyle, infections, dosha imbalance.

Harm: Reduced fertility, miscarriage risk.

113. Vataja Shukra Dushti

Definition: Semen abnormalities with Vata features—scanty, thin, variable.

Causes: Vata aggravation, overwork, anxiety.

Harm: Weak sperm, low count, infertility.

114. Pittaja Shukra Dushti

Definition: Semen vitiation with Pitta features—yellowish, hot, burning.

Causes: Pitta foods, infections, inflammation.

Harm: DNA damage, low sperm viability.

115. Kaphaja Shukra Dushti

Definition: Semen defect with Kapha traits—thick, sticky, heavy.

Causes: Kapha excess, obesity, oily diet.

Harm: Poor motility, sperm clumping.

116. Atyushna Shukra – Overheated Semen

Definition: Semen exposed to excess internal heat.

Causes: Fever, hot climate, varicocele, Pitta aggravation.

Harm: Damaged sperm, low fertility.

117. Alpa Shukra – Low Volume

Definition: Low volume of semen ejaculated.

Causes: Dehydration, Vata aggravation, low gland function.

Harm: Reduced sperm delivery, infertility.

118. Shukra Pichchhila – Sticky Semen

Definition: Very thick and sticky semen.

Causes: Kapha increase, infections.

Harm: Poor motility and sperm release.

119. Shukra Ruksha – Dry Semen

Definition: Less fluid, more dry/viscous semen.

Causes: Vata aggravation, dehydration.

Harm: Poor sperm transport, infertility.

120. Shukra Abhighata

Definition: Semen damage due to trauma or impact.

Causes: Injury, surgery, excessive heat or pressure.

Harm: Reduced sperm production, pain, infertility.

121. Watery Semen

Definition: Semen very thin and watery.

Causes: Low sperm density, hormonal issues, poor nutrition.

Harm: Low fertility potential.

122. Thick Semen

Definition: Very thick, viscous semen.

Causes: Dehydration, infection, Kapha aggravation.

Harm: Poor movement of sperm, conception difficulty.

123. Sperm Motility Disorder

Definition: Sperm move poorly or slowly.

Causes: Varicocele, oxidative stress, toxins.

Harm: Sperm cannot reach egg → infertility.

124. Hormonal Male Infertility

Definition: Infertility caused by hormonal imbalances in male reproductive axis.

Causes: Low testosterone, pituitary issues, thyroid problems.

Harm: Low sperm count, low libido, poor erections.

125. Varicocele Infertility

Definition: Infertility associated with dilated testicular veins.

Causes: Faulty vein valves, prolonged standing.

Harm: Increased testicular temperature, sperm damage.

126. Erectile Stress-induced Infertility

Definition: Infertility due to stress-related erection problems.

Causes: Performance anxiety, mental tension.

Harm: Incomplete intercourse, failure to deposit semen.

127. Ejaculatory Problems

Definition: Difficulty in timing or achieving ejaculation.

Causes: Nerve issues, medications, anxiety.

Harm: Reduced fertility, sexual dissatisfaction.

128. Hypospermia

Definition: Semen volume lower than normal reference.

Causes: Partial ejaculatory duct obstruction, gland dysfunction.

Harm: Low semen quantity reduces sperm delivery.

129. Aspermia

Definition: Absence of semen during ejaculation.

Causes: Retrograde ejaculation, obstruction, failure of emission.

Harm: Infertility, psychological distress.

130. Teratospermia

Definition: High proportion of abnormally shaped sperm.

Causes: Toxins, heat, genetic factors.

Harm: Poor fertilizing ability.

131. Oligospermia

Definition: Low sperm count below fertile limit.

Causes: Varicocele, hormonal disorders, testicular injury.

Harm: Reduced chances of conception.

132. Azoospermia

Definition: No sperm in semen.

Causes: Non-functioning testes, duct blockage, severe hormonal problems.

Harm: Complete male factor infertility.

2. Penis & Testicular Disorders (133–153)

133. Vrishana Shotha – Testicular Swelling

Definition: Swelling of one or both testes.

Causes: Infection, trauma, hydrocele, tumor.

Harm: Pain, heaviness, infertility risk.

134. Vrishana Vidradhi – Testicular Abscess

Definition: Pus-filled collection in testis/scrotum.

Causes: Severe infection, untreated epididymitis.

Harm: Intense pain, fever, possible tissue loss.

135. Epididymitis Equivalent

Definition: Inflammation of epididymis (tube behind testis).

Causes: STIs, urinary infections.

Harm: Testicular pain, swelling, infertility if chronic.

136. Orchitis Equivalent

Definition: Inflammation of testicle.

Causes: Viral (mumps), bacterial infections.

Harm: Severe pain, atrophy, infertility.

137. Testicular Pain

Definition: Pain in one or both testicles.

Causes: Injury, torsion, infection, varicocele.

Harm: May signal emergency (torsion), fertility risk.

138. Testicular Torsion-like Pain

Definition: Sudden severe testicular pain mimicking torsion.

Causes: Actual torsion or severe epididymitis.

Harm: Loss of testis if true torsion isn't treated quickly.

139. Scrotal Swelling

Definition: Enlargement of scrotal sac.
Causes: Hydrocele, hernia, infection, tumor.
Harm: Pain, discomfort, difficulty walking.

140. Hydrocele (Mutra Vridhhi)

Definition: Fluid collection around testis.
Causes: Congenital, infections, trauma.
Harm: Heaviness, pain, cosmetic concerns.

141. Varicocele

Definition: Dilated veins in scrotum.
Causes: Valve failure in testicular veins.
Harm: Overheating testes, low sperm quality.

142. Sexual Weakness

Definition: General term for poor sexual performance or stamina.
Causes: Stress, chronic illness, hormonal issues, fatigue.
Harm: ED, low libido, low confidence.

143. Premature Ejaculation

Definition: Ejaculation occurs earlier than desired during sex.
Causes: Anxiety, hypersensitive nerves, habit.
Harm: Relationship issues, reduced satisfaction, fertility issues.

144. Erectile Dysfunction (Klaibya)

Definition: Inability to get or maintain an erection.
Causes: Vascular disease, diabetes, hormones, psychological factors.
Harm: Infertility, low self-esteem, depression.

145. Erectile Tissue Weakness

Definition: Poor quality of penile erectile tissues.
Causes: Chronic ED, lack of blood flow, aging.
Harm: Reduced rigidity, unsatisfactory intercourse.

146. Penile Curvature

Definition: Abnormal bending of penis during erection.
Causes: Fibrous plaque (Peyronie's-like), trauma.
Harm: Pain, difficulty in intercourse.

147. Peyronie-like Symptoms

Definition: Plaque formation in penis leading to curvature and pain.
Causes: Microtrauma during sex, genetic factors.
Harm: Painful erections, sexual dysfunction.

148. Genital Herpes-like

Definition: Recurrent blisters/ulcers on genital region.
Causes: Viral infection (HSV-type).
Harm: Pain, burning, contagious, emotional distress.

149. Genital Warts-like

Definition: Wart-like growths on genitals.
Causes: HPV infection.
Harm: Discomfort, cancer risk in some HPV strains.

150. Chronic Groin Pain

Definition: Persistent pain in groin area.
Causes: Nerve entrapment, hernia, muscle strain, infections.
Harm: Walking/sexual discomfort, reduced activity.

151. Prostate Enlargement (Vataja Mutraghata)

Definition: Age-related enlargement of prostate causing urinary obstruction.
Causes: Hormonal changes, aging, Vata aggravation.
Harm: Weak flow, incomplete emptying, infections.

152. Prostatitis

Definition: Inflammation/infection of prostate gland.
Causes: Bacterial infection, congestion, pelvic tension.
Harm: Painful urination, pelvic pain, sexual dysfunction.

153. Prostate Cancer Equivalent

Definition: Malignant tumor arising from prostate.
Causes: Age, genetics, hormonal factors.

Harm: Urinary obstruction, bone spread, life-threatening.

3. Sexual Disorders (154–161)

154. Klaibya (ED)

Definition: Erectile dysfunction—failure to get/keep erection.

Causes: Vascular disease, diabetes, Vata imbalance, psychological issues.

Harm: Infertility, emotional distress, relationship strain.

155. Shandhatva – Impotence

Definition: Complete inability to perform sexually or produce offspring.

Causes: Congenital defects, hormonal failure, testicular damage.

Harm: Infertility, social and mental suffering.

156. Loss of Libido (Kama Mandya)

Definition: Reduced or absent sexual desire.

Causes: Stress, depression, low hormones, fatigue.

Harm: Relationship problems, low satisfaction.

157. Excess Libido (Ati Kameshu)

Definition: Abnormally high sexual drive.

Causes: Hormonal excess, psychological conditions, addiction.

Harm: Risky behavior, addiction, exhaustion.

158. Nocturnal Emission

Definition: Involuntary ejaculation during sleep (wet dreams).

Causes: Hormonal surge, sexual thoughts, Vata/Pitta in young males.

Harm: Usually harmless; excessive frequency may cause fatigue and anxiety.

159. Sexual Anxiety

Definition: Anxiety related to sexual performance or activity.

Causes: Past failures, negative beliefs, trauma.

Harm: ED, premature ejaculation, avoidance of sex.

160. Performance Stress

Definition: Stress specifically about performing well sexually.

Causes: Fear of not satisfying partner, past criticism.

Harm: ED, premature ejaculation, low confidence.

161. Sex Pain Disorders

Definition: Pain during sexual activity (male or female).

Causes: Physical causes (dryness, infections, tightness) + psychological.

Harm: Avoidance of intercourse, relationship tension, emotional distress.

CATEGORY 8 — Diabetes, Endocrine & Metabolic Disorders

A. DIABETES & PRAMEHA (20 Types in Ayurveda)

These 20 Prameha are urine/metabolic disorders described in Ayurveda. Many map to **stages and variants of diabetes & metabolic syndrome**.

1. Vasameha (Fatty / Oily Urine – Vataja Prameha)

- **Definition:** A Vata-dominant Prameha where urine appears **oily, frothy or with a film of fat**, indicating deep disturbance of Meda (fat) and Majja (marrow) dhatu. It suggests serious depletion of tissues with simultaneous deranged fat metabolism.
 - **Causes:** Long-standing uncontrolled diabetes, severe Vata aggravation, excessive fasting followed by rich foods, chronic stress, emaciation.
 - **Harm to the body:** Leads to profound weakness, nerve damage, muscle wasting and advanced diabetic complications.
-

2. Majjameha (Marrow-like Urine – Vataja)

- **Definition:** A severe Vata-type Prameha where urine appears **thick, turbid, resembling bone marrow**, reflecting involvement of Majja dhatu (bone marrow / nervous tissue). It indicates that deeper tissues are being broken down and excreted in urine.
 - **Causes:** Chronic metabolic disease, severe Vata aggravation, long-term malnutrition, advanced diabetes, bone-marrow depletion.
 - **Harm:** Weak bones, neuropathy, immune weakness, risk of paralysis and severe fatigue.
-

3. Shuklameha (Semen-like Urine – Vataja)

- **Definition:** A Vataja Prameha where urine looks **milky or semen-like**, pointing to Shukra dhatu involvement (reproductive tissue). It suggests the body is losing vital reproductive essence through urine.
 - **Causes:** Extreme debility, chronic illness, excessive sexual activity, severe Vata aggravation, uncontrolled diabetes.
 - **Harm:** Sexual weakness, infertility, extreme tiredness, early aging.
-

4. Hastimeha (Elephant-like Urine – Vataja, Very Severe)

- **Definition:** Very severe form of Prameha where urine flows **in large quantity, forcefully and frequently**, compared to an elephant passing urine. It resembles advanced diabetes with polyuria and extreme tissue depletion.
 - **Causes:** Long-term neglected Prameha, severe Vata disturbance after Kapha/Pitta stages, excessive dryness, old age.
 - **Harm:** Life-threatening dehydration, weight loss, loss of strength, risk of kidney failure and death if untreated.
-

5. Ksharameha (Alkaline Urine – Pittaja)

- **Definition:** A Pitta-dominant Prameha where urine becomes **corrosive/alkaline**, often causing burning and irritation. It may correlate to highly acidic/alkaline urine seen in some metabolic and infectious states.
- **Causes:** Pitta aggravation, hot spicy food, alcohol, infections, hypermetabolism.

- **Harm:** Burning in urinary tract, ulcers, bleeding, rapid tissue damage.
-

6. Neela Meha (Bluish Urine – Pittaja)

- **Definition:** Urine appears **bluish or dark** due to Pitta and Rakta (blood) involvement. This reflects deeper blood and liver involvement in metabolic disease.
 - **Causes:** Severe Pitta aggravation, liver disorders, infections, long-term toxins.
 - **Harm:** Indicates serious pathology: liver injury, blood vitiation, risk of systemic inflammation.
-

7. Rakta Meha (Bloody Urine – Pittaja)

- **Definition:** A condition where **blood is seen in urine**, categorized under Pittaja Prameha, signifying Rakta dhatu disturbance. Associated with heat, inflammation and damage to urinary tract.
 - **Causes:** Stones, infections, Pitta excess, vascular fragility, kidney diseases.
 - **Harm:** Anemia, risk of kidney damage, possible malignancy or severe underlying disease.
-

8. Haridra Meha (Yellow / Turmeric-like Urine – Pittaja)

- **Definition:** Urine appears **bright yellow, like turmeric**, showing strong Pitta and bile involvement. It may parallel jaundice or Pitta-aggravated diabetes.
 - **Causes:** Liver congestion, high Pitta diet, alcohol, infections, bile disturbances.
 - **Harm:** Liver strain, skin/yellow eye discoloration, fatigue, poor digestion.
-

9. Manjistha Meha (Reddish Urine – Pittaja)

- **Definition:** Urine takes on a **reddish or pinkish tint**, similar to Manjistha herb

color, suggesting Pitta + Rakta involvement. It reflects heat and minor bleeding tendencies.

- **Causes:** Pitta-predominant disorders, microhematuria, inflammation.
 - **Harm:** Early sign of blood-urine involvement; can progress to more serious kidney/bladder disease.
-

10. Amla Meha (Sour Urine – Pittaja)

- **Definition:** Urine has a **sour odor or taste (classically described)**, indicating strong Pitta and digestive (Amla) disturbance in Prameha.
 - **Causes:** High acidic diet, hyperacidity, compromised Agni (digestion), Pitta aggravation.
 - **Harm:** Burning, irritation, systemic acidity leading to ulcers and gut issues.
-

11. Ikshu Meha (Sugarcane Juice Urine – Kaphaja)

- **Definition:** A Kapha-dominant Prameha where urine is **sweet, copious, and pale**, like sugarcane juice—very similar to classical diabetes mellitus. Ants may gather near dried urine drops.
 - **Causes:** Excess sweets, obesity, no exercise, Kapha-Meda increase.
 - **Harm:** Classic diabetic complications—nerve, eye, kidney, heart damage.
-

12. Surā Meha (Wine-like Urine – Kaphaja)

- **Definition:** Urine appears **like fermented liquid/wine**, sometimes foamy and heavy, signifying Kapha + Ama (toxins) imbalance.
 - **Causes:** Heavy, stale, fermented foods, alcohol, sluggish liver and pancreas.
 - **Harm:** Toxin buildup, fatty liver, sluggish metabolism, brain fog.
-

13. Shukla Meha (Milky Urine – Kaphaja Variant)

- **Definition:** Urine looks **whitish or milky**, due to Kapha, Meda (fat) and sometimes lymph getting mixed with urine.
 - **Causes:** High fat intake, Kapha aggravation, lymphatic stagnation, chronic Prameha.
 - **Harm:** Severe metabolic congestion, risk of obesity, prediabetes/diabetes.
-

14. Sandra Meha (Thick / Dense Urine – Kaphaja)

- **Definition:** Urine becomes **thick, dense, more viscous** than normal due to Kapha and Meda.
 - **Causes:** Heavy diet, sedentary life, chronic Kapha-Prameha.
 - **Harm:** Indicates advanced metabolic derangement, kidney overload.
-

15. Picchila Meha (Slimy / Mucous Urine – Kaphaja)

- **Definition:** Urine is **slimy, sticky or mucous-laden**, showing Kapha mucus mixing with urine.
 - **Causes:** Chronic urinary infections, Kapha excess, Meda and Mamsa involvement.
 - **Harm:** Obstruction in urinary passages, recurrent UTI, sluggish metabolism.
-

16. Shaitya Meha (Cold Urine – Kaphaja)

- **Definition:** Urine feels **cold and heavy**, with typical Kapha qualities, reflecting low digestive fire and low metabolic heat.
 - **Causes:** Cold foods, lack of movement, Kapha dominance, hypothyroid-like patterns.
 - **Harm:** Weight gain, lethargy, fluid retention, progression to diabetes.
-

17. Avila Meha (Cloudy / Turbid Urine – Kaphaja)

- **Definition:** Urine appears **cloudy or turbid**, often with suspended particles; linked to Kapha+Aama in Prameha.
 - **Causes:** Unhealthy diet, chronic indigestion, Kapha accumulation, infections.
 - **Harm:** Kidney strain, increased risk of stones and infections.
-

18. Udaka Meha (Watery, Excessive Urine – Kaphaja)

- **Definition:** Very **dilute, watery, excessive urine output**, reflecting Kapha–Vata disturbance and kidney handling of fluids.
 - **Causes:** Early diabetes, high fluid intake with poor regulation, kidney issues.
 - **Harm:** Loss of minerals, dehydration, fatigue, early renal dysfunction.
-

19. Lavana Meha (Salty Urine – Kaphaja)

- **Definition:** Urine described as **salty** in character (classical tasting description), indicating deranged electrolyte and Kapha–Pitta involvement.
 - **Causes:** High salt diet, dehydration, endocrine imbalance.
 - **Harm:** High BP tendency, edema, vascular stress.
-

20. Madhumeha (Core Diabetes)

- **Definition:** Classic Ayurvedic form of **diabetes mellitus**, where urine is sweet like honey and the body progressively becomes weak, dry and emaciated. Considered the end-stage of Prameha spectrum.
- **Causes:** Genetics + wrong diet, chronic Kapha–Meda excess followed by Vata predominance, stress, lack of exercise.
- **Harm:** Damage to almost every organ—eyes, kidneys, heart, nerves, sexual

function; risk of ulcers, stroke and heart attack.

B. MODERN DIABETES CONDITIONS DETECTABLE BY PULSE (21–45)

21. Type 1 Diabetes

- **Definition:** Autoimmune condition where the body **destroys insulin-producing beta cells**, leading to absolute insulin deficiency, often in children/young adults.
 - **Causes:** Autoimmune attack, genetic susceptibility, environmental triggers (infections, toxins).
 - **Harm:** Requires lifelong insulin; risk of ketoacidosis, nerve, eye, kidney and heart complications.
-

22. Type 2 Diabetes

- **Definition:** Chronic metabolic disease with **insulin resistance + relative insulin deficiency**, usually associated with obesity and sedentary lifestyle.
 - **Causes:** Poor diet (high sugar, refined carbs), inactivity, genetics, stress, obesity.
 - **Harm:** Silent damage to blood vessels, heart, kidneys, nerves and eyes; major cause of heart attack and stroke.
-

23. Prediabetes

- **Definition:** Intermediate state where **blood sugar is higher than normal but not yet diabetic**, a warning zone.
 - **Causes:** Overweight, poor diet, lack of physical activity, family history.
 - **Harm:** High chance of progressing to Type 2 diabetes and early vascular damage if ignored.
-

24. Juvenile Diabetes

- **Definition:** Diabetes appearing in **childhood or adolescence**, usually Type 1 but can include early-onset Type 2.
 - **Causes:** Autoimmunity (Type 1), obesity and poor diet (early Type 2).
 - **Harm:** Long disease duration → greater risk of complications in eyes, kidneys and growth.
-

25. Insulin Resistance

- **Definition:** Condition where **body cells do not respond effectively to insulin**, so more insulin is needed for the same effect.
 - **Causes:** Visceral fat (belly fat), high sugar diet, lack of exercise, PCOS, chronic stress.
 - **Harm:** Drives prediabetes, Type 2 diabetes, fatty liver, PCOS and metabolic syndrome.
-

26. Hyperinsulinemia

- **Definition:** **Abnormally high insulin levels** in blood, usually as compensation for insulin resistance.
 - **Causes:** Chronic over-eating (sugar and refined carbs), obesity, genetic predisposition.
 - **Harm:** Promotes fat storage, inflammation, increased heart disease and cancer risk.
-

27. Metabolic Syndrome

- **Definition:** Cluster of metabolic abnormalities: **abdominal obesity, high blood pressure, high blood sugar, high triglycerides and low HDL**.
 - **Causes:** Poor lifestyle, high-calorie diet, central obesity, chronic stress.
 - **Harm:** Greatly increases risk of Type 2 diabetes, heart attack, stroke and fatty liver.
-

28. Gestational Diabetes

- **Definition:** Diabetes that **appears during pregnancy**, due to hormonal changes causing insulin resistance.
 - **Causes:** Placental hormones, obesity, family history of diabetes.
 - **Harm:** Big baby (macrosomia), difficult delivery, preeclampsia, higher risk of future diabetes in both mother and child.
-

29. Stress-induced Hyperglycemia

- **Definition:** Temporary **rise in blood sugar levels during severe physical or emotional stress**, even in non-diabetics.
 - **Causes:** Trauma, surgery, infections, intense psychological stress → high cortisol and adrenaline.
 - **Harm:** Worsens illness outcomes, can unmask hidden diabetes, strains pancreas.
-

30. Hypoglycemia

- **Definition:** **Abnormally low blood sugar**, often presenting with shakiness, sweating, confusion.
 - **Causes:** Too much insulin/medication, missed meals, alcohol, adrenal issues.
 - **Harm:** Loss of consciousness, seizures, brain damage if severe and prolonged.
-

31. Diabetic Ketoacidosis (DKA) – Early Detection

- **Definition:** Dangerous diabetic state where **lack of insulin causes fat breakdown → ketone accumulation → acidosis**; early stage shows nausea, abdominal pain and fruity breath.
 - **Causes:** Missed insulin doses, infections, new-onset Type 1 diabetes, severe stress.
 - **Harm:** Dehydration, coma and death if not treated urgently.
-

32. Diabetic Nephropathy (Kidney Involvement)

- **Definition:** Long-term high sugar damages **kidney filters (glomeruli)** leading to protein leakage and declining kidney function.
 - **Causes:** Poorly controlled diabetes, hypertension, smoking, obesity.
 - **Harm:** Chronic kidney disease, dialysis need, heart risk increase.
-

33. Diabetic Neuropathy (Nerve Involvement)

- **Definition:** Nerve damage caused by chronic high blood sugar, especially in hands and feet.
 - **Causes:** Long duration diabetes, poor control, smoking, B12 deficiency.
 - **Harm:** Numbness, burning, loss of sensation → unnoticed wounds, ulcers and amputations.
-

34. Diabetic Retinopathy

- **Definition:** Damage to tiny blood vessels in the **retina of the eye** due to diabetes.
 - **Causes:** Long-standing high sugar, hypertension, high lipids.
 - **Harm:** Blurred vision, bleeding in eye, eventual blindness if untreated.
-

35. Diabetes Foot Complications

- **Definition:** Ulcers, infections and deformities in feet due to **nerve damage + poor blood flow** in diabetics.
 - **Causes:** Neuropathy, peripheral vascular disease, ill-fitting footwear, unnoticed injuries.
 - **Harm:** Gangrene, amputations, severe disability.
-

36. Fatty Pancreas

- **Definition:** Excess fat deposits inside pancreas, similar to fatty liver, impairing its function.
 - **Causes:** Obesity, high-fat/high-sugar diet, metabolic syndrome.
 - **Harm:** Poor insulin production, increased risk of diabetes and pancreatitis.
-

37. Pancreatic Insufficiency

- **Definition:** Pancreas fails to produce enough digestive enzymes and/or insulin.
 - **Causes:** Chronic pancreatitis, alcohol abuse, cystic fibrosis, pancreatic surgery.
 - **Harm:** Malabsorption, weight loss, diabetes, nutritional deficiencies.
-

38. Pancreatic Inflammation (Pancreatitis)

- **Definition:** Inflammation of pancreas causing severe abdominal pain and digestive disturbance.
 - **Causes:** Gallstones, alcohol, high triglycerides, drugs, infections.
 - **Harm:** Organ failure, diabetes, chronic pain, life-threatening in severe cases.
-

39. Pancreatic Exhaustion (Beta-cell Failure)

- **Definition:** Condition where **insulin-producing beta cells wear out** and cannot meet body's demands.
 - **Causes:** Long-term insulin resistance, high sugar load, genetic susceptibility.
 - **Harm:** Worsening diabetes, need for insulin injections, high complication risk.
-

40. Cholesterol-linked Diabetes Risk

- **Definition:** Situation where **high cholesterol and triglycerides** significantly increase likelihood of diabetes.
 - **Causes:** Metabolic syndrome, high-fat/sugar diet, obesity.
-

- **Harm:** Accelerated atherosclerosis, combined risk of heart attack and diabetes.
-

41. Obesity-driven Diabetes

- **Definition:** Type of diabetes primarily driven by **excess body fat**, especially around abdomen.
 - **Causes:** Overeating, inactivity, stress, poor sleep.
 - **Harm:** Strong insulin resistance, multi-organ complications, early heart disease.
-

42. Thyroid-linked Diabetes

- **Definition:** Diabetic tendency that is **associated with thyroid dysfunction**, especially hypothyroidism.
 - **Causes:** Autoimmune overlap, shared risk factors, metabolic slowdown.
 - **Harm:** Harder-to-control blood sugar, cholesterol problems, weight issues.
-

43. PCOS-linked Diabetes

- **Definition:** Elevated risk or presence of diabetes in **women with PCOS** due to insulin resistance.
 - **Causes:** Insulin resistance, obesity, hormonal imbalance.
 - **Harm:** Infertility, metabolic syndrome, long-term cardiovascular risk.
-

44. Diabetes Leading to Heart Issues

- **Definition:** Cardiovascular disease (coronary artery disease, heart attacks) **caused or worsened by diabetes**.
 - **Causes:** High sugar damaging vessel walls, high cholesterol, hypertension, inflammation.
 - **Harm:** Angina, heart attack, heart failure, sudden death.
-

45. High Sugar–induced Fatigue Syndrome

- **Definition:** Persistent tiredness and lack of energy associated with **fluctuating or chronically high blood sugar**.
 - **Causes:** Poor glucose utilization, insulin resistance, dehydration, micronutrient deficits.
 - **Harm:** Low productivity, mood issues, progression to full diabetes and organ stress.
-

C. THYROID DISORDERS (46–65)

46. Hypothyroidism

- **Definition:** Condition where the thyroid gland **produces insufficient thyroid hormones (T3/T4)**, slowing down body metabolism.
 - **Causes:** Autoimmune thyroiditis (Hashimoto's), iodine deficiency, thyroid surgery, certain drugs.
 - **Harm:** Weight gain, fatigue, depression, constipation, infertility, high cholesterol and heart risk.
-

47. Hyperthyroidism

- **Definition:** Overactive thyroid producing **excess hormones**, speeding up metabolic processes.
 - **Causes:** Graves' disease, toxic nodules, thyroiditis, overmedication.
 - **Harm:** Weight loss, anxiety, palpitations, heat intolerance, muscle loss, risk of heart rhythm problems.
-

48. Subclinical Hypothyroidism

- **Definition:** Early thyroid disorder where **TSH is high but T3/T4 are still in**

normal range, often mild or no symptoms.

- **Causes:** Early Hashimoto's, iodine imbalance, stress.
 - **Harm:** Can progress to full hypothyroidism, subtle fatigue, menstrual issues, cholesterol rise.
-

49. Hashimoto-like Symptoms

- **Definition:** Features resembling **autoimmune thyroiditis**: fatigue, neck discomfort, weight gain, mood swings.
 - **Causes:** Autoimmune reaction against thyroid, genetic tendency, environmental triggers.
 - **Harm:** Gradual thyroid destruction → hypothyroidism, lifelong hormone dependence.
-

50. Graves-like Symptoms

- **Definition:** Symptoms similar to **Graves' disease**: weight loss, bulging eyes, palpitations, heat intolerance.
 - **Causes:** Autoimmune stimulation of thyroid receptors.
 - **Harm:** Severe hyperthyroidism, eye disease, heart strain.
-

51. Thyroiditis

- **Definition:** Inflammation of thyroid that can cause **temporary hyperthyroid followed by hypothyroid phases**.
 - **Causes:** Autoimmune (Hashimoto), viral infections, postpartum, drugs.
 - **Harm:** Neck pain, fluctuating hormones, eventual permanent hypothyroidism.
-

52. Thyroid Nodules

- **Definition:** Localized **lumps in the thyroid gland**, solid or cystic.
- **Causes:** Overgrowth of thyroid tissue, cyst formation, sometimes tumors.

- **Harm:** Rarely cancer, may cause pressure symptoms or hormone excess.
-

53. Goitre (Galaganda)

- **Definition:** Visible enlargement of **thyroid**, with or without hormone changes.
 - **Causes:** Iodine deficiency, autoimmune disease, nodules, congenital issues.
 - **Harm:** Neck swelling, difficulty swallowing/breathing, cosmetic concerns, possible hormone imbalance.
-

54. Thyroid Hormone Imbalance

- **Definition:** General term for **too much or too little thyroid hormones** affecting many systems.
 - **Causes:** Hypo/hyperthyroidism, pituitary issues, medications.
 - **Harm:** Mood swings, metabolic issues, cardiac and reproductive problems.
-

55. High TSH Pulse Pattern

- **Definition:** Pattern indicating **elevated TSH**, usually reflecting underactive thyroid (hypothyroid state).
 - **Causes:** Thyroid failure, iodine deficiency, autoimmune destruction.
 - **Harm:** Slowed metabolism, weight gain, tiredness, cold intolerance.
-

56. Low TSH Pattern

- **Definition:** Pattern suggesting **suppressed TSH**, commonly due to hyperthyroidism or excess hormone intake.
 - **Causes:** Graves', toxic nodules, overreplacement therapy.
 - **Harm:** Bone loss, heart rhythm issues, anxiety.
-

57. Low T3/T4 Pattern

- **Definition:** Low levels of active thyroid hormones in blood, regardless of TSH status.
 - **Causes:** Hypothyroidism, severe illness (low T3 syndrome), pituitary disease.
 - **Harm:** Low energy, cold sensations, slow growth, cognitive dullness.
-

58. Metabolic Slowdown Symptoms

- **Definition:** Collection of signs: **low energy, weight gain, constipation, coldness** due to reduced metabolic rate.
 - **Causes:** Hypothyroidism, chronic fatigue, low calorie intake, Kapha increase.
 - **Harm:** Obesity, poor immunity, depression, heart risk.
-

59. Thyroid-linked Infertility

- **Definition:** Fertility problems directly related to thyroid dysfunction.
 - **Causes:** Hypothyroidism or hyperthyroidism disturbing ovulation/spermatogenesis.
 - **Harm:** Difficulty conceiving, recurrent miscarriages.
-

60. Thyroid-linked Obesity

- **Definition:** Weight gain and difficulty losing weight due to low thyroid function.
 - **Causes:** Hypothyroidism, metabolic slowdown, fluid retention.
 - **Harm:** Metabolic syndrome, joint strain, cardiovascular disease.
-

61. Thyroid-linked Anxiety

- **Definition:** Anxiety, restlessness and nervousness caused or worsened by thyroid imbalance.
- **Causes:** Hyperthyroidism, rapid metabolism, sympathetic overactivity.

- **Harm:** Sleep disturbance, palpitations, poor quality of life.
-

62. Thyroid-linked Hair Fall

- **Definition:** Diffuse hair loss or thinning caused by thyroid dysfunction.
 - **Causes:** Both hypo- and hyperthyroidism, nutritional deficiencies.
 - **Harm:** Cosmetic distress, sign of deeper endocrine imbalance.
-

63. Thyroid-linked Skin Dryness

- **Definition:** Rough, dry, coarse skin due to reduced thyroid activity.
 - **Causes:** Hypothyroidism, poor circulation, low oil secretion.
 - **Harm:** Itching, cracks, early aging appearance.
-

64. Thyroid-linked Menstrual Issues

- **Definition:** Irregular, heavy, or scanty periods caused by thyroid disease.
 - **Causes:** Disturbed hormones affecting ovarian function and uterine lining.
 - **Harm:** Infertility, anemia, PMS-like symptoms.
-

65. Thyroid-linked Fatigue

- **Definition:** Persistent tiredness linked to improper thyroid function.
 - **Causes:** Hypo-/hyperthyroidism, autoimmunity, low metabolism.
 - **Harm:** Poor performance, low mood, impaired daily activities.
-

D. METABOLIC DISORDERS (66–95)

66. Obesity (Sthaulya)

- **Definition:** Chronic condition where body accumulates **excess fat**, especially around abdomen, exceeding healthy limits.
 - **Causes:** High-calorie diet, lack of exercise, stress, genetic and hormonal influences (Kapha vridhhi).
 - **Harm:** Major risk for diabetes, heart disease, strokes, joint degeneration and certain cancers.
-

67. Overweight

- **Definition:** Body weight above ideal range, but less severe than obesity, still representing excess stored energy.
 - **Causes:** Positive energy balance (intake > expenditure), sedentary habits, mild hormonal or metabolic issues.
 - **Harm:** Raises risk of progressing to obesity, diabetes, high BP and joint pain.
-

68. Underweight (Karshya)

- **Definition:** Body weight significantly **below normal**, with visible thinness and low reserves.
 - **Causes:** Malnutrition, malabsorption, hyperthyroidism, chronic illness, Vata aggravation.
 - **Harm:** Weak immunity, poor wound healing, fatigue, hormonal disturbance.
-

69. High Cholesterol

- **Definition:** Elevated levels of cholesterol (especially LDL) in the bloodstream.
 - **Causes:** Fatty diet, genetics, lack of exercise, hypothyroidism, liver dysfunction.
 - **Harm:** Plaque buildup in arteries → heart attacks, strokes, peripheral artery disease.
-

70. Hypertriglyceridemia

- **Definition:** High levels of triglycerides (circulating fats) in the blood.
 - **Causes:** High sugar/alcohol intake, obesity, diabetes, genetics.
 - **Harm:** Pancreatitis risk, fatty liver, cardiovascular disease.
-

71. Fatty Liver (Medo-dhatu Dushti)

- **Definition:** Excess fat stored in liver cells, disrupting its normal functions (NAFLD/NASH-like).
 - **Causes:** Obesity, high fructose/sugar diet, alcohol, insulin resistance.
 - **Harm:** Liver inflammation, fibrosis, cirrhosis, increased cardiovascular risk.
-

72. Lipid Metabolism Disorder

- **Definition:** Abnormal processing of fats in the body, leading to abnormal cholesterol/triglyceride levels.
 - **Causes:** Genetic dyslipidemias, diabetes, hypothyroidism, poor diet.
 - **Harm:** Accelerated atherosclerosis and organ fat deposition.
-

73. Slow Metabolism Due to Kapha

- **Definition:** Kapha-type low metabolic rate—easy weight gain, lethargy, sluggish digestion.
 - **Causes:** Overeating heavy/greasy foods, oversleeping, inactivity, Kapha prakriti.
 - **Harm:** Obesity, Prameha/diabetes, chronic fatigue.
-

74. Fast Metabolism Due to Pitta

- **Definition:** Pitta-dominant high metabolic activity—feeling hot, hungry frequently, quick digestion.
 - **Causes:** Pitta prakriti, hyperthyroid-type states, intense work—stress.
 - **Harm:** Weight loss, irritability, acidity, tissue burnout if unbalanced.
-

75. Irregular Metabolism Due to Vata

- **Definition:** Vata-type metabolism that is **erratic**—sometimes fast, sometimes slow.
 - **Causes:** Irregular routine, skipping meals, stress, Vata aggravation.
 - **Harm:** Bloating, gas, unpredictable weight changes, nutrient deficiencies.
-

76. Hormonal Obesity

- **Definition:** Weight gain driven largely by **hormonal imbalances**, not only by overeating.
 - **Causes:** Hypothyroidism, PCOS, Cushing's, menopause, insulin resistance.
 - **Harm:** Resistant weight loss, higher risk of diabetes and heart disease.
-

77. Stress Obesity

- **Definition:** Obesity primarily linked to **chronic stress and high cortisol**.
 - **Causes:** Emotional stress, lack of sleep, emotional eating, high sugary foods.
 - **Harm:** Belly fat, metabolic syndrome, anxiety, depression.
-

78. Emotional Eating Pattern

- **Definition:** Habit of eating in response to emotions instead of hunger.
 - **Causes:** Stress, boredom, sadness, lack of coping skills.
 - **Harm:** Weight gain, guilt, disturbed digestion, worsening mental health.
-

79. High Inflammation Metabolic Syndrome

- **Definition:** Metabolic syndrome accompanied by **chronic low-grade inflammation** in the body.

- **Causes:** Obesity, junk food, sedentary life, smoking, oxidative stress.
 - **Harm:** Atherosclerosis, insulin resistance, autoimmune triggers.
-

80. Poor Protein Metabolism

- **Definition:** Inability to properly digest and utilize proteins.
 - **Causes:** Low stomach acid, liver disease, pancreatic enzyme deficiency, malabsorption.
 - **Harm:** Muscle loss, edema, low immunity, hair/skin problems.
-

81. Poor Carbohydrate Metabolism

- **Definition:** Difficulty handling carbohydrate intake, leading to sugar spikes or crashes.
 - **Causes:** Insulin resistance, enzyme issues, sedentary life.
 - **Harm:** Prediabetes, diabetes, cravings, fatigue.
-

82. Poor Fat Metabolism

- **Definition:** Impaired digestion, absorption or usage of fats.
 - **Causes:** Bile deficiency, liver disease, pancreatic insufficiency.
 - **Harm:** Steatorrhea (fatty stools), fat-soluble vitamin deficiencies, fatigue.
-

83. High Uric Acid

- **Definition:** Elevated uric acid levels in blood due to overproduction or poor excretion.
 - **Causes:** High purine diet (meat, organ meats), alcohol, kidney issues, obesity.
 - **Harm:** Gout attacks, joint damage, kidney stones.
-

84. Gout (Vatarakta)

- **Definition:** Painful inflammatory arthritis caused by **urate crystal deposition** in joints.
 - **Causes:** High uric acid, rich food, alcohol, kidney impairment.
 - **Harm:** Intense joint pain (often big toe), chronic deformity, kidney damage.
-

85. Low Vitamin D Metabolism

- **Definition:** Inadequate activation or utilization of vitamin D in body.
 - **Causes:** Low sunlight, kidney/liver disease, malabsorption, obesity.
 - **Harm:** Weak bones, muscle pain, low immunity, mood issues.
-

86. Low B12 Absorption

- **Definition:** Failure to absorb sufficient vitamin B12 from food.
 - **Causes:** Vegan diet without supplementation, intrinsic factor deficiency, gut disease.
 - **Harm:** Nerve damage, megaloblastic anemia, fatigue, memory issues.
-

87. Metabolic Fatigue

- **Definition:** Persistent tiredness due to overwhelmed or weakened metabolic systems.
 - **Causes:** Chronic illness (diabetes, thyroid), nutrient deficiency, adrenal strain.
 - **Harm:** Low endurance, poor recovery, susceptibility to infections.
-

88. Water Retention Disorder

- **Definition:** Excess fluid trapped in tissues (edema) due to regulatory imbalance.
- **Causes:** Heart, kidney, liver disease, high salt, Kapha imbalance.

- **Harm:** Swelling, breathlessness, high blood pressure.
-

- **Causes:** Pollution, smoking, junk food, chronic inflammation, stress.
 - **Harm:** Accelerated aging, cancer risk, heart disease, neurodegeneration.
-

89. Electrolyte Imbalance

- **Definition:** Abnormal levels of key minerals (Na, K, Ca, Mg, etc.) in blood.
 - **Causes:** Diarrhea, vomiting, kidney disease, diuretics, dehydration.
 - **Harm:** Muscle cramps, arrhythmias, confusion, seizures in severe cases.
-

90. Dehydration-linked Metabolism Disorder

- **Definition:** Metabolic disturbance occurring when the body lacks adequate fluid.
 - **Causes:** Low water intake, high heat, diarrhea, excessive urination.
 - **Harm:** Thick blood, low BP, kidney stress, poor detoxification.
-

91. Over-hydration Disorder

- **Definition:** Excessive water in body diluting sodium and disturbing fluid balance.
 - **Causes:** Drinking too much water, kidney failure, psychogenic polydipsia.
 - **Harm:** Nausea, confusion, seizures, brain swelling in severe cases.
-

92. Oxidative Stress Syndrome

- **Definition:** State where **free radicals exceed antioxidant defense**, damaging cells and tissues.

93. Autoimmune Metabolic Disorder

- **Definition:** Metabolic problems driven by immune system attacking own tissues (e.g., Type 1 diabetes, autoimmune thyroiditis).
 - **Causes:** Genetic predisposition, infections, environmental triggers.
 - **Harm:** Lifelong hormone dependence, multi-organ damage.
-

94. Chronic Low Energy Syndrome

- **Definition:** Long-term feeling of low energy not explained by simple tiredness, often metabolic + hormonal + psychological.
 - **Causes:** Thyroid dysfunction, diabetes, anemia, adrenal strain, poor sleep, depression.
 - **Harm:** Disability, poor quality of life, increased disease risk.
-

95. Insomnia-related Metabolic Disease

- **Definition:** Metabolic derangements (weight gain, diabetes, BP issues) driven by **chronic sleep deprivation**.
- **Causes:** Insomnia, shift work, late nights, screen overuse, stress.
- **Harm:** Obesity, insulin resistance, hypertension, mood disorders.

Category 9 – Autoimmune & Immunity Disorders

A. General Autoimmune Disorders (1–20)

1. Rheumatoid Arthritis

Definition: Rheumatoid arthritis is a chronic autoimmune disease where the immune system mistakenly attacks the **lining of the joints (synovium)**, causing persistent inflammation. Over time, this leads to cartilage and bone erosion, joint deformity, and systemic symptoms like fatigue and weight loss.

Causes: Genetic predisposition, immune dysregulation, environmental triggers (like infections, smoking).

Harm to the body: Progressive joint destruction, disability, anemia, lung/heart involvement, reduced quality of life.

2. Systemic Lupus Erythematosus (SLE)

Definition: SLE is a multi-system autoimmune disease in which the immune system produces antibodies against various tissues, including **skin, joints, kidneys, brain, and blood cells**. It features unpredictable flare-ups with rashes, pain, and organ inflammation.

Causes: Genetic susceptibility, hormonal factors (more common in women), infections, UV light, certain drugs.

Harm: Kidney failure, blood clots, heart and brain involvement, chronic fatigue, potentially life-threatening organ damage.

3. Hashimoto's Thyroiditis

Definition: Hashimoto's is an autoimmune disease where antibodies attack the **thyroid gland**, gradually destroying its hormone-

producing cells. This leads to an underactive thyroid (hypothyroidism) with slowed metabolism and multiple systemic effects.

Causes: Genetic factors, immune dysregulation, excess iodine or deficiency, stress, infections.

Harm: Fatigue, weight gain, depression, cold intolerance, infertility, high cholesterol, long-term cardiovascular risk.

4. Graves' Disease

Definition: Graves' disease is an autoimmune disorder in which antibodies **stimulate the thyroid gland** to produce too much hormone, causing hyperthyroidism. It often features eye changes (bulging eyes) and sometimes skin thickening over the shins.

Causes: Genetic predisposition, stress, smoking, infections, female hormones.

Harm: Rapid heartbeat, arrhythmias, bone loss, eye damage, muscle wasting, emotional instability.

5. Type 1 Diabetes Mellitus (Autoimmune Type)

Definition: Type 1 diabetes is an autoimmune disease where the immune system **destroys insulin-producing beta cells** in the pancreas, leading to absolute insulin deficiency. The body can no longer regulate blood sugar without injected insulin.

Causes: Genetic susceptibility, viral infections, immune misprogramming.

Harm: High blood sugar, ketoacidosis, long-term damage to eyes, kidneys, nerves, and blood vessels.

6. Celiac Disease

Definition: Celiac disease is an autoimmune reaction to **gluten (protein in wheat, barley, rye)** where ingestion triggers immune damage to the small intestinal lining. This leads to malabsorption and systemic nutrient deficiencies.

Causes: Genetic predisposition (HLA types), exposure to gluten, gut microbiome / immune imbalance.

Harm: Diarrhea, weight loss, anemia, bone loss,

skin rashes, higher risk of intestinal lymphoma if untreated.

7. Multiple Sclerosis (MS)

Definition: MS is a chronic autoimmune disease where the immune system attacks the **myelin sheath** covering nerve fibers in the brain and spinal cord. This disrupts nerve signal transmission and causes neurological symptoms that can come and go or steadily worsen.

Causes: Genetic risk, viral triggers, vitamin D deficiency, immune dysregulation.

Harm: Weakness, vision problems, balance issues, numbness, progressive disability.

8. Guillain-Barré Syndrome (GBS)

Definition: GBS is an acute autoimmune condition in which the immune system **attacks peripheral nerves**, usually after an infection, leading to rapidly progressive weakness starting in the legs and moving upward.

Causes: Often follows respiratory or gastrointestinal infections, sometimes vaccination; immune cross-reactivity.

Harm: Paralysis, breathing difficulty, autonomic dysfunction; can be life-threatening without support.

9. Myasthenia Gravis

Definition: Myasthenia gravis is an autoimmune disorder where antibodies interfere with **communication between nerves and muscles** at the neuromuscular junction. It causes fluctuating muscle weakness that worsens with activity and improves with rest.

Causes: Autoantibodies against acetylcholine receptors, thymus abnormalities, genetic/immune factors.

Harm: Drooping eyelids, difficulty swallowing, breathing problems in severe “myasthenic crisis.”

10. Psoriasis

Definition: Psoriasis is a chronic immune-mediated skin disease in which immune cells trigger **rapid overproduction of skin cells**, forming thick, red, scaly plaques, often on elbows, knees, and scalp. It's systemic, not just cosmetic.

Causes: Genetic predisposition, immune dysregulation, triggers like infections, stress, certain medications.

Harm: Itching, pain, joint involvement (psoriatic arthritis), social embarrassment, increased risk of heart disease.

11. Vitiligo

Definition: Vitiligo is an autoimmune condition where the immune system **destroys pigment-producing cells (melanocytes)**, resulting in well-defined white patches on the skin and sometimes hair.

Causes: Genetic factors, autoimmunity, oxidative stress, triggers like stress or sunburn.

Harm: Cosmetic change, sun sensitivity in depigmented areas, significant psychological and social impact.

12. Alopecia Areata

Definition: Alopecia areata is an autoimmune disease targeting **hair follicles**, causing sudden, patchy hair loss on the scalp or body, often without scarring.

Causes: Immune attack on follicles, genetics, stress as a trigger.

Harm: Loss of scalp, eyebrow, or beard hair; emotional stress, altered self-image.

13. Crohn's Disease

Definition: Crohn's disease is a chronic inflammatory bowel disease where the immune system attacks the **digestive tract**, most commonly the terminal ileum and colon, but it can affect any part from mouth to anus.

Causes: Immune dysregulation, genetic susceptibility, gut microbiome imbalance, environmental factors.

Harm: Abdominal pain, diarrhea, weight loss, fistulas, malnutrition, risk of bowel obstruction and surgery.

14. Ulcerative Colitis

Definition: Ulcerative colitis is an autoimmune/inflammatory bowel disease that causes continuous **inflammation and ulcers in the colon and rectum** lining.

Causes: Genetic risk, abnormal immune response to gut flora, environmental triggers.

Harm: Bloody diarrhea, anemia, weight loss, colon cancer risk after many years.

15. Scleroderma

Definition: Scleroderma is an autoimmune disease in which the body produces excess collagen, causing **hardening and thickening of the skin and sometimes internal organs** such as lungs, heart, and kidneys.

Causes: Immune system dysfunction, genetic factors, possible environmental triggers like silica or solvents.

Harm: Skin tightening, joint stiffness, difficulty swallowing, pulmonary hypertension, kidney crisis.

16. Autoimmune Hepatitis

Definition: Autoimmune hepatitis is chronic inflammation of the **liver** caused by the immune system attacking liver cells, leading to progressive damage and scarring.

Causes: Genetic predisposition, immune dysregulation, sometimes triggered by infections or drugs.

Harm: Jaundice, fatigue, cirrhosis, liver failure, increased need for transplant if uncontrolled.

17. Pernicious Anemia

Definition: Pernicious anemia is an autoimmune condition where antibodies attack **intrinsic factor or stomach cells**, preventing vitamin B12 absorption and causing a specific type of anemia and neurological problems.

Causes: Autoimmune destruction of gastric parietal cells and intrinsic factor.

Harm: Fatigue, pallor, nerve damage, memory problems, balance issues if untreated.

18. Addison's Disease

Definition: Addison's disease is an autoimmune destruction of the **adrenal cortex**, resulting in deficient production of cortisol and often aldosterone. The body cannot respond properly to stress without treatment.

Causes: Autoimmune adrenalitis most commonly; also infections like TB.

Harm: Severe fatigue, low blood pressure, salt loss, crisis with vomiting and shock if stressed.

19. Autoimmune Gastritis

Definition: Autoimmune gastritis is chronic inflammation and atrophy of the **stomach lining** due to immune attack, especially on acid-secreting cells.

Causes: Autoantibodies against parietal cells/intrinsic factor, often associated with other autoimmune disorders.

Harm: Reduced stomach acid, B12 deficiency, pernicious anemia, higher risk of gastric cancer.

20. Primary Biliary Cholangitis (PBC)

Definition: PBC is a chronic autoimmune disease where the immune system gradually destroys the **small bile ducts inside the liver**, leading to bile buildup and liver damage.

Causes: Autoimmune attack, genetic predisposition, environmental triggers (unknown).

Harm: Fatigue, itching, cirrhosis, liver failure, osteoporosis.

B. Joint & Connective Tissue Autoimmune Disorders (21–35)

21. Ankylosing Spondylitis

Definition: Ankylosing spondylitis is a chronic inflammatory autoimmune disease that mainly affects the **spine and sacroiliac joints**, causing inflammation that can eventually lead to fusion of vertebrae and a rigid, hunched posture.

Causes: Strong association with HLA-B27 gene, immune dysregulation, possible gut–immune link.

Harm: Chronic back pain, stiffness, reduced chest expansion, eye inflammation, disability.

22. Juvenile Idiopathic Arthritis

Definition: Juvenile idiopathic arthritis is a group of autoimmune arthritic conditions that affect **children under 16**, leading to persistent joint inflammation, pain, and swelling.

Causes: Immune system misdirected against joint tissues; genetic and environmental interplay.

Harm: Joint deformity, growth disturbances, eye inflammation, long-term disability if not controlled.

23. Reactive Arthritis

Definition: Reactive arthritis is joint inflammation that occurs **after an infection elsewhere**, often in the gut or genitourinary tract, due to immune cross-reaction.

Causes: Prior infections (e.g., Chlamydia, Salmonella, Shigella), immune response misdirected to joints.

Harm: Joint pain, eye inflammation, urinary symptoms; can become chronic in some patients.

24. Psoriatic Arthritis

Definition: Psoriatic arthritis is an inflammatory arthritis associated with **psoriasis**, where the immune system attacks joints, tendons, and entheses (attachment sites), often causing swelling of entire fingers or toes.

Causes: Genetic predisposition, immune activation in psoriasis, environmental triggers.

Harm: Joint damage, deformity, reduced mobility, increased cardiovascular risk.

25. Lupus Arthritis

Definition: Lupus arthritis refers to joint pain and inflammation occurring as part of **systemic lupus erythematosus**, often symmetrical and involving small joints but usually without major erosions.

Causes: Autoantibodies and immune complex deposition in joints in SLE.

Harm: Pain, stiffness, reduced function; adds to overall lupus disease burden.

26. Mixed Connective Tissue Disease (MCTD)

Definition: MCTD is an autoimmune overlap syndrome that shows features of **lupus, scleroderma, and polymyositis**, along with specific antibodies (anti-U1 RNP).

Causes: Underlying immune dysregulation with production of characteristic autoantibodies.

Harm: Joint pain, muscle weakness, Raynaud's, lung and heart involvement.

27. Fibromyalgia Autoimmune Pattern

Definition: Fibromyalgia is a chronic pain syndrome with widespread **musculoskeletal pain and fatigue**; while not classically autoimmune, it may coexist with autoimmune patterns and sensitized nervous system.

Causes: Disordered pain processing, stress, poor sleep, sometimes associated with autoimmune diseases.

Harm: Constant pain, sleep disturbance, brain fog, reduced quality of life.

28. Sjögren's Syndrome

Definition: Sjögren's is an autoimmune disease where immune cells attack **moisture-producing glands**, especially tear and salivary glands, causing dry eyes and mouth.

Causes: Autoantibodies (e.g., anti-SSA/SSB), genetic risk, often overlaps with RA or lupus.

Harm: Dental decay, eye damage, swallowing difficulty, fatigue, increased lymphoma risk.

29. Tendon Inflammation due to Immune Dysregulation

Definition: This refers to chronic inflammation of **tendons and their sheaths** driven by autoimmune or inflammatory diseases rather than simple overuse.

Causes: Autoimmune conditions like RA, psoriatic arthritis, spondyloarthropathies.

Harm: Persistent pain, tendon weakening, risk of tendon rupture, functional limitation.

30. Ligament Weakness from Autoimmune Disease

Definition: Autoimmune processes can gradually damage **ligaments**, the stabilizing structures around joints, leading to looseness and instability.

Causes: Chronic inflammation, autoantibodies, steroid overuse in some cases.

Harm: Joint instability, increased risk of dislocations, chronic pain.

31. Osteoporosis Linked to Autoimmune Disease

Definition: Osteoporosis in autoimmune disease is **loss of bone density** related to chronic inflammation and long-term steroid use.

Causes: Inflammatory cytokines, glucocorticoids, reduced physical activity.

Harm: Fragile bones, fractures (spine, hip), chronic pain, deformity.

32. Chronic Joint Inflammation

Definition: Ongoing inflammation in joints lasting months or years, typically driven by **autoimmune mechanisms**, not just wear-and-tear.

Causes: Conditions like RA, lupus, psoriatic arthritis, spondyloarthropathies.

Harm: Cartilage destruction, bone erosion, deformity, disability.

33. Synovitis

Definition: Synovitis is inflammation of the **synovial membrane** that lines joints and tendon sheaths, making it thick, swollen, and painful.

Causes: Autoimmune arthritis, injury, infection.

Harm: Joint swelling, pain, erosion of cartilage if persistent.

34. Cartilage Degeneration (Autoimmune-related)

Definition: Autoimmune inflammation can hasten **breakdown of joint cartilage**, the smooth cushion between bones.

Causes: Cytokines and enzymes released in RA, lupus arthritis, psoriatic arthritis.

Harm: Joint space narrowing, pain, stiffness, osteoarthritis-like changes.

35. Bone Marrow Autoimmune Interference

Definition: Some autoimmune diseases attack or disrupt **bone marrow**, where blood cells are produced, impairing normal hematopoiesis.

Causes: Autoimmune aplastic anemia, lupus, other marrow-targeting antibodies.

Harm: Anemia, low white cells, low platelets → infections, bleeding, fatigue.

C. Skin & Hair Autoimmune Disorders (36–45)

(Note: Vitiligo, alopecia, psoriasis already appeared above, but I'll still give full definitions here in a slightly different wording so each entry is complete.)

36. Vitiligo

Definition: Vitiligo is an acquired skin condition where immune cells **destroy melanocytes**, causing sharply demarcated white patches on skin and sometimes hair and mucosa.

Causes: Autoimmunity, genetics, oxidative damage, triggers like stress or trauma to skin

(Koebner phenomenon).

Harm: Loss of pigmentation, sunburn risk on depigmented areas, emotional and social distress.

37. Alopecia Areata

Definition: Alopecia areata is an immune-mediated disorder in which lymphocytes attack **hair follicles**, leading to sudden, non-scarring hair loss in circular patches.

Causes: Autoimmune tendency, emotional stress, sometimes associated with thyroid/other autoimmune diseases.

Harm: Patchy baldness, potential loss of eyebrows and eyelashes, psychological effects.

38. Psoriasis

Definition: Psoriasis is a chronic inflammatory skin disease driven by overactive immune pathways, causing **rapid turnover of skin cells** and buildup of thick scales over red plaques.

Causes: Genetic susceptibility, immune triggers (infections like strep), stress, medications.

Harm: Discomfort, social stigma, risk of psoriatic arthritis and increased cardiovascular risk.

39. Pemphigus Vulgaris

Definition: Pemphigus vulgaris is a serious autoimmune blistering disease where antibodies attack **connections between skin cells (desmogleins)**, causing fragile blisters and erosions on skin and mucous membranes.

Causes: Autoantibody formation, genetic factors, sometimes drug triggers.

Harm: Painful erosions, fluid loss, infection risk, can be life-threatening without treatment.

40. Lichen Planus

Definition: Lichen planus is an inflammatory skin and mucosal condition thought to have an autoimmune basis, producing **flat-topped, itchy, violaceous papules** and sometimes mouth/genital lesions.

Causes: Immune reaction to unknown triggers,

certain drugs, infections like hepatitis C.

Harm: Intense itching, oral ulcers, scarring in hair-bearing or genital areas.

41. Chronic Eczema (Autoimmune Type)

Definition: Some chronic eczema/dermatitis patterns involve **immune overreaction** to internal or external triggers, with long-standing red, itchy, thickened skin.

Causes: Genetic barrier defects, immune hyperreactivity, allergens, stress.

Harm: Skin thickening, infection from scratching, sleep disturbance, reduced quality of life.

42. Dermatomyositis

Definition: Dermatomyositis is an autoimmune disease combining **skin rash and muscle inflammation**, especially affecting shoulders and hips, with characteristic rashes over eyelids and joints.

Causes: Immune attack on small blood vessels in muscle and skin; sometimes associated with malignancy.

Harm: Muscle weakness, difficulty swallowing or breathing, increased cancer risk.

43. Bullous Pemphigoid

Definition: Bullous pemphigoid is an autoimmune blistering disorder where antibodies target **proteins at the dermal-epidermal junction**, causing tense blisters mainly in older adults.

Causes: Autoantibodies, some drugs, age-related immune changes.

Harm: Widespread blisters, itching, risk of infection and dehydration in severe cases.

44. Chronic Hives (Autoimmune Urticaria)

Definition: Autoimmune urticaria is a form of chronic hives where the immune system **activates mast cells**, causing recurrent itchy wheals and

sometimes angioedema for months or years.

Causes: Autoantibodies against IgE receptors, associated autoimmune conditions, stress.

Harm: Disturbing itching, swelling of lips/eyelids, rarely airway compromise.

45. Skin Pigmentation Loss (Autoimmune Pattern)

Definition: This refers to **loss of skin color** due to immune damage to pigment cells, typically seen in vitiligo-like processes.

Causes: Autoimmune attack on melanocytes, genetics, oxidative stress.

Harm: Cosmetic disfigurement, psychological distress, sensitivity to sunlight.

D. Nervous System Autoimmune Disorders (46–55)

(MS, GBS, Myasthenia already defined; I'll succinctly expand the others.)

46. Multiple Sclerosis

Definition: Multiple sclerosis is a chronic demyelinating autoimmune disease of the **central nervous system**, where immune cells attack myelin and sometimes axons, causing scattered plaques and neurological deficits.

Causes: Genetic predisposition, previous viral infections, low vitamin D, immune misregulation.

Harm: Progressive weakness, coordination problems, sensory loss, visual disturbances, disability.

47. Guillain-Barré Syndrome

Definition: GBS is an acute, rapidly evolving autoimmune neuropathy in which the immune system targets **peripheral nerve myelin (and sometimes axons)**, typically starting in the legs and ascending.

Causes: Often follows infections (e.g., Campylobacter, viruses), molecular mimicry.

Harm: Paralysis, breathing failure, autonomic instability; recovery may be prolonged.

48. Myasthenia Gravis

Definition: Myasthenia gravis is a chronic autoimmune disorder impairing **neuromuscular transmission**, leading to fluctuating skeletal muscle weakness that worsens with use.

Causes: Autoantibodies against acetylcholine receptors or related proteins; thymus abnormalities.

Harm: Double vision, drooping eyelids, chewing and breathing difficulties in severe cases.

49. Chronic Inflammatory Demyelinating Polyneuropathy (CIDP)

Definition: CIDP is a long-lasting autoimmune disease of **peripheral nerves**, similar to a chronic, relapsing form of GBS, causing demyelination and progressive or stepwise weakness.

Causes: Autoimmune attack on peripheral nerve myelin; cause of trigger often unknown.

Harm: Limb weakness, sensory loss, reduced reflexes, disability if untreated.

50. Optic Neuritis (Immune-Mediated)

Definition: Optic neuritis is inflammation of the **optic nerve**, often immune-mediated, resulting in sudden visual loss and eye pain, sometimes associated with MS.

Causes: Demyelinating disease (MS), infections, autoimmune reactions.

Harm: Blurred or lost vision, color vision defects, risk of recurring episodes or MS development.

51. Autoimmune Neuropathy

Definition: Autoimmune neuropathy is damage to **peripheral nerves** caused by immune attack, leading to sensory and/or motor symptoms.

Causes: Autoantibodies, paraneoplastic syndromes, systemic autoimmune diseases.

Harm: Numbness, burning pain, weakness, balance problems.

52. Autoimmune Ataxia

Definition: Autoimmune ataxia involves immune-mediated injury to the **cerebellum or its connections**, causing lack of coordination and clumsy movements.

Causes: Autoantibodies (e.g., gluten ataxia), paraneoplastic syndromes, other autoimmune conditions.

Harm: Gait instability, frequent falls, difficulty with fine movements.

53. Autonomic Nervous System Autoimmune Disorders

Definition: These disorders involve immune attack on **autonomic nerves**, affecting heart rate, blood pressure, sweating, digestion and other involuntary functions.

Causes: Autoimmune autonomic ganglionopathy, paraneoplastic processes, systemic autoimmune disease.

Harm: Dizziness, fainting, abnormal heart rate, digestive problems, temperature dysregulation.

54. Peripheral Neuropathy Autoimmune

Definition: A peripheral neuropathy specifically caused or strongly driven by autoimmunity, rather than diabetes or toxins.

Causes: Vasculitic neuropathy, CIDP, lupus, Sjögren's, paraneoplastic syndromes.

Harm: Pain, weakness, sensory loss, reduced reflexes, impaired walking.

55. Chronic Nerve Inflammation

Definition: Persistent inflammation of nerves due to **autoimmune or inflammatory mechanisms**, leading to progressive nerve damage over time.

Causes: Chronic autoimmune neuropathies, vasculitis, systemic inflammatory diseases.

Harm: Ongoing pain, muscle weakness, sensory deficits, disability.

E. Endocrine & Hormonal Autoimmune Disorders (56–65)

56. Type 1 Diabetes Mellitus

Definition: Autoimmune destruction of **pancreatic beta cells**, causing near-total lack of insulin and dependence on external insulin for survival.

Causes: Autoimmune attack, genetic risk, viral/environmental triggers.

Harm: Hyperglycemia, ketoacidosis, long-term eye, kidney, nerve, and heart damage.

57. Addison's Disease

Definition: Autoimmune adrenal insufficiency where antibodies destroy the **adrenal cortex**, lowering cortisol (and often aldosterone) needed for stress response, blood pressure and salt balance.

Causes: Autoimmune adrenalitis, sometimes infections like TB.

Harm: Extreme fatigue, weight loss, low BP, salt craving, crisis under stress.

58. Hashimoto's Thyroiditis

Definition: Chronic autoimmune inflammation of the **thyroid gland** leading to gradual thyroid cell destruction and hypothyroidism.

Causes: Genetic predisposition, immune misregulation, iodine imbalance, stress.

Harm: Slow metabolism, weight gain, depression, infertility, high cholesterol.

59. Graves' Disease

Definition: Autoimmune hyperthyroidism where antibodies stimulate **TSH receptors** causing excessive thyroid hormone production and

sometimes eye/orbital tissue inflammation.
Causes: Autoantibodies, genetics, smoking, stress.

Harm: Weight loss, tremors, heart rhythm problems, eye bulging and vision issues.

60. Autoimmune Hypoparathyroidism

Definition: Autoimmune attack on the **parathyroid glands**, leading to low parathyroid hormone and disturbed calcium/phosphate balance.

Causes: Autoimmune polyglandular syndromes, isolated autoimmunity.

Harm: Low calcium → muscle cramps, tingling, seizures, heart rhythm issues.

61. Polyglandular Autoimmune Syndrome

Definition: Condition where **multiple endocrine glands** (e.g., thyroid, adrenals, pancreas, parathyroid) are attacked by the immune system, leading to several hormonal deficiencies together.

Causes: Strong genetic and immune predisposition, often familial.

Harm: Complex hormonal imbalances, Addison's, thyroid disease, Type 1 diabetes, hypoparathyroidism combined.

62. Insulin Autoimmune Syndrome

Definition: Rare autoimmune disorder where the body produces **antibodies against insulin**, causing episodes of spontaneous hypoglycemia.

Causes: Genetic susceptibility, exposure to certain drugs, immune dysfunction.

Harm: Recurrent low sugar spells, confusion, fainting, seizures.

63. Autoimmune Adrenal Insufficiency

Definition: Adrenal gland failure specifically caused by autoimmune attack, essentially an Addison-type process.

Causes: Autoimmune adrenalitis, part of

polyglandular syndrome.

Harm: Chronic weakness, low blood pressure, inability to handle stress.

64. Premature Ovarian Failure (Autoimmune)

Definition: Early loss of ovarian function before age 40 due to **immune-mediated damage** to ovarian tissue.

Causes: Autoimmune oophoritis, associated with other autoimmune diseases.

Harm: Infertility, early menopause symptoms, bone loss, cardiovascular risk.

65. Pituitary Autoimmune Disorders

Definition: Autoimmune inflammation of the **pituitary gland** (hypophysitis) resulting in hormone deficiencies affecting multiple endocrine organs.

Causes: Isolated autoimmune hypophysitis, drug- or pregnancy-associated, systemic autoimmunity.

Harm: Fatigue, adrenal failure, low thyroid/sex hormones, headaches, visual symptoms.

F. Digestive Autoimmune Disorders (66–70)

(Some already appeared above, but I'll include them fully here.)

66. Celiac Disease

Definition: Autoimmune enteropathy where ingestion of **gluten** causes immune-mediated damage to the small intestinal villi, leading to malabsorption.

Causes: Genetic predisposition (HLA-DQ2/DQ8), gluten exposure, immune dysregulation.

Harm: Diarrhea, bloating, anemia, bone loss, growth delay, higher cancer risk if untreated.

67. Crohn's Disease

Definition: Chronic inflammatory/autoimmune bowel disease affecting **any part of the GI tract**, with transmural inflammation that can form strictures and fistulas.

Causes: Immune dysregulation to gut microbes, genetics, smoking, environmental triggers.

Harm: Abdominal pain, diarrhea, malnutrition, obstruction, perianal disease.

68. Ulcerative Colitis

Definition: Autoimmune colitis limited to the **colon and rectum**, affecting the mucosal layer and causing continuous ulceration from rectum proximally.

Causes: Genetic risk, abnormal immune reaction to gut flora, environmental factors.

Harm: Bloody diarrhea, anemia, colon cancer risk, toxic megacolon in severe cases.

69. Autoimmune Gastritis

Definition: Chronic immune-mediated destruction of **stomach lining**, especially parietal cells, leading to atrophic gastritis and loss of intrinsic factor.

Causes: Autoantibodies, often associated with other autoimmune diseases.

Harm: B12 deficiency, pernicious anemia, increased gastric cancer and carcinoid risk.

70. Primary Biliary Cholangitis

Definition: Autoimmune disease primarily destroying the **small intrahepatic bile ducts**, causing cholestasis (impaired bile flow) and progressive liver damage.

Causes: Autoantibodies (AMA), genetic predisposition, environmental triggers.

Harm: Itching, fatigue, fat-soluble vitamin deficiency, cirrhosis, portal hypertension.

Category 10 — Skin, Hair, Nail, Allergy & Sensory Disorders

A. SKIN DISORDERS (1–70)

1. Acne (Pittaja)

Definition: A chronic inflammatory disease of hair follicles and sebaceous glands, causing pimples, blackheads, whiteheads and sometimes deep cysts, most common on face, chest and back.

Causes: Pitta aggravation, excess sebum, hormonal changes (puberty, PCOS), oily cosmetics, junk food, stress.

Harm: Scarring, dark spots, pain, low self-confidence, chronic inflammation.

2. Eczema (Vata–Pitta imbalance)

Definition: A group of skin conditions with dry, itchy, inflamed patches that may ooze or crust, often recurring and linked to hypersensitive skin.

Causes: Vata–Pitta imbalance, allergies, irritants, dry climate, stress, genetic tendency.

Harm: Intense itching, skin thickening, infection from scratching, disturbed sleep.

3. Psoriasis

Definition: A chronic immune-mediated skin disease where skin cells multiply too fast, forming thick, red plaques with silvery scales, often on knees, elbows and scalp.

Causes: Genetic predisposition, immune dysregulation, stress, infections, certain medicines.

Harm: Cracking/bleeding skin, joint involvement (psoriatic arthritis), psychological stress, increased heart risk.

4. Dermatitis

Definition: General term for inflammation of the skin, presenting as redness, swelling, scaling and itching, with various types (contact, atopic, seborrheic, etc.).

Causes: Irritants, allergens, dry skin, immune overreaction, chemicals, soaps, genetics.

Harm: Discomfort, social embarrassment, secondary infections, chronic thickened skin.

5. Urticaria (Hives)

Definition: Sudden appearance of raised, itchy wheals on the skin that come and go, sometimes with deeper swelling (angioedema).

Causes: Allergies (foods, drugs, bites), infections, stress, autoimmune reaction.

Harm: Severe itching, swelling, rarely breathing difficulty (emergency in anaphylaxis).

6. Fungal Infections (Ringworm, Tinea)

Definition: Superficial infections of skin, scalp or nails caused by dermatophyte fungi, forming ring-shaped, itchy, scaly patches.

Causes: Warm moist environments, sharing towels/clothes, low immunity, hygiene issues.

Harm: Spreading rash, cracking, secondary bacterial infection, nail deformity.

7. Bacterial Skin Infection (Pyoderma)

Definition: Infection of the skin by bacteria (usually Staph or Strep) leading to pustules, crusts, boils or cellulitis.

Causes: Cuts, insect bites, poor hygiene, diabetes, low immunity.

Harm: Pain, fever, abscess formation, risk of systemic infection.

8. Viral Skin Infection (Herpes Simplex, Shingles)

Definition: Skin outbreaks caused by viruses, such as clustered blisters around lips/genitals (herpes) or painful band-like rash (shingles) along nerves.

Causes: Herpes simplex or varicella-zoster virus reactivation, stress, immune weakness.

Harm: Pain, scarring, post-herpetic neuralgia, high contagion risk (herpes).

9. Boils (Vidradhi)

Definition: Localized deep infection of a hair follicle and surrounding tissue forming a painful, pus-filled swelling.

Causes: Bacterial infection (often Staph), friction, poor hygiene, diabetes.

Harm: Severe pain, scarring, spreading infection, multiple boils (carbuncles).

10. Carbuncles (Granthi)

Definition: Cluster of interconnected boils forming a larger, deeper infected lump, often on back of neck or thighs.

Causes: Recurrent boils, uncontrolled diabetes, low immunity.

Harm: High fever, severe pain, risk of sepsis if untreated.

11. Rashes (Vata/Pitta/Kapha Types)

Definition: Generalized or localized areas of redness, bumps, or spots on skin, whose qualities vary with dosha dominance—dry (Vata), red-hot (Pitta), or moist-swollen (Kapha).

Causes: Allergies, infections, heat/cold, drugs, systemic illness.

Harm: Itching, discomfort, possible sign of serious internal disease.

12. Skin Dryness (Ruksha Tvacha)

Definition: Abnormally dry, rough, flaky skin lacking moisture and natural oils.

Causes: Vata aggravation, cold weather, harsh soaps, aging, dehydration.

Harm: Itching, cracks, early wrinkles, increased infection and eczema risk.

13. Excess Oiliness (Picchila Tvacha)

Definition: Skin producing too much sebum, appearing shiny and greasy, especially on T-zone of face.

Causes: Kapha and Pitta imbalance, hormones, genetics, heavy creams.

Harm: Clogged pores, acne, blackheads, dull appearance.

14. Hyperpigmentation

Definition: Darkening of certain skin areas due to excess melanin, appearing as patches or spots on face or body.

Causes: Sun exposure, hormonal changes, post-inflammation (acne), drugs.

Harm: Cosmetic concern, uneven skin tone, may indicate endocrine issues.

15. Hypopigmentation (Vitiligo-type)

Definition: Loss or reduction of skin color in certain areas due to decreased melanin.

Causes: Autoimmune destruction of melanocytes, post-inflammatory damage.

Harm: White patches, sun sensitivity, psychological distress.

16. Freckles (Keshara)

Definition: Small, light to dark brown flat spots on sun-exposed areas, due to localized melanin increase.

Causes: Genetic tendency, sun exposure, Pitta predominance.

Harm: Mainly cosmetic; may reflect high sun damage risk.

17. Age Spots (Vridhdha Tvacha)

Definition: Flat brown or black spots appearing with age on sun-exposed skin, also called liver spots.

Causes: Cumulative UV exposure, aging of melanocytes.

Harm: Cosmetic; marker of chronic sun damage, slight cancer risk pointer.

18. Wrinkles (Jara Lakshana)

Definition: Visible lines and creases on skin due to loss of collagen, elasticity and moisture with aging.

Causes: Natural aging, sun exposure, smoking, Vata dominance, poor nutrition.

Harm: Cosmetic aging, sagging skin, psychological impact.

19. Skin Itching (Kandu)

Definition: Unpleasant sensation on skin provoking a desire to scratch, localized or generalized.

Causes: Allergies, dryness, infections, liver/kidney disease, nervous causes.

Harm: Scratching → abrasions, infection, sleep disturbance.

20. Skin Burning (Daha)

Definition: Hot, burning sensation of the skin, with or without visible redness.

Causes: Pitta aggravation, sunburn, irritants, neuropathy, inflammation.

Harm: Pain, anxiety, can indicate underlying systemic inflammation.

21. Cold-induced Skin Disorders

Definition: Skin changes triggered by cold, such as chilblains, Raynaud-like color changes or urticaria.

Causes: Cold exposure, Vata aggravation, vascular hypersensitivity.

Harm: Pain, color changes, ulcers in severe cases.

22. Heat-induced Skin Disorders

Definition: Rashes and irritation due to heat, like prickly heat, sweat rashes or heat urticaria.

Causes: Hot climate, sweating, tight clothing, Pitta aggravation.

Harm: Itching, discomfort, infection if repeatedly scratched.

23. Skin Redness (Rakta Tvacha)

Definition: Abnormal redness of skin from increased blood flow or inflammation in superficial vessels.

Causes: Pitta aggravation, allergies, sunburn, infection, eczema, rosacea.

Harm: Burning, visibility, may signal deeper inflammation.

24. Allergic Dermatitis

Definition: Skin inflammation caused by delayed allergic reaction after contact with a particular substance.

Causes: Metals, cosmetics, plants, chemicals, fragrances.

Harm: Intense itching, blisters, chronic thickening, recurrence on re-exposure.

25. Contact Dermatitis

Definition: Dermatitis confined to areas touching an irritant or allergen, causing redness, itching, sometimes blisters.

Causes: Soaps, detergents, acids/alkalis, nickel, rubber, plants.

Harm: Burning, pain, occupational disability if severe.

26. Scabies

Definition: Contagious skin infestation by mites that burrow into the skin, causing intense nighttime itching and small burrows/bumps.

Causes: Close contact with infected person or bedding/clothing.

Harm: Severe itching, secondary infections, household outbreaks.

27. Erythema Nodosum

Definition: Painful red nodules usually on shins, representing inflammation of fat under the skin (panniculitis).

Causes: Infections, drugs, autoimmune diseases, sarcoidosis, gut disease.

Harm: Painful walking, sign of systemic disease.

28. Lichen Planus

Definition: Immune-mediated skin and mucosal disorder with flat-topped, purple, itchy bumps and possible oral/genital lesions.

Causes: Autoimmune reaction, some drugs, hepatitis C.

Harm: Intense itching, oral discomfort, pigment changes, scarring in hair/genital areas.

29. Bullous Skin Disorders

Definition: Group of diseases characterized by formation of blisters (bullae) in skin or mucosa due to structural or immune damage.

Causes: Autoimmune (pemphigus, pemphigoid), genetic defects, drugs.

Harm: Skin fragility, infection risk, fluid loss, can be life-threatening.

30. Chronic Wounds

Definition: Wounds that fail to heal in expected time, remaining open or repeatedly breaking down.

Causes: Poor blood flow, diabetes, pressure, infection, malnutrition.

Harm: Risk of deep infection, amputation, sepsis.

31. Non-healing Ulcers

Definition: Persistent open sores on skin or mucosa that do not close with usual care.

Causes: Venous insufficiency, arterial disease, diabetes, pressure, malignancy.

Harm: Chronic pain, infection, tissue loss, malignancy risk in long-standing ulcers.

32. Diabetic Skin Infection

Definition: Skin infections occurring in people with diabetes due to high sugar and low immunity.

Causes: Poor glycemic control, neuropathy, vascular disease.

Harm: Abscesses, cellulitis, gangrene, delayed healing.

33. Skin Pigmentation Disorders

Definition: Conditions where melanin distribution is abnormal, causing darker or lighter patches.

Causes: Hormonal changes, sun exposure, autoimmune, post-inflammation.

Harm: Cosmetic problems, sometimes marker of systemic disease.

34. Skin Swelling (Shotha)

Definition: Local or generalized edema of skin due to fluid accumulation in tissues.

Causes: Allergy, infection, trauma, heart/kidney disease.

Harm: Pain, tightness, impaired movement, indicator of serious systemic issue.

35. Skin Blotches

Definition: Irregular, discolored areas on skin that may be lighter, darker, or reddish.

Causes: Sun damage, hormonal disturbance, drug reactions, infections.

Harm: Cosmetic concern, could represent underlying disease.

36. Skin Cracks (Rukshata)

Definition: Splitting or fissuring of dry, thickened skin, often on heels and hands.

Causes: Extreme dryness, friction, cold weather, Vata aggravation.

Harm: Pain, bleeding, entry point for infections.

37. Athlete's Foot

Definition: Fungal infection between toes and on feet, causing itching, peeling, and cracking.

Causes: Moist shoes, public showers, occlusive footwear, sweating.

Harm: Painful cracks, secondary bacterial infection, spread to nails.

38. Nail Bed Infection

Definition: Infection of the tissue under or around the nail, often causing redness, pain, and pus.

Causes: Injury, biting, manicures, ingrown nails, fungi/bacteria.

Harm: Nail deformity, chronic pain, spread to bone (rare).

39. Burns (Thermal/Chemical)

Definition: Tissue damage due to heat, electricity, chemicals or radiation, affecting skin and deeper layers.

Causes: Fire, hot liquids, acids/alkalis, electricity, sun.

Harm: Pain, fluid loss, infection, scarring, contractures, shock in severe burns.

40. Sunburn

Definition: Acute skin injury from excessive UV radiation, causing redness, pain, sometimes blisters and peeling.

Causes: Prolonged sun exposure without protection.

Harm: Pain, dehydration, long-term skin aging and skin cancer risk.

41. Bedsores (Pressure Ulcers)

Definition: Skin and underlying tissue damage over bony areas due to prolonged pressure and poor blood flow.

Causes: Immobility, poor nutrition, moisture, friction in bedridden patients.

Harm: Deep ulcers, bone infection, sepsis.

42. Skin Tags

Definition: Small, soft, benign skin growths attached by a stalk, often in friction areas.

Causes: Obesity, friction, insulin resistance, aging.

Harm: Cosmetic concern, irritation if rubbed.

43. Milia

Definition: Tiny white cysts under the skin, formed by trapped keratin, often on face.

Causes: Blocked pores, skin healing, newborn

physiology.

Harm: Cosmetic only; no systemic harm.

44. Warts

Definition: Small, rough growths caused by HPV infection of skin cells.

Causes: Human papillomavirus contact, micro-injuries in skin.

Harm: Spread, pain if on weight-bearing areas, cosmetic issues.

45. Pimples

Definition: Localized inflammatory bumps on skin when hair follicles clog with oil and dead cells, sometimes filled with pus.

Causes: Excess sebum, bacteria, hormones, oily products.

Harm: Scarring, spots, appearance-related stress.

46. Cold Sores

Definition: Small painful blisters, usually on lips, caused by herpes simplex virus reactivation.

Causes: HSV-1 infection, stress, fever, sun exposure.

Harm: Pain, recurrent attacks, contagious spread.

47. Chickenpox Marks

Definition: Scars or pigmented spots left after healing of chickenpox lesions.

Causes: Deep skin involvement, scratching during infection.

Harm: Cosmetic scars, especially on face.

48. Erythema Multiforme

Definition: Immune-mediated skin reaction with target-like (bull's-eye) lesions, sometimes involving mucous membranes.

Causes: Infections (herpes, Mycoplasma), drugs.

Harm: Pain, risk of more severe forms (SJS/TEN), mucosal damage.

49. Hyperkeratosis

Definition: Thickening of the outer skin layer due to excess keratin production.

Causes: Chronic friction, psoriasis, eczema, vitamin A deficiency.

Harm: Rough appearance, cracking, discomfort.

50. Seborrheic Dermatitis

Definition: Chronic inflammatory condition causing red, flaky, greasy patches on scalp, face, and trunk.

Causes: Overgrowth of skin yeasts, oily skin, stress, cold weather.

Harm: Dandruff, itching, social discomfort.

51. Ringworm Scalp (Tinea Capitis)

Definition: Fungal infection of scalp hair and skin, causing patches of hair loss with scaling.

Causes: Dermatophyte fungi, spread via contact/combs.

Harm: Itching, scarring alopecia if severe.

52. Dandruff-related Scalp Rash

Definition: Flaky scalp with itching and mild redness, sometimes extending beyond hairline.

Causes: Seborrheic dermatitis, dry scalp, harsh shampoos.

Harm: Cosmetic issues, discomfort, social embarrassment.

53. Allergic Skin Swelling

Definition: Rapid onset swelling of skin or deeper tissues due to allergic reaction (angioedema).

Causes: Foods, drugs, insect stings, contact allergens.

Harm: Pain, distorted appearance; if airway involved, life-threatening.

54. Purpura

Definition: Purple or red spots on skin from bleeding under the surface (non-blanching).

Causes: Platelet problems, vessel inflammation, drugs, infections.

Harm: Indicator of serious blood/immune disease, risk of organ bleeding.

55. Vitiligo Progression

Definition: Worsening spread of depigmented patches over time in vitiligo.

Causes: Ongoing autoimmune destruction of melanocytes, oxidative stress.

Harm: Increasing cosmetic impact, more sun-sensitive skin.

56. Kapha-related Skin Thickening

Definition: Skin becomes thicker, oilier, sometimes nodular due to Kapha and Meda predominance.

Causes: Obesity, Kapha aggravation, chronic low-grade inflammation.

Harm: Coarse texture, prone to acne/cysts, sluggish detox.

57. Pitta-induced Redness

Definition: Skin redness and flushing driven by excess heat and blood flow.

Causes: Spicy food, sun, alcohol, Pitta prakriti, rosacea-like patterns.

Harm: Burning, visible vessels, sensitivity.

58. Vata-induced Roughness

Definition: Dry, thin, rough skin due to lack of oil and moisture.

Causes: Vata aggravation, aging, cold wind, low hydration.

Harm: Cracking, early wrinkles, itchiness.

59. Chronic Skin Infection

Definition: Repeated or long-lasting infections affecting the skin.

Causes: Diabetes, immune weakness, poor hygiene, resistant organisms.

Harm: Scarring, systemic spread, chronic inflammation.

60. Fungal Nail Infection

Definition: Fungal invasion of nails causing thick, discolored, brittle nails.

Causes: Tinea fungi, moist shoes, communal showers.

Harm: Nail deformity, pain, spread to other nails/skin.

61. Insect Bite Allergy

Definition: Exaggerated skin reaction to insect saliva or venom.

Causes: Mosquito, flea, bedbug, bee/wasp stings.

Harm: Large itchy swellings, blisters, rarely anaphylaxis.

62. Skin Necrosis

Definition: Death of skin tissue leading to blackened or dead areas.

Causes: Severe infection, vascular occlusion, burns, drug reactions.

Harm: Open wounds, sepsis, need for surgery.

63. Erythroderma

Definition: Widespread redness and scaling involving most of the skin surface.

Causes: Severe eczema/psoriasis, drug reactions, malignancy, unknown.

Harm: Fluid and heat loss, infection, life-threatening imbalance.

64. Drug-induced Rash

Definition: Skin eruption triggered by medication intake.

Causes: Antibiotics, anti-seizure drugs, painkillers, many others.

Harm: Itching, blistering; in severe cases, SJS/TEN threatening life.

65. Contact Allergy Rash

Definition: Rash at sites touching an allergen, often with redness, small bumps, blisters.

Causes: Metals, perfumes, dyes, plants, rubber.

Harm: Itch, pain, chronic dermatitis on repeated contact.

66. Seasonal Skin Flare-ups

Definition: Recurring worsening of skin diseases during certain seasons (e.g., winter dryness or summer heat rash).

Causes: Climate changes affecting Vata/Pitta/Kapha balance, allergens.

Harm: Recurrent symptoms, need for seasonal management.

67. Psoriatic Lesions

Definition: Specific raised, red, scaly plaques of psoriasis appearing on skin or scalp.

Causes: Immune activation, triggers like infection, stress, trauma to skin.

Harm: Cracking, bleeding, discomfort, social stigma.

68. Acne Scarring

Definition: Permanent depressions, pits or raised marks left after severe acne heals.

Causes: Deep inflammation, picking/squeezing

pimples, delayed treatment.

Harm: Long-term cosmetic impact, low self-esteem.

69. Hyperpigmented Patches

Definition: Darker-than-normal patches of skin due to melanin overproduction.

Causes: Sun, friction, hormone changes, post-inflammation, some drugs.

Harm: Uneven tone, cosmetic concern; may point to metabolic or hormonal issues.

70. Atopic Dermatitis

Definition: Chronic, itchy, inflammatory skin disease often starting in childhood, associated with allergy and asthma.

Causes: Genetic barrier defect, immune hypersensitivity, allergens, dry skin.

Harm: Severe itching, sleep loss, infections, effect on growth and psyche in children.

B. HAIR DISORDERS (71–100)

71. Hair Loss (Kesh Kshaya)

Definition: Progressive reduction in the number or thickness of hairs on the scalp or body, either diffuse or patchy, leading to visible thinning or baldness.

Causes: Genetics, hormonal imbalance, stress, nutrient deficiency, illness, medications, Vata aggravation.

Harm to the body: Cosmetic concern, low self-esteem, can signal internal disease or deficiency.

72. Premature Graying

Definition: Loss of natural hair pigment (melanin) occurring much earlier than expected age, leading to gray or white hair in youth or early adulthood.

Causes: Genetics, oxidative stress, nutritional deficiencies (B12, copper), stress, Pitta aggravation.

Harm: Mainly cosmetic, but often associated with stress, poor lifestyle, or deficiency states.

73. Dandruff (Pityriasis)

Definition: Chronic flaking of the scalp with fine or large white/yellow scales, sometimes accompanied by itching and redness.

Causes: Overgrowth of scalp yeast (*Malassezia*), oily skin, stress, cold weather, harsh shampoos.

Harm: Itching, embarrassment, may progress to seborrheic dermatitis.

74. Oily Scalp

Definition: Scalp that produces excess sebum, making hair quickly greasy and sometimes leading to clogged follicles.

Causes: Hormonal influence (androgens), Kapha/Pitta aggravation, heavy hair oils or products.

Harm: Predisposes to dandruff, acne near hairline, hair fall.

75. Dry Scalp

Definition: Scalp lacking moisture and natural oils, appearing flaky and tight, often mistaken for dandruff.

Causes: Vata aggravation, overwashing, harsh shampoos, cold dry climate, dehydration.

Harm: Itching, small white flakes, hair breakage, discomfort.

76. Hair Thinning

Definition: Gradual decrease in hair density or shaft diameter across the scalp without complete bald patches.

Causes: Nutritional deficiency, thyroid problems, chronic illness, androgenetic alopecia, stress.

Harm: Visible reduction in volume, psychological stress, can progress to baldness.

77. Alopecia Areata

Definition: Autoimmune condition causing well-defined, round patches of hair loss on scalp or body, often suddenly and without scarring.

Causes: Autoimmune attack on hair follicles, stress, family tendency.

Harm: Patchy baldness, possible total scalp loss, emotional distress.

78. Bald Patches

Definition: Localized areas of complete hair loss that may be due to autoimmune, traumatic, or fungal causes.

Causes: Alopecia areata, fungal infection (tinea), scarring conditions, traction, injury.

Harm: Cosmetic deficit, social anxiety, possible permanent loss if scarring.

79. Fragile Hair

Definition: Hair shafts that break easily along their length, giving a frizzy, unhealthy, uneven appearance.

Causes: Excess heat styling, chemical treatments, protein deficiency, harsh combing, Vata dryness.

Harm: Thinning length, split ends, inability to grow long hair.

80. Hair Breakage

Definition: Physical snapping of hair shafts, usually mid-length or near tips, leading to uneven strands and poor length retention.

Causes: Mechanical damage, bleaching, frequent coloring, tight hairstyles, dryness.

Harm: Short broken hairs, rough texture, apparent thinning.

81. Hair Split Ends

Definition: Splitting of the hair shaft at the tips into two or more fragments, giving a frayed look.

Causes: Over-brushing, heat damage, chemicals, lack of trimming, dryness.

Harm: Frizzy appearance, tangling, breakage traveling up the shaft.

82. Hair Shaft Disorder

Definition: Structural abnormalities of the hair shaft (twisting, beading, fragility) that make hair look abnormal and prone to breakage.

Causes: Genetic conditions, nutritional deficiencies, chemical/physical damage.

Harm: Persistent hair breakage, difficulty maintaining normal hair length/texture.

83. Weak Hair Roots

Definition: Hair that easily sheds from the scalp because the follicle anchoring is weak or inflamed.

Causes: Poor scalp circulation, nutrient deficiency, hormonal changes, inflammation, chronic illness.

Harm: Increased hair fall, thinning, early baldness if persistent.

84. Hair Fall Due to Stress

Definition: Excessive shedding of hairs (telogen effluvium) following emotional or physical stress.

Causes: Major illness, surgery, emotional trauma, crash dieting, lack of sleep.

Harm: Sudden visible thinning, anxiety, but often reversible if cause is treated.

85. Hair Fall Due to Hormonal Imbalance

Definition: Hair fall related to changes in sex hormones, thyroid hormones or cortisol.

Causes: PCOS, pregnancy/postpartum changes, thyroid disease, androgen excess.

Harm: Patterned hair loss, thinning, can become chronic if hormones remain disturbed.

86. Hair Loss After Illness

Definition: Increased hair shedding several weeks after an acute illness or fever.

Causes: Infections (e.g., dengue, typhoid,

COVID), surgery, high fever.

Harm: Diffuse thinning, temporary loss of volume; usually regrows with time.

87. Postpartum Hair Loss

Definition: Shedding of large amounts of hair roughly 2–4 months after childbirth, as hair cycles reset.

Causes: Sudden drop in pregnancy hormones, stress, nutritional depletion.

Harm: Alarm and cosmetic concern for the mother, usually self-limiting.

88. Seasonal Hair Shedding

Definition: Increased hair fall during particular seasons (commonly autumn/fall) due to physiological hair cycle shifts.

Causes: Natural shedding cycle, environmental changes, possible vitamin variations.

Harm: Temporary reduction in density; usually recovers.

89. Nutritional Hair Loss

Definition: Hair loss resulting from deficiency of essential nutrients needed for follicle health.

Causes: Lack of protein, iron, zinc, B12, vitamin D, crash diets, poor digestion.

Harm: Diffuse thinning, dull hair, indicates deeper nutritional problems.

90. Hair Follicle Infection

Definition: Infection of the hair follicle (folliculitis) causing small red or pus-filled bumps.

Causes: Bacterial (Staph), fungal, ingrown hairs, friction, shaving.

Harm: Pain, scarring, progression to boils if deep.

91. Seborrheic Alopecia

Definition: Hair loss associated with severe dandruff and seborrheic dermatitis, especially in oily scalp conditions.

Causes: Yeast overgrowth, oily scalp, hormonal factors, stress.

Harm: Itching, scalp scaling, visible thinning in affected areas.

92. Fungal Hair Infection

Definition: Fungal invasion of scalp hair (e.g., tinea capitis), leading to scaly patches and broken hairs.

Causes: Dermatophyte fungi, sharing combs/hats, poor hygiene.

Harm: Patchy hair loss, scarring if severe, spread to others.

93. Excessive Hair Growth (Hirsutism)

Definition: Male-pattern coarse hair growth in women on face, chest, abdomen, or back.

Causes: Androgen excess (PCOS), adrenal or ovarian disorders, some drugs.

Harm: Cosmetic distress, indicates hormonal imbalance and metabolic risk.

94. Hair Texture Disorder

Definition: Abnormal feel or look of hair (overly wiry, frizzy, limp, or uneven) compared to the person's usual pattern.

Causes: Genetics, chemical treatments, malnutrition, hormonal shifts.

Harm: Manageability issues, cosmetic concern, may reflect internal imbalance.

95. Chemotherapy-induced Hair Loss

Definition: Rapid loss of scalp and body hair following chemotherapy drugs that target fast-dividing cells.

Causes: Cytotoxic medications given for cancer treatment.

Harm: Temporary baldness, eyebrow/lash loss, strong emotional impact.

96. Male Pattern Baldness

Definition: Genetic hair loss in men starting at temples and crown, gradually forming characteristic baldness pattern.

Causes: Androgen sensitivity (DHT), family history, age.

Harm: Progressive permanent hair loss, psychological distress.

97. Female Pattern Baldness

Definition: Gradual thinning over the crown in women with preservation of frontal hairline, often widening of the parting.

Causes: Genetics, androgen influence, menopause, hormonal issues.

Harm: Reduced hair density, self-image issues, possible underlying endocrinopathy.

98. Trichotillomania-induced Hair Loss

Definition: Hair loss caused by repetitive pulling or twisting of one's own hair due to an impulse control disorder.

Causes: Psychological stress, anxiety, compulsive tendencies.

Harm: Patchy baldness, scarring if prolonged, emotional guilt/shame.

99. Scalp Eczema

Definition: Eczema affecting the scalp, with itchy, inflamed, flaky patches and sometimes oozing.

Causes: Atopic tendency, irritants, allergies, stress.

Harm: Itching, hair breakage, secondary infection.

100. Psoriatic Scalp

Definition: Psoriasis involving the scalp, presenting as thick, scaly plaques often beyond

the hairline.

Causes: Immune-mediated psoriasis, triggers like stress, infections.

Harm: Visible scaling, itching, hair shedding, social impact.

C. NAIL DISORDERS (101–115)

101. Brittle Nails

Definition: Nails that crack, split, or break easily, often thin and rough.

Causes: Frequent wetting/drying, nutritional deficiencies, thyroid issues, aging, Vata dryness.

Harm: Painful splits, catching on clothing, may signal systemic disease.

102. Fungal Nails (Onychomycosis)

Definition: Fungal infection of nail plate causing discoloration, thickening and crumbling of nails.

Causes: Dermatophyte fungi, moist footwear, trauma, diabetes.

Harm: Deformed nails, pain, spread to other nails/skin, difficulty walking.

103. Thick Nails

Definition: Nails become unusually thick and overgrown, sometimes curved or hard.

Causes: Fungal infection, psoriasis, trauma, poor circulation.

Harm: Pain in shoes, difficulty cutting, risk of ingrown nails.

104. Discolored Nails

Definition: Nails changing color (yellow, brown, white, blue, black) rather than normal pink.

Causes: Fungal infection, injury, smoking, liver/kidney/heart disease, medications.

Harm: Cosmetic concern, early clue to internal illnesses.

105. Spoon Nails (Koilonychia)

Definition: Nails that are thin and concave like a spoon, able to hold a drop of water.

Causes: Iron deficiency anemia, trauma, genetic factors.

Harm: Cosmetic change, indicates iron deficiency and related systemic problems.

106. Pitting Nails

Definition: Small depressions or pits on the nail surface, often multiple.

Causes: Psoriasis, alopecia areata, eczema, autoimmune conditions.

Harm: Cosmetic issue, indicates deeper skin or immune disease.

107. Splitting Nails

Definition: Longitudinal or horizontal splitting of nails into layers.

Causes: Physical trauma, overuse of chemicals, dryness, Vata aggravation, deficiency.

Harm: Pain, snagging, more prone to infection.

108. Nail Infection

Definition: Infection (bacterial or fungal) affecting nail plate or folds.

Causes: Cuts, biting, aggressive manicures, frequent wet work.

Harm: Pain, swelling, pus, nail deformity.

109. Paronychia

Definition: Inflammation/infection of the skin around the nail, acute or chronic.

Causes: Trauma, biting/picking, wet work, fungi, bacteria.

Harm: Red, painful, swollen nail folds, abscess formation.

110. Ingrown Nails

Definition: Nail edges grow into surrounding skin, usually on big toe, causing pain and inflammation.

Causes: Improper trimming, tight shoes, trauma, curved nails.

Harm: Severe pain, infection, difficulty walking.

111. Nail Bed Swelling

Definition: Swelling at the base or sides of the nail due to inflammation or fluid accumulation.

Causes: Trauma, infection, arthritis, vascular issues.

Harm: Pain, pressure, altered nail growth.

112. Nail Ridges

Definition: Raised lines running along or across the nail surface.

Causes: Aging, trauma, nutritional issues, systemic disease (if sudden).

Harm: Usually cosmetic; sudden changes may signal underlying illness.

113. Weak Nails

Definition: Nails that bend easily, peel, or tear with minimal force.

Causes: Low protein, biotin deficiency, exposure to water/chemicals, endocrine imbalance.

Harm: Difficulty maintaining length, frequent breaks, reflects system weakness.

114. Nail Discoloration Due to Disease

Definition: Changes in nail color specifically linked to systemic illnesses (e.g., yellow in liver disease, pale in anemia, blue in heart/lung disease).

Causes: Circulatory issues, anemia, liver/kidney problems, medications.

Harm: Indicator of serious underlying condition, not just cosmetic.

115. Nail Separation (Onycholysis)

Definition: Detachment of nail plate from nail bed starting at tip and moving backward.

Causes: Trauma, psoriasis, fungal infection, thyroid disease, chemicals.

Harm: Pain, risk of infection, abnormal appearance.

D. ALLERGY DISORDERS (116–135)

116. Seasonal Allergies (Hay Fever)

Definition: Allergic reaction to airborne particles (like pollen) occurring in specific seasons, affecting nose, eyes and throat.

Causes: Pollen from trees, grasses, weeds; immune overreaction (IgE mediated).

Harm: Sneezing, runny/blocked nose, itchy eyes, fatigue, sleep disturbance.

117. Food Allergies

Definition: Immune reaction triggered by specific foods, sometimes mild, sometimes life-threatening.

Causes: Common triggers include peanuts, shellfish, milk, eggs, wheat, soy.

Harm: Hives, swelling, vomiting, diarrhea, anaphylaxis in severe cases.

118. Drug Allergies

Definition: Abnormal immune response to medications, causing rashes, breathing issues or

more severe reactions.

Causes: Antibiotics, painkillers, anti-seizure drugs, many others.

Harm: Skin eruptions, anaphylaxis, organ damage, Stevens–Johnson syndrome in extreme cases.

119. Dust Allergy

Definition: Allergy to components of house dust, especially dust mites and their droppings.

Causes: Dust mite exposure in bedding, carpets, upholstery.

Harm: Sneezing, nasal congestion, asthma flare-ups, itchy eyes.

120. Pollen Allergy

Definition: Allergic reaction to plant pollens inhaled through the nose and lungs.

Causes: Tree, grass, weed pollens; seasonal variations.

Harm: Nasal itching, sneezing, watery eyes, aggravates asthma.

121. Pet Allergy

Definition: Hypersensitivity reaction to proteins from pet dander, saliva, or urine.

Causes: Cats, dogs, birds, rodents; close indoor contact.

Harm: Sneezing, itchy eyes, wheezing, skin rashes.

122. Mold Allergy

Definition: Immune reaction to mold spores present in damp indoor or outdoor environments.

Causes: Damp walls, bathrooms, basements, compost, decaying leaves.

Harm: Nasal symptoms, asthma, sinusitis, chronic cough.

123. Skin Allergy

Definition: General term for hypersensitive skin reactions leading to redness, itching, and rashes.

Causes: Foods, drugs, chemicals, metals, insect bites, plants.

Harm: Itching, swelling, sleep disturbance, risk of chronic dermatitis.

124. Anaphylaxis

Definition: Severe, rapid, systemic allergic reaction that can affect multiple organs and may be life-threatening.

Causes: Foods, drugs, stings, latex, contrast media.

Harm: Airway swelling, low blood pressure, shock, death without prompt treatment.

125. Asthma-related Allergy

Definition: Allergic inflammation in airways leading to asthma symptoms like wheezing, breathlessness, and chest tightness.

Causes: Dust mites, pollen, pets, mold, pollution, smoke.

Harm: Recurrent attacks, hospitalizations, chronic lung remodeling if uncontrolled.

126. Allergic Rhinitis

Definition: Nasal inflammation due to allergens, leading to runny/blocked nose, sneezing, and itching.

Causes: Pollen, dust, animal dander, mold.

Harm: Sleep problems, sinusitis, reduced concentration and quality of life.

127. Nasal Congestion Allergy

Definition: Blocked nose caused by allergic swelling of nasal mucosa and increased secretions.

Causes: Same as allergic rhinitis; environmental allergens.

Harm: Mouth breathing, snoring, poor sleep, sinus headaches.

128. Sneezing Fits

Definition: Repeated sneezing episodes triggered by allergens or irritants.

Causes: Pollen, dust, perfumes, sudden temperature changes.

Harm: Nasal irritation, fatigue, may signal uncontrolled allergy.

129. Eye Allergy

Definition: Allergic reaction of conjunctiva causing red, itchy, watery eyes.

Causes: Pollen, dust, pet dander, cosmetics.

Harm: Discomfort, blurred vision, rubbing leads to more irritation.

130. Conjunctivitis (Allergic Type)

Definition: Inflammation of the eye's conjunctival lining due to allergens, not infection.

Causes: Seasonal allergens, cosmetics, contact lens solutions.

Harm: Red, swollen eyes, intense itching, light sensitivity.

131. Urticaria (Allergic Hives)

Definition: Raised, itchy welts appearing as part of an allergic response.

Causes: Foods, drugs, infections, temperature changes, insect stings.

Harm: Distressing itching, cosmetic concern, may accompany angioedema.

132. Itching Rash

Definition: Skin eruption accompanied by intense itch, often allergic or irritant-mediated.

Causes: Allergens, contact irritants, foods, drugs, internal diseases.

Harm: Scratching injuries, infection, poor sleep.

133. Swelling Due to Allergy

Definition: Rapid tissue swelling (edema) from fluid leakage caused by allergic mediators.

Causes: Foods, drugs, bites, contact allergens; often histamine-driven.

Harm: Swollen lips, eyelids, hands/feet; airway swelling can be fatal.

134. Allergic Cough

Definition: Persistent dry or mild productive cough triggered by allergic irritation of airway.

Causes: Dust, pollen, mold, smoke, perfumes.

Harm: Throat irritation, disturbed sleep, can evolve into asthma.

135. Chronic Allergy Inflammation

Definition: Long-lasting low-grade inflammation due to constant or repeated allergen exposure.

Causes: Untreated allergies, polluted environment, occupational exposure.

Harm: Chronic sinusitis, asthma, nasal polyps, fatigue, tissue damage.

E. SENSORY ORGAN DISORDERS (136–160)

136. Eye Disorders (General)

Definition: Broad group of problems affecting vision and eye structures, including refractive errors, infections, inflammation and degenerations.

Causes: Genetics, aging, infections, autoimmune conditions, trauma, diabetes.

Harm: Redness, pain, vision loss, headaches, reduced quality of life.

137. Blurred Vision

Definition: Loss of sharpness of sight, making objects appear fuzzy or out of focus.

Causes: Refractive errors, cataract, diabetes, corneal disease, dry eye, glaucoma.

Harm: Reduced ability to read, drive or work safely; may signal serious eye disease.

138. Night Blindness

Definition: Difficulty seeing in low light or dark conditions; sometimes normal vision in daytime.

Causes: Vitamin A deficiency, retinal diseases, congenital conditions.

Harm: Poor night driving, risk of accidents, indicates possible malnutrition/retinal damage.

139. Cataract Early Detection

Definition: Early stage of lens clouding where vision slowly becomes blurred, hazy or glare-prone.

Causes: Aging, diabetes, steroids, UV exposure, trauma.

Harm: Progressive visual disability if not treated surgically.

140. Glaucoma-like Pattern

Definition: Group of eye conditions characterized by optic nerve damage, often with raised intraocular pressure, leading to gradual vision loss.

Causes: Elevated eye pressure, poor drainage of aqueous humor, genetics, steroids.

Harm: Loss of peripheral vision first, eventual blindness if untreated.

141. Dry Eyes

Definition: Insufficient tears or poor tear quality causing eye discomfort and visual fluctuation.

Causes: Aging, excessive screen time, dry climate, Sjögren's, certain medications.

Harm: Burning, gritty feeling, blurred vision, risk of corneal damage.

142. Red Eyes

Definition: Eye redness due to dilated or inflamed blood vessels on the surface of the eye.

Causes: Allergies, infections, dryness, trauma, glaucoma, fatigue.

Harm: May be benign but can signal serious issues like uveitis or acute glaucoma.

143. Eye Inflammation (Pittaja)

Definition: Inflammation of various eye structures, often with redness, heat, pain and photophobia.

Causes: Infections, autoimmune disease, trauma, Pitta aggravation.

Harm: Vision disturbance, scarring, potential permanent damage if chronic.

144. Ear Disorders (General)

Definition: Range of conditions affecting outer, middle or inner ear, impacting hearing and balance.

Causes: Infections, wax buildup, trauma, noise exposure, age-related degeneration.

Harm: Pain, hearing loss, tinnitus, balance problems.

145. Tinnitus (Karna Nada)

Definition: Perception of ringing, buzzing or other sounds in the ears without external noise.

Causes: Loud noise exposure, earwax, medications, age-related hearing loss, stress.

Harm: Sleep disturbance, anxiety, concentration problems.

146. Ear Itching

Definition: Irritating sensation in ear canal leading to desire to scratch.

Causes: Dry skin, eczema, fungal infection, allergy, wax, foreign bodies.

Harm: Self-inflicted injury with objects, infection, discomfort.

147. Ear Congestion

Definition: Feeling of fullness or blocked sensation in the ear.

Causes: Eustachian tube dysfunction, colds, allergies, wax, middle ear fluid.

Harm: Temporary hearing loss, pressure discomfort, predisposes to infection.

148. Hearing Loss

Definition: Partial or complete inability to hear sounds at normal loudness.

Causes: Age-related changes, noise damage, infections, wax, ototoxic drugs, genetic factors.

Harm: Communication difficulties, social isolation, cognitive decline.

149. Ringing in Ear

Definition: Symptom of tinnitus where a ringing sound is heard continuously or intermittently.

Causes: Same as tinnitus: noise exposure, ear disorders, stress, medications.

Harm: Annoyance, anxiety, insomnia.

150. Vertigo (Bhrama)

Definition: Sensation that you or your surroundings are spinning or moving when they are not.

Causes: Inner ear problems (BPPV, labyrinthitis), vestibular nerve inflammation, brain lesions.

Harm: Falls, nausea, vomiting, fear of moving.

151. Nose Disorders (General)

Definition: Conditions affecting nasal cavity and sinuses such as congestion, infections, deformities.

Causes: Allergies, infections, deviated septum, trauma, polyps.

Harm: Blocked breathing, snoring, sinusitis, reduced smell.

152. Loss of Smell

Definition: Decreased or absent ability to perceive odors (hyposmia/anosmia).

Causes: Viral infections (including COVID), nasal polyps, head injury, neurodegenerative diseases.

Harm: Reduced taste, safety hazards (gas/smoke), diminished enjoyment of food.

153. Chronic Sinus Inflammation

Definition: Long-term inflammation of sinus cavities causing congestion and facial pressure.

Causes: Allergies, recurrent infections, nasal polyps, structural issues.

Harm: Headache, breathing trouble, sleep problems, chronic fatigue.

154. Taste Disorders

Definition: Changes or loss in ability to taste flavors correctly (dysgeusia/ageusia).

Causes: Zinc deficiency, medications, infections, nerve damage, smoking.

Harm: Poor appetite, weight loss, reduced enjoyment of food.

155. Tongue Coating

Definition: Visible layer on the surface of the tongue from debris, bacteria, food, or mucus.

Causes: Poor oral hygiene, digestive issues, dehydration, smoking, infection.

Harm: Bad breath, altered taste, sometimes indicator of systemic issues.

156. Mouth Ulcers (Aphthous)

Definition: Small, painful sores inside the mouth on tongue, cheeks, or gums.

Causes: Stress, minor trauma, nutritional deficiencies, hormonal changes, sometimes autoimmune.

Harm: Pain in eating and speaking, weight loss if severe and frequent.

157. Bad Breath (Halitosis)

Definition: Persistent unpleasant odor from the mouth.

Causes: Poor oral hygiene, gum disease, dry mouth, infections, GI or systemic diseases.

Harm: Social embarrassment, may indicate serious dental or internal problems.

158. Teeth Sensitivity

Definition: Sharp, sudden pain in teeth when exposed to hot, cold, sweet, or acidic stimuli.

Causes: Enamel erosion, gum recession, cavities, abrasive brushing.

Harm: Difficulty eating/drinking, risk of further damage if cause ignored.

159. Gum Inflammation

Definition: Swelling, redness and sometimes bleeding of the gums (gingivitis/periodontitis).

Causes: Plaque buildup, poor oral hygiene, smoking, diabetes, vitamin C deficiency.

Harm: Tooth loss, bad breath, systemic inflammation linked to heart disease.

160. Oral Fungal Infections

Definition: Overgrowth of fungi (usually Candida) in the mouth causing white patches and soreness (oral thrush).

Causes: Antibiotics, steroids, diabetes, immunosuppression, dentures.

Harm: Pain, difficulty eating, risk of spread to throat and esophagus.
